Course	English	Grade	8th Grade	Duration	4 lesson hours (4x40')

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

This learning scenario promotes an effective learning environment by enabling the students to identify extreme sports, articulate their preferences, give reasons for their preferences, and make comparisons. By engaging the students in project-based and task-based activities, the scenario aims to enhance

Learning Goals

Students

•

Course Objectives

- E8.6.L1. Students will be able to follow a discussion on adventures.
- E8.6.L2. Students will be able to understand the main points of simple messages.
- E8.6.SI1. Students will be able to interact with reasonable ease in short conversations.
- E8.6.SI2. Students will be able to talk about comparisons, preferences and their reasons.
- E8.6.SP1. Students will be able to make comparisons about sports and games by using simple descriptive language.
- E8.6.R1. Students will be able to understand short and simple texts to find the main points about adventures.

Related Skills

- Collaboration
- Communication
- Digital literacy
- Active listening
- Critical thinking

PREPARATION

Learning Approaches, Methods, Strategies

- Technology-based learning
- Cooperative learning
- Project-based learning
- Task-based learning
- Fishbowl technique

Tasks

Teacher

- Creates and designs digital materials such as games, visuals and checklists.
- Encourages the students to collaborate in the creation of adventure courses and extreme sports stands.
- Fosters active student participation by means of collaborative group learning activities.
- Offers continuous guidance and constructive feedback to facilitate student development.

Student

- Engages proactively in project-based learning tasks, including adventure courses and extreme sports stands.
- Develops and implements a structured plan for designing an adventure course and dissemination materials for extreme sports presentations.
- Demonstrates effective collaboration skills in group-oriented digital tasks.
- Assumes responsibility for assigned tasks and learning activities.

Instructional Tools / Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool

Hardware

- Interactive whiteboard
- Tablet
- Computer
- Printer

Online Tools

- eba.gov.tr
- Gamification web tools
- Visual creation and editing tools
- Survey tools
- Web tools for matching activities

Instructional Materials/ Tools

- Printed brochures and dissemination visuals for extreme sports stands, rope, netting, planks

APPLICATION

Activities

Before the Lesson

The teacher designs a game titled Epic Dance Challenge using one of the gamification web tools, and a visual titled Extreme Sports using one of the visual creation and editing tools (Annex-1). Then, for the assessment, the teacher prepares a matching activity titled Group the Sports, using one of the web tools for matching activities.

Lesson 1 (Class)

Pre-Activity

The teacher commences the lesson by posing the questions, "What is the relation between physical activity and health?" and "How often do you do sports?", thereby encouraging the students to reflect on

Post-Activity

Following the discussion, for the assessment, the teacher initiates the Group the Sports matching activity, in which the students are required to work in pairs to group the given extreme sports such as kayaking, rafting, skydiving under the corresponding title indicating the locations where they can be practised.

Before the Lesson

The teacher procures materials such as rope, netting, and planks, which will later be used in implementing of the adventure project in the school garden.

Lesson 2 (Garden)

Pre-Activity

At the beginning of the lesson, the teacher informs the students that they will be in the school garden for an activity. Once in the garden, the teacher invites the students to form a circle, stands at its centre, displays the materials, and asks the students to guess the purpose of bringing these materials to the garden. The teacher evaluates the students' guesses and indicates which ones are correct or closest to the intended answer. The teacher asks guiding questions such as "What is the importance of adventure in your lives?", "Have you ever done an extreme sport?", and "What is the relation between extreme sports and freedom?" These questions encourage the students to discuss the role of freedom and adventure in their lives.

While Activity

Following the discussion, the teacher emphasises the importance of physical activity and exercise in our lives and invites the students to initiate an adventure course project in the school garden. The ensuing details will be elucidated: firstly, the posters indicating the importance of physical activity for

Post-Activity

At this stage, the teacher conducts a brainstorming session with the students to reflect on the proposed project. The students are encouraged to share their observations and discuss the potential challenges and risks that might arise during the implementation of an adventure course, making comparisons between different adventure options. To make the process more effective, this stage can be organised outdoors in groups, which is especially helpful for large classes. The risk and challenge discussion can also be made role-based to enrich perspectives. For example, the students can be divided into groups such as the “Safety Team,” the “Organisers,” the “Students’ Club,” and the “Eco Team.” Each group represents a different viewpoint and contributes by focusing on safety,

In the final stage, the group undertakes the practical task of setting up the Adventure Course in the school garden. Meanwhile, the Water Sports, Air Sports, and Land Sports groups employ chatbots to conduct research on their respective categories and use visual creation and editing tools to create detailed dissemination materials such as brochures or posters of their respective sports categories. These dissemination materials are then showcased at stands in the school garden to inform their peers about the different types of sports. Each group needs to use structures to express preferences, give reasons for their preferences and make comparisons for their assigned tasks. The students will

Self-Assessment Form

Dear students, use this form to evaluate yourselves.

Name-Surname:

PART 1 – MY CONTRIBUTION

1. I actively participated in the tasks of my group.

☐ Always ☐ Sometimes ☐ Rarely

2. I shared my ideas and listened to my friends' ideas.

☐ Always ☐ Sometimes ☐ Rarely

3. I helped my group when we had difficulties.

☐ Always ☐ Sometimes ☐ Rarely

PART 2 – REFLECTION

1. The part I enjoyed MOST in this project was:

.....

2. The BIGGEST difficulty I faced was:

.....

3. Next time, I would like to improve in:

.....
