GENERAL DIRECTORATE

CHORES BUILD RESPONSIBILITY

Course	English	Grade	8th Grade	Duration	4 lesson hours (4x40')

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

This learning scenario is designed to develop the students' communication, collaboration, creativity, and digital skills through the theme of *Chores*. At the beginning, the students explore key concepts and vocabulary at home through digital resources such as videos and worksheets before class, which allows more time for interactive, communicative, and creative tasks. During lessons, the teacher integrates a variety of interactive strategies including visual aids, gamified activities, digital stories, role-play tasks, and group discussions. These activities encourage the students to practice expressing their likes, dislikes, and responsibilities in authentic contexts while engaging in problem-solving and critical thinking. The teacher's role is to facilitate learning, guide discussions, and provide immediate feedback, while the students take an active role through cooperative work, gamification, and technology-based tasks. Innovative evaluation methods such as gamified assessment, peer feedback, and digital storytelling are used to measure progress and sustain motivation. With technology-supported activities, the scenario fosters vocabulary acquisition, communicative competence, and 21st-century skills in a motivating, student-centred environment.

Key Concepts: Chores, Responsibilities, Likes and dislikes, Obligations

Learning Goals

Students

- Identify hobbies and chores in short oral texts.
- Use digital tools to support learning.
- Talk about future ways of doing chores and responsibilities.
- Collaborate with peers to create dialogues.
- Actively use target language and information technology.

Course Objectives

- E8.8.L1. Students will be able to identify the main points of a short talk describing the
- responsibilities of people.
- E8.8.SI1. Students will be able to interact during simple, routine tasks requiring a direct exchange of information.
- E8.8.SI2. Students will be able to talk about responsibilities.
- E8.8.SP1. Students will be able to express their obligations, likes and dislikes in simple terms.
- E8.8.R1. Students will be able to understand various short and simple texts about responsibilities.

Related Skills

- Communication
- Critical thinking
- Digital skills
- Productivity

PREPARATION

Learning Approaches, Methods, Strategies

- Technology-based learning
- Cooperative learning
- Gamification

Tasks

Teacher

- Prepares and shares digital resources (videos, worksheets, visuals) to introduce chores, hobbies, and responsibilities.
- Explains and models how to express likes, dislikes, and responsibilities.
- Designs and facilitates interactive and gamified activities to boost motivation.
- Guides the students in collaborative tasks such as dialogues, group discussions, and role-plays.
- Encourages active participation and monitors student progress with feedback.
- Uses interactive whiteboard and digital tools effectively to support learning.

Student

- Expresses likes, dislikes, hobbies, and responsibilities in simple oral exchanges.
- Uses digital tools to create visuals or short presentations about chores and free time activities.
- Actively participates in class activities, following teacher guidance.
- Collaborates with peers to create dialogues and group presentations.
- Engages in gamified tasks and technology-based learning activities to develop digital competence.
- Takes responsibility in both classroom activities and assignments, showing creativity and critical thinking.

Instructional Tools / Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive whiteboard
- Computer

Online Tools

- eba.gov.tr
- Visual creation and editing tools
- Web tools for matching activities
- Interactive presentation tools
- Gamified measurement and evaluation web tools

APPLICATION

Activities

Before the Lesson

In this lesson, the students are expected to review the content at home before coming to class. It is aimed to enhance the students' active participation and deeper learning by using the flipped learning approach. The teacher prepares a variety of digital resources to increase student motivation and foster active participation. First, the teacher shares the Chores video link from EBA with the students for pre-class study. To support their preparation, the teacher creates an activity titled Chores Worksheet using one of visual creation and editing tools on key vocabulary items from the video. The students complete this worksheet at home to familiarise themselves with the topic and key terms, enabling them to actively participate in classroom activities. The teacher prepares an activity titled Chores Match-Up using a web tool for matching activities to reinforce key vocabulary, increase student motivation, and provide an interactive, gamified practice during the lesson (Annex-1).

Lesson 1 (Class)

Pre-Activity

To activate the prior knowledge, review key vocabulary, and prepare the students for the main lesson on *Chores*, the teacher asks a few quick, general questions to get the students thinking about the topic, such as: "Which chores do you do at home? Who usually does the laundry in your family? Some people think children should not do chores. Do you agree or disagree? Why? Do chores help children become more responsible? Why, or why not?"

While Activity

The students bring the Chores Worksheet they completed at home, focusing on key vocabulary items (e.g. wash dishes, take out the trash, make the bed, vacuum, do the laundry, tidy up). The teacher goes through the worksheet with the class, discussing each word, checking sentences, and clarifying any misunderstandings. The students are encouraged to actively participate and compare their sentences with classmates and receive support and feedback to reinforce vocabulary and correct usage. After the worksheet activity, the teacher initiates the Chores Match-Up activity in which the students match the words with their correct meanings (Annex-1). Gamification is used to increase the students' motivation and reinforce key vocabulary, encourage active participation, and provide immediate feedback.

Post-Activity

Following the activity, the students work in pairs to discuss a specific topic about their daily chores using 3–4 vocabulary words from the lesson. During the discussion, the students ask and answer questions such as: "Can you describe a chore you find easy and one you find difficult?", "Even if you don't like a chore, which one do you still have to do?", "How often do you do this chore?", and "Which chore do you dislike the most? How do you feel when you do it?" The teacher guides the conversation, monitors speaking, and provides immediate feedback. These questions help the students reach the objective by practising how to express and understand obligations, as well as likes and dislikes. The objective is to strengthen speaking skills, encourage active use of vocabulary, and build confidence in communicating about everyday routines.

Related Skills: Communication, Digital skills, Critical thinking

Before the Lesson

The teacher prepares a digital story titled Sharing Chores at Home using an interactive presentation tool on family chores, along with group discussion materials and visual aids (Annex-2). The objective is to engage the students, provide a clear context for the topic, and facilitate collaborative learning.

Lesson 2 (IT Class)

Pre-Activity

To activate prior knowledge, review key vocabulary, and prepare the students for the main lesson on chores, the teacher shows the first scene of the digital story Sharing Chores at Home and asks a few quick, critical thinking questions to get the students thinking about the topic such as: "What do you notice first about this kitchen? Does this kitchen look like your kitchen at home? If you were Tom, how would you respond to your mother's request? Would it be different from the story?"

While Activity

Subsequent to the activity, the teacher displays the digital story Sharing Chores at Home to the class (Annex-2). The students are required to watch the story carefully, paying attention to the family's interactions. After watching, the teacher asks the students to work in small groups to discuss how the family could share the chores and decide which chore each family member should do. The teacher's objective is to engage the students in collaborative discussion, encourage critical thinking about the story, and guide the group work. Following the story viewing and group discussion, the teacher initiates a group presentation activity, in which the students are required to decide how the family members could share the chores fairly. Each group prepares a short presentation or chart showing their suggested distribution of chores, by using an interactive presentation tool. The objective of this activity is to promote collaborative problem-solving, critical thinking, and speaking skills, while connecting the story to the students' own experiences and ensuring active participation in a meaningful, interactive learning environment.

Post-Activity

Following the story viewing and group discussion, the students present their group work to the class. Each group shares how the family members could fairly distribute the chores, by showing their short presentation or chart using an interactive presentation tool.

Related Skills: Communication, Collaboration, Digital skills, Creativity, Critical thinking, Problem solving

Before the Lesson

The teacher designs various visuals titled A House in Chaos using an interactive presentation tool to grab the students' attention and stimulate discussion about household responsibilities. The teacher sets up a Chores Wheel game using one of the gamified measurement and evaluation web tools to review common chores (Annex-3). The teacher also prepares a grouping activity titled Home Responsibilities vs. School Responsibilities using one of the web tools for matching activities (Annex-4).

Lesson 3 (Class)

Pre-Activity

The teacher displays the visuals titled A House in Chaos and asks attention-grabbing questions such as: "What can you see in the picture? Do you think this house looks organized or messy? Why? What would you do if this were your house?"

While Activity

The teacher organises the students into small groups and explains that they will play a game to review common household chores. The teacher initiates the Chores Wheel on the interactive board and provides clear instructions, telling the students that when the wheel spins, a definition of a chore will appear, and they must guess the correct term (Annex-3).The teacher manages the game by spinning the wheel or allowing each group to take turns. The students discuss the definition within their group and agree on the answer. Each correct answer earns the group a point, creating a friendly competition among groups. This activity continues until all definitions on the wheel have been used, or until a set time is reached. Through this competitive and interactive format, the students practise listening comprehension, speaking, and collaborative skills while learning about daily household responsibilities.

Post-Activity

Following the activity, the teacher displays a list of responsibilities on the interactive board,Home Responsibilities vs. School Responsibilities, to help the students distinguish between home and school responsibilities, while practising critical thinking and active participation (Annex-4). The students take turns to come to the board and classify each task as either 'Home' or 'School'. Alternatively, they can call out their answers while the teacher moves the items on the board.

Related Skills: Communication, Collaboration, Digital skills, Creativity, Critical thinking

Before the Lesson

The teacher creates a poster titled Robotic Chores in the Future using a visual creation and editing tool to grab the students' attention and stimulate discussion.

Lesson 4 (IT Class)

Pre-Activity

The teacher initiates the lesson by presenting the poster titled Robotic Chores in the Future, which features smart home devices and robots. The students are asked guiding questions such as: "How do these robots change the way people manage household tasks, and what are the potential advantages and disadvantages? If you could design a robot to do any chore at home, what would it be, and how would it improve your daily life?" This activity encourages the students to analyse current technologies, evaluate their benefits and drawbacks, and creatively imagine future applications, thereby fostering critical thinking and problem-solving skills.

While Activity

The teacher divides the class into small groups. Each group works together to create a role-play script about a 'Future Smart Home'. The students imagine a family scene where robots or smart devices help with chores (e.g. a robot cooking dinner, a smart fridge ordering groceries, or a robot ironing clothes). By using a visual creation and editing tool, the students prepare virtual backgrounds to make their role-play more realistic. They write dialogues where characters interact with robots, negotiate tasks, and discuss the advantages or funny problems of having robots at home. The teacher explains how the students will use digital tools to create virtual backgrounds and role-play scripts about a 'Future Smart Home', giving examples and tips to help them get started. This helps the students focus and understand household chores in a new way, use the right vocabulary, and be ready for creative group activities.

Post-Activity

Each group presents their role-play performance to the class, using their prepared digital backgrounds. After each presentation, classmates provide short peer feedback. The teacher summarises the students' contributions and provides short feedback from real-life technology trends.

Homework/Assignment

The students are asked to create a short video at home, showing how chores are shared amongst family members. They can film themselves, their sisters/brothers, or parents performing daily tasks such as making the bed, washing dishes, tidying up, or taking out the trash. The video should be 2–3 minutes long and include at least 4–5 vocabulary words learnt in the class. The students are encouraged to be creative by adding narration, captions, or background music to explain the chore distribution. This activity allows the students to apply classroom learning in real-life contexts, practise English in authentic situations, and develop their digital storytelling skills.

Related Skills: Communication, Collaboration, Digital skills, Creativity, Critical thinking, Productivity

Evaluation/Assessment Methods/Tools

- Web tools for matching activities
- Gamified measurement and evaluation web tools

Chores Match-Up

Dear students, match the chores with their correct meanings.

☐ **1.** Iron	**a)** To arrange your bed neatly in the morning.
☐ **2.** Take out the garbage	**b)** To wash your clothes using a washing machine.
☐ **3.** Set the table	**c)** To put your room, toys or books in order.
☐ **4.** Fold the clothes	**d)** To wash and wipe the windows so they are clear.
☐ **5.** Vacuum	**e)** To make clothes smooth.
☐ **6.** Tidy up/ Clean Up	**f)** To neatly arrange clean clothes after washing.
☐ **7.** Mop The Floor	**g)** To remove trash from the house and put it outside.
☐ **8.** Clean the windows	**h)** To arrange plates and cups on the table before a meal.
☐ **9.** Dust the Furniture	**i)** To clean the floor using a mop and water.
☐ **10.** Do the laundry	**j)** To remove dust from tables, shelves and other surfaces.
☐ **11.** Wash the dishes	**k)** To clean the floor using a vacuum cleaner or broom.
☐ **12.** Make the bed	**l)** To clean the plates and cups after meals.

The Transcript of 'Sharing Chores at Home' Digital Story

Description: The teacher creates a digital story about sharing chores at home.

Page 1
Mother: Tom, can you help me in the kitchen?
Tom: Oh no! I am tired. I did the laundry yesterday.

Page 2
Tom: That's not fair. I always do more chores.
Sister: Don't be lazy, Tom. I cleaned the living room.

Page 3:
Father: Stop arguing. Let's share the chores equally.
Mother: Teamwork makes everything easier.

Page 4:
Father: When I was your age, chores were never optional. I had to wash the dishes, sweep the floor, and tidy my room every single day.
Tom: That sounds really tough!

Page 5:
Father: It was, but it helped me learn responsibility. Maybe we can come up with a way to make chores more fun for everyone.
Mother: I have an idea! Let's pick a chore randomly from this jar.

Chores Wheel Activity Guide

Description: The teacher prepares an interactive game where the students guess the correct chore based on its definition.

DEFINITIONS

1. To put your room, toys, or books in order.
2. To arrange your bed neatly in the morning.
3. To clean the plates and cups after meals.
4. To wash your clothes using a washing machine.
5. To remove trash from the house and put it outside.
6. To arrange plates, cups, and cutlery on the table before a meal.
7. To make clothes smooth using an iron.
8. To clean the floor using a vacuum cleaner or broom.
9. To remove dust from tables, shelves, and other surfaces.
10. To wash and wipe the windows so they are clear.
11. To clean the floor using a mop and water.

EXPECTED ANSWERS

1. Tidy up / Clean up
2. Make the bed
3. Wash the dishes
4. Do the laundry
5. Take out the garbage/rubbish
6. Set the table
7. Iron
8. Vacuum
9. Dust the furniture
10. Clean the windows
11. Mop the floor

Home Responsibilities vs. School Responsibilities

Dear students, match the responsibilities with the correct category.

make the bed | do the laundry | wash / dry the dishes | arrive on time | keep quiet

set the table | obey the rules | do homework | tidy up | respect teachers and classmates

take out the garbage / trash | participate in class | return books (to the library) | load/empty the dishwasher

Home Responsibilities	School Responsibilities

Annex-4

Home Responsibilities

make the bed
do the laundry
wash / dry the dishes
set the table
tidy up
take out the garbage / trash
load/empty the dishwasher

School Responsibilities

arrive on time
keep quiet
obey the rules
do homework
respect teachers and classmates
participate in class
return books (to the library)
