INNOVATION AND EDUCATIONAL TECHNOLOGIES
GENERAL DIRECTORATE

PHONE TIME

Course	English	Grade	8th Grade	Duration	4 lesson hours (4x40')

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

This learning scenario is designed to help students practise phone conversation skills, including making simple phone calls, understanding messages, and using polite expressions. Through the integration of gamified activities, digital storytelling, and cooperative learning, the students actively develop their speaking, listening, and critical thinking abilities. The teacher employs various digital tools to support the students' learning while guiding them through interactive tasks, such as matching exercises, role-playing activities, and comprehension tasks. These activities aim to foster a dynamic, fun, and motivating learning environment that enhances the students' confidence in phone conversations and strengthens their communication skills.

The teacher's role is that of a facilitator, providing feedback, encouraging participation, and creating an interactive and supportive learning atmosphere. The students, in turn, are expected to engage with digital materials, practise their speaking skills through role-playing, and complete tasks that reinforce their vocabulary and understanding of phone-related expressions. The assessment is conducted through various interactive exercises that enable the teacher to track the students' progress and provide targeted feedback to enhance their language abilities. By the end of the scenario, the students will have gained the confidence and skills needed to participate in basic phone conversations and understand short messages related to communication.

Key Concepts: Phone conversation, Simple phone call, Messages

Learning Goals

Students

- Recognise and use key vocabulary and polite expressions related to phone conversations.
- Identify the main ideas and specific details in short phone dialogues.
- Make simple phone calls, asking and responding to basic questions appropriately.
- Participate in role-playing activities involving phone calls, including polite requests and responses.
- Express spontaneous decisions using appropriate conversational expressions.
- Write short, realistic dialogues that reflect phone conversations and message exchanges.
- Engage with digital tools to practise and present phone conversations.

Course Objectives

- E8.4.L1. Students will be able to understand phrases and related vocabulary items.
- E8.4.L2. Students will be able to follow a phone conversation.
- E8.4.SI1. Students will be able to make a simple phone call asking and responding to questions.
- E8.4.SP1. Students will be able to express their decisions taken at the moment of conversation.
- E8.4.R1. Students will be able to understand short and simple texts with related vocabulary.
- E8.4.W1. Students will be able to write short and simple conversations.

Related Skills

- Communication
- Collaboration
- Critical thinking
- Active listening
- Digital skills
- Creativity

PREPARATION

Learning Approaches, Methods, Strategies

- Cooperative learning
- Gamification
- Storytelling
- Station rotation technique

Tasks

Teacher

- Uses technological tools to develop the students' listening, speaking, reading, and writing skills related to phone conversations.
- Prepares digital materials such as recorded dialogues, animations, and online activities.
- Guides the students in using correct expressions and vocabulary during phone calls.
- Creates a supportive environment for practising phone conversations.
- Provides feedback and encourages the students to express decisions naturally during conversations.

Student

- Participates in online tasks and role-playing activities to practise phone conversations.
- Uses digital materials such as dialogues, videos, and games shared by the teacher.
- Practises asking and answering questions politely during phone calls.
- Expresses decisions clearly during speaking tasks.
- Focuses on learning tasks and uses appropriate vocabulary and expressions.

Instructional Tools / Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive whiteboard
- Tablet
- Computer

Online Tools

- eba.gov.tr
- Web tools for matching activities
- Web tools for short answer questions
- Gamification web tools
- Digital story creation tools
- Web tools for multiple-choice questions
- Gamified measurement and evaluation web tools
- Web tools for fill-in-the-blank questions
- Animation creation tools
- Interactive presentation tools
- Video editing tools
- Classroom management tool

APPLICATION

Activities

Before the Lesson

The students are required to complete Vocabulary Exercise 1: On the Phone on EBA, where they match commonly used phone conversation phrases with their corresponding images. The teacher creates an interactive game titled What's Behind Game using a gamified measurement and evaluation web tool. Then, the teacher prepares an activity titled Ways of Communication using one of the web tools for matching activities. Additionally, the teacher develops a digital story titled Plans on the Phone using a digital story creation tool (Annex-1). The teacher prepares an exercise named Listen & Find using a web tool for fill-in-the-blank questions.

Lesson 1 (Class)

Pre-Activity

To warm up, the teacher tells the students that they are going to play the What's Behind Game. In this game, students move the cursor across the screen to reveal a hidden image. This interactive task captures the students' attention and helps them to draw on their existing knowledge of the topic.

While Activity

The teacher incorporates the Ways of Communication exercise, in which the students listen to audio clips and match each form of communication to the relevant picture. This activity improves the students' auditory comprehension and reinforces their understanding of different communication methods.

Following the matching exercise, the teacher moves on to the digital story titled Plans on the Phone, which features an audio recording of a phone conversation between two friends discussing their weekend plans (Annex-1). Through this story, the students are introduced to everyday expressions related to making plans, offering help, and refusing politely. After listening, the teacher checks the students' comprehension by asking questions such as, "What does James want to do?" and "Why can't Leo play video games right now?", helping them to recall and reflect on the conversation's content. To further encourage critical thinking and student engagement, the teacher may also ask questions such as, "Do you agree with Leo's decision? Why or why not?' This encourages students to express their own opinions and back them up with logical reasoning.

Following the discussion, the teacher divides the class into pairs or small groups and invites each group to create a similar conversation on the phone. These conversations should include common phrases for arranging and rearranging plans, as well as references to school responsibilities and leisure activities. Once they have finished, each group performs their conversation for the class.

Post-Activity

The teacher introduces the Listen & Find activity, which features a message text exchange between two friends. In this activity, the students listen to audio clips containing six missing words or phrases from the message. The transcript is displayed with gaps, and the students listen carefully to identify the correct words. They then complete the task by dragging and dropping the audio-based words onto the correct gaps in the message.

Once the activity has been completed, the teacher reviews the answers with the class and asks comprehension questions to reinforce understanding. These may include questions such as "Why can't Mary join the walk?" or "What is planned for Thursday?". This activity develops students' listening and word recognition skills, as well as promoting attention to detail and the use of language in context.

Related Skills: Active listening, Digital skills, Creativity, Collaboration, Communication

Before the Lesson

The teacher creates a memory card game titled Find the Pairs using a gamification web tool to reinforce vocabulary through an engaging and interactive learning experience. In addition to this, the teacher designs an activity named Courier Call using a digital story creation tool (Annex-2). Furthermore, the teacher prepares another activity titled Ways We Connect using one of the web tools for short answer questions.

Lesson 2 (Class)

Pre-Activity

At the beginning of the lesson, the teacher uses the Find the Pairs memory card game to activate the students' prior knowledge and promote active engagement. This interactive task requires the students to recall the positions of various cards and accurately match each pair. The students are encouraged to complete the game efficiently and aim to surpass their previous performance. By incorporating elements of game-based learning, the activity supports vocabulary retention, enhances short-term memory, and fosters digital literacy skills.

While Activity

Following the memory card game, the teacher moves on to the Courier Call digital story (Annex-2). In this activity, the students listen to a conversation between a courier and a customer, then answer questions about it, such as "What is the address the courier confirms?" and "When will the courier arrive?". The teacher also asks the students to identify phrases used to confirm information, such as "Is it 45 Elm Street, Apartment 3B?". The students can then practise the conversation in pairs, taking turns to be the courier and the customer. To make the activity more varied, the teacher could ask students to create a new version of the conversation by changing details such as the address or delivery time. This helps them practise being flexible in their use of language and reinforces their vocabulary.

Post-Activity

As a part of the assessment, the teacher integrates the Ways We Connect activity, which features vocabulary items such as mobile phone, telephone, letter, and e-mail. The students are encouraged to observe the pictures and type the corresponding words that represent different communication tools. Each word begins with a given first letter to help with vocabulary recall. The activity focuses on writing skills, helping students to reinforce their understanding of communication methods and practise correct spelling in a fun, interactive way.

Related Skills: Active listening, Digital skills, Collaboration, Communication

Before the Lesson

The teacher designs an exercise named Find the Double using one of the gamification web tools. Subsequently, to enhance student engagement, the teacher creates an animation titled Customer Service Call using one of the animation creation tools (Annex-3). In addition, the teacher prepares another activity titled Caller or Receiver using a web tool for matching exercises (Annex-4).

Lesson 3 (Class)

Pre-Activity

The teacher uses the Find the Double exercise as a warm-up activity, prompting the students to quickly identify the repeated image. This engaging task enhances the students' visual recognition skills and reinforces vocabulary retention.

While Activity

Following the warm-up activity, the teacher moves on to the Customer Service Call animation (Annex-3). In this activity, the students listen to a conversation between a customer and a service representative, then answer comprehension questions such as “Why is Mary calling?” or “What solution does the representative suggest?” to check their understanding of the conversation. The teacher also highlights key expressions used for reporting a problem and offering assistance, such as “I’m calling because...” and “You can try restarting your modem.”

After the story, the teacher organises a Communication Methods Station Activity, dividing the classroom into four stations, each representing a different communication method: Phone Call, Text Message, Email, and Video Call. The students move to the station that matches the communication method they want to practise, where they complete simple tasks. In the Phone Call station, the students practise a conversation about weekend plans, while in the Text Message station, they write about what they are doing today. At the Email station, they write a short mail to a teacher about homework, and at the Video Call station, they act out a conversation about their favourite hobby. After the tasks are completed, the students move to different stations. Some volunteers share their responses with the class. This activity lets students practise different ways of communicating, improve their language skills, and understand how to use language in real-life situations.

Post-Activity

For the assessment, the students move on to the Caller or Receiver categorisation task (Annex-4). In this interactive drag-and-drop exercise, the students are invited to read sentences that appear on the screen and decide whether each sentence would typically be said by a caller or a receiver during a phone conversation. They then drag and drop each sentence into the appropriate category. For example, the phrase »Please hold on the line.« falls under the receiver category. This activity supports the development of functional language and helps students to distinguish between roles in everyday conversations while reinforcing comprehension.

Related Skills: Active listening, Digital skills, Collaboration, Communication

Before the Lesson

The teacher creates an exercise titled Communication Bowling using a gamified measurement and assessment web tool to make learning more engaging (Annex-5). Then, the teacher designs another exercise named Match & Learn exercise using one of the web tools for matching activities. The teacher prepares a video titled Reading Time with a video editing tool and makes the content interactive by embedding questions within it. Finally, the teacher develops a Phone Quiz utilising a web tool for multiple-choice questions (Annex-6).

Lesson 4 (IT Class)

Pre-Activity

The teacher uses the Communication Bowling exercise as a warm-up activity, in which the students roll a ball towards a set of pins, each labelled with different forms of communication (e.g. phone call, video call) (Annex-5). If the student answers correctly, the pin falls and they earn a point. If they are unsure, the ball rolls past the pin without knocking it down and it is the next student's turn. This activity promotes visual recognition and reinforces vocabulary retention in an interactive and fun way.

While Activity

The teacher uses the Match & Learn activity. In this exercise, the students match each word with its correct definition. They read the words and select the correct definition. This activity helps the students to learn new vocabulary and understand words better in a fun and interactive way.

Following the matching activity, the teacher moves on to the Reading Time activity. In this activity, the students are asked to read a series of short telephone conversations either individually or in pairs. Each conversation reflects a real-life situation, such as arranging appointments, rearranging plans or verifying information. After reading each dialogue, students answer a related comprehension question designed to assess their understanding of the key details and intentions within the conversation. This activity reinforces the use of functional language and supports reading comprehension and critical thinking in a communicative context.

After the activity, the students complete a digital task to reinforce their understanding and practise real-life communication skills. For this task, they work either individually or in pairs to create a short telephone conversation based on a real-life situation, such as arranging an appointment, confirming a reservation or rearranging a meeting. The students use a digital tool to present their conversations, and they are encouraged to add visuals, emojis, or sound effects to make their presentations more engaging. Finally, they share their digital dialogues on a shared platform and comment on each other's work. This task enhances students' speaking and writing skills, as well as fostering creativity, collaboration and digital literacy.

Post-Activity

The teacher assesses the students by administering the Phone Quiz, which is a multiple-choice activity in which students must examine visuals and read the accompanying sentences or short texts carefully before selecting the correct option that corresponds to the description provided (Annex-6). This activity helps students to develop their reading comprehension and vocabulary skills, as well as their ability to connect visual information with written language.

Homework/Assignment

The teacher sets the students the task of creating a recorded phone conversation in pairs. Each pair will have a real phone conversation about a chosen topic, such as arranging to meet up, discussing school projects, sharing personal news, or asking for help. Throughout the conversation, both students are expected to use common phone expressions and polite language. They should prepare by noting down key phrases, including greetings, questions and farewells. They will then call each other and have a 2–3 minutes conversation. Once the conversation has been recorded, the students will submit the audio file via the designated classroom management tool. This assignment will help students practise phone-related expressions, improve their pronunciation and fluency, and build their confidence in using English in real-life communication situations.

Related Skills: Collaboration, Digital skills, Critical thinking, Communication

Evaluation/Assessment Methods/Tools

- EBA + vocabulary exercise
- Web tools for matching activities
- Gamified measurement and evaluation web tools
- Web tools for multiple-choice questions
- Web tools for short answer questions
- Web tools for fill-in-the-blank questions

The Transcript of the 'Plans on the Phone' Digital Story

Description: The teacher creates a digital story using one of the digital story creation tools, including the following context.

10:00

James:
Hi, it's James. How are you?
Leo:
Hi, James! I'm doing well, thanks. How about you?
James:
I'm good, thanks! Are you free to play video games now?
Leo:
Sorry, I'm doing my homework. I have a science test tomorrow.
James:
Oh, I see. That sounds important. Do you need any help with it?
Leo:
Thanks, but I think I've got it. I just need to review the last two units.
James:
All right, then. How about we play at the weekend instead? How about Saturday afternoon?
Leo:
Yeah, Saturday works for me. What about 3 p.m.?
James:
Perfect! I'll be online then. We can try the new racing game I told you about.
Leo:
Cool! I'm looking forward to it.
James:
Great! Good luck with your studies!
Leo:
Thanks! Talk to you later!
James:
See you soon!

The Transcript of the 'Courier Call' Digital Story

Description: The teacher creates a digital story using one of the digital story creation tools, including the following context.

Characters: Courier and Susan (Customer)

Courier:
Hello, good afternoon. Am I speaking with Ms. Susan?

Susan:
Yes, this is Susan speaking.

Courier:
Hi, I'm calling from the delivery service. I have a package for you and just wanted to confirm your address. Is it 45 Elm Street, Apartment 3B?

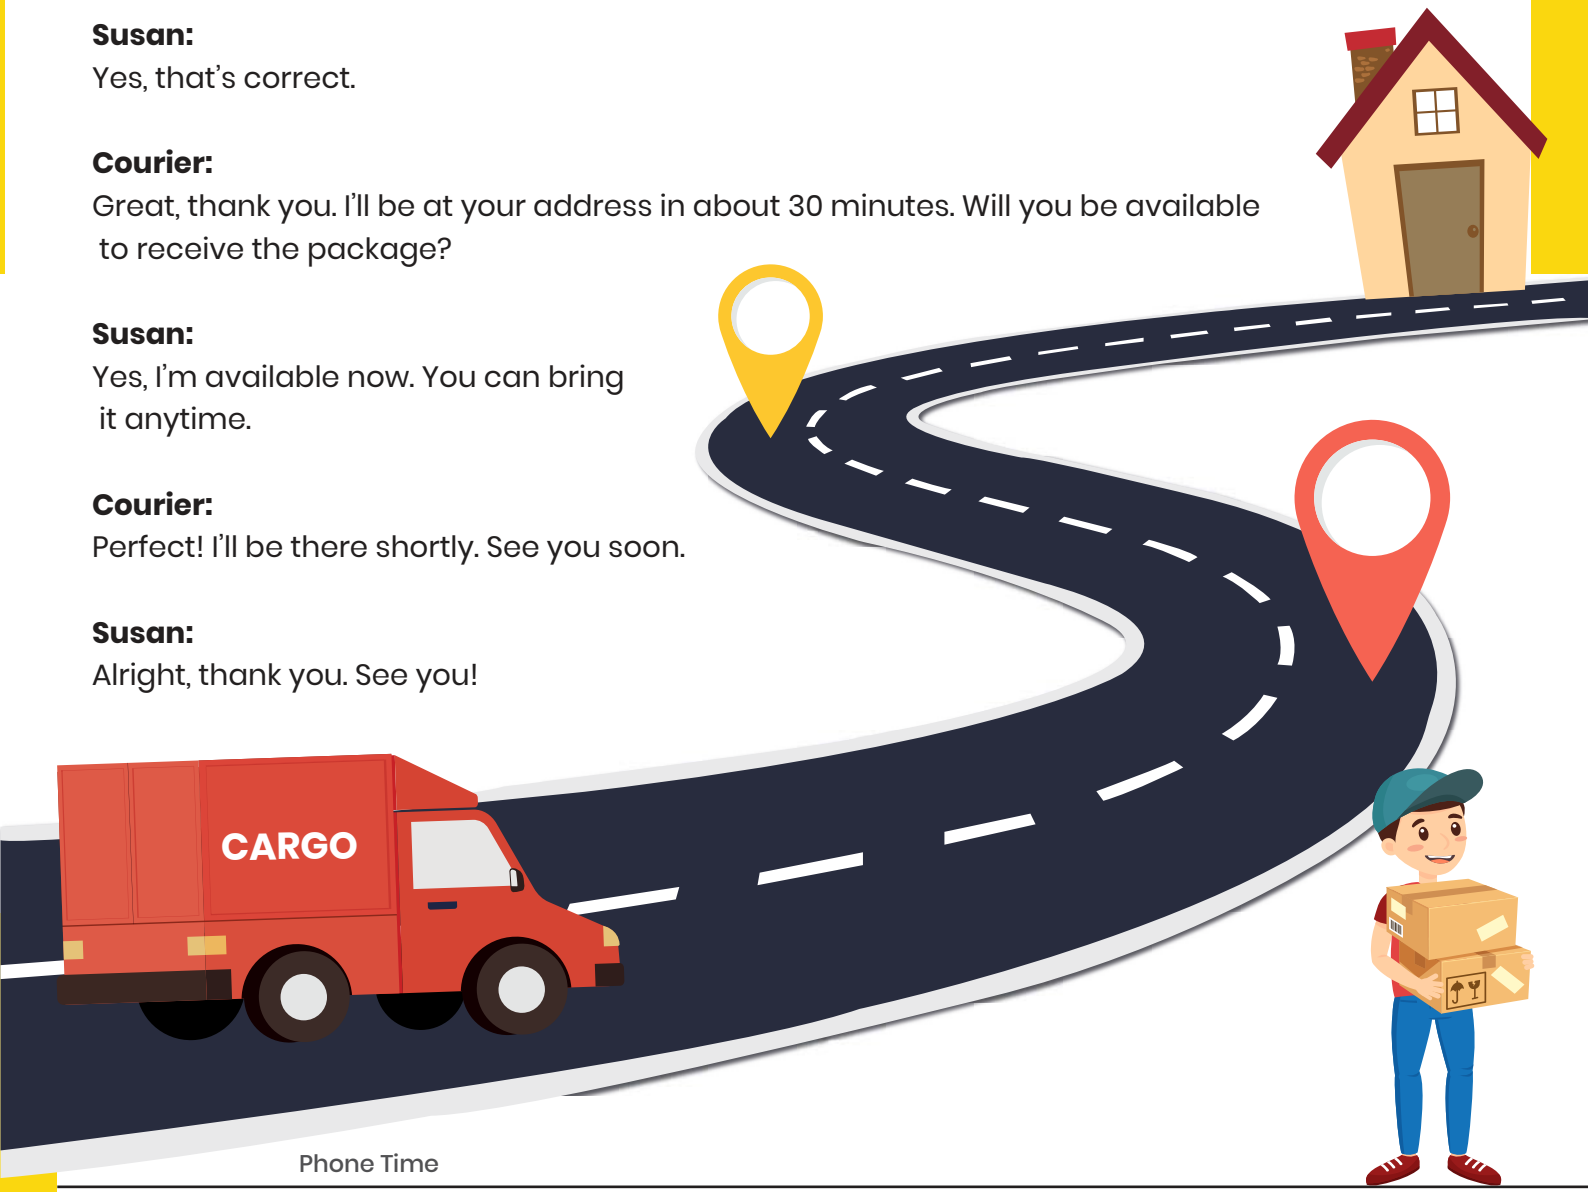

Susan:
Yes, that's correct.

Courier:
Great, thank you. I'll be at your address in about 30 minutes. Will you be available to receive the package?

Susan:
Yes, I'm available now. You can bring it anytime.

Courier:
Perfect! I'll be there shortly. See you soon.

Susan:
Alright, thank you. See you!

The Transcript of the 'Customer Service Call' Animation

Description: The teacher creates a animation using one of the animation creation tools, including the following context.

Customer Service Representative:
Good afternoon. Customer service, how can I help you today?

Mary (Customer):
Hi, I'm calling because my internet has been very slow since yesterday.

Customer Service Representative:
I'm sorry to hear that. May I have your name so I can address you properly?

Mary (Customer):
Sure, it's Mary.

Customer Service Representative:
Thank you, Mary. Could you also confirm your address and customer number, please?

Mary (Customer):
Yes. My address is 12 Rose Street, Apartment 4C, and my customer number is 3456789.

Customer Service Representative:
Thank you. I see there is a technical issue in your area. Our team is working on it, and it should be resolved within 24 hours.

Mary (Customer):
Alright. Is there anything I can do while I wait?

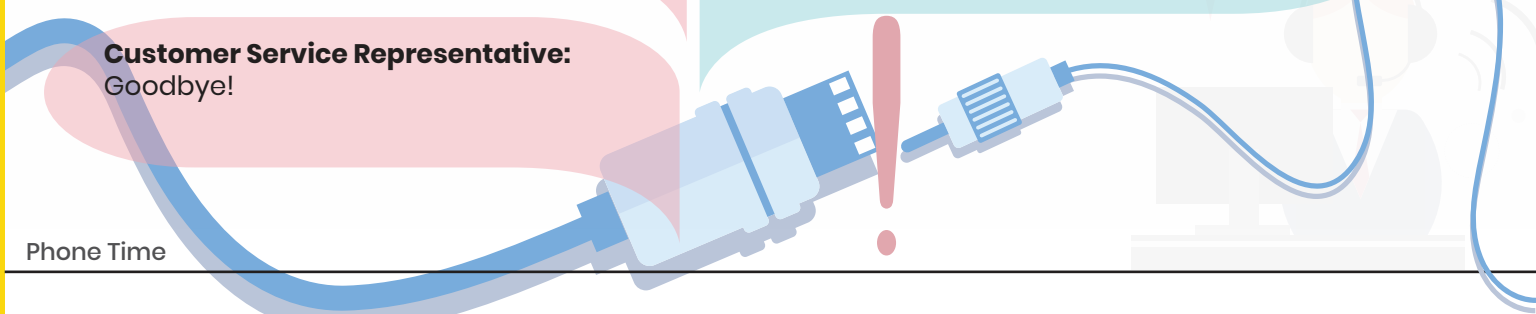

Customer Service Representative:
You could try restarting your modem. That might help in the meantime.

Mary (Customer):
Okay, I'll do that. Thank you for your help.

Customer Service Representative:
You're welcome, Mary. If you need further assistance, please don't hesitate to call us again. Have a great day!

Mary (Customer):
You too. Goodbye!

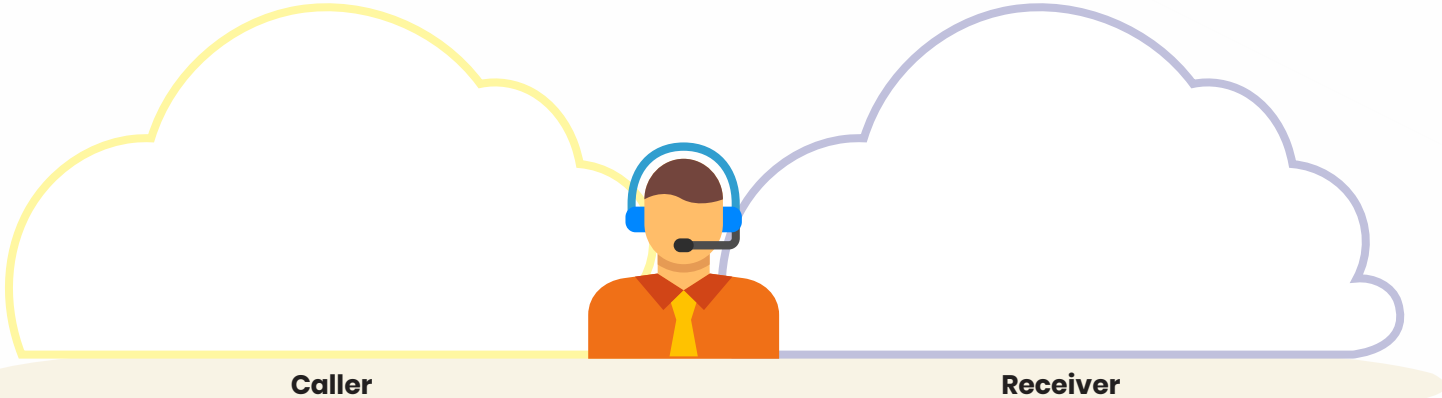

Customer Service Representative:
Goodbye!

Caller or Receiver

Read each sentence carefully. Then, write their numbers into the correct column: Caller or Receiver.

1	Hello, The Bank! How can I help you?
2	I'd like to make an appointment.
3	Just a moment. I'll connect you.
4	Could you ask her to call me back, please?
5	Hang on a minute, please.
6	May I speak to Helen, please?
7	I'm calling about my account.
8	Would you like to leave a message?
9	Can I talk to the boss, please?
10	Yes, please. I'd like to leave a message.
11	Sure. Can I have your number, please?
12	I'll let her know that you called.

Caller **Receiver**

Communication Bowling

Choose the correct answer.

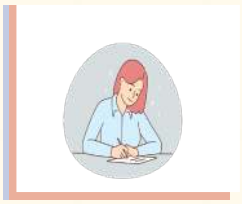

1. In ancient times, people used _____ to send messages over long distances.

A) phone call
B) smoke signal
C) video calls

2. Before phones and the internet, people used to _____ to stay in touch with each other.

A) send postcards
B) use telegraphs
C) write letters

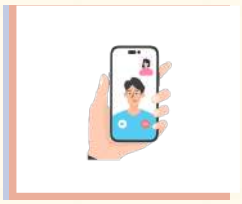

3. In ancient times, people sometimes used a _____ to deliver messages across long distances.

A)messenger bird
B) smoke signal
C)voice message

4. Today, we can see and talk to each other in real time using _____.

A) e-mails
B) messages
C) video calls

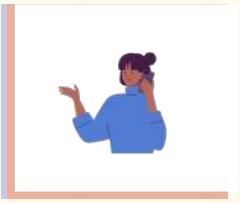

5. Instead of sending letters by post, many people now prefer to _____ because it is fast.

A) make a phone call
B) send an e-mail
C) write a letter

6. If you want to talk to someone quickly by voice, you can _____ to contact or communicate with them.

A) make a phone call
B) use smoke signals
C) write a letter

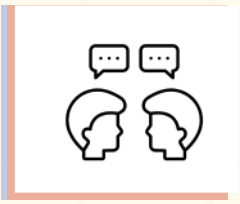

7. When you don't have time to type, you can send a _____ to share your message by spea king.

A) letter
B) postcard
C) voice message

8. The best way to talk to someone directly is _____ as it allows you to see their expressions and hear their voice.

A) face to face
B) voice message
C) telephone call

Phone Quiz

Choose the correct answer.

1. I am _____ to call my friend because I need to ask about the homework.

A) dialling the number
B) hanging up the phone
C) leaving a message
D) waiting for a response

2. My father's phone is _____ right now. I can't get in touch with him.

A) available
B) engaged
C) portable
D) wireless

3. I am going to _____ the phone after he says goodbye because our conversation is finished.

A) hang up
B) hold on
C) pick up
D) put through

4. Tom: Can you _____ for a minute, please? I will just check my calendar.

A) call back
B) hang up
C) hold on
D) pick up

5. There is a _____, so I can't hear you clearly on the phone. Can you repeat that?

A) bad line
B) internet speed
C) message
D) Wi-Fi connection

6. When she saw the manager calling, she quickly _____ the phone because she wasn't ready to talk.

A) bad line
B) hung up
C) held on
D) picked up

7. When I call customer service, they always _____me_____ to the correct department after a few minutes.

A) call/back
B) cut/off
C) put/on hold
D) put /through

8. She always _____ with her grandchildren, they live in London.

A) calls back
B) hangs up
C) keeps in touch
D) holds on

9. Tom: I need to _____ a message to Sarah about the new schedule.

A) delete
B) draw
C) receive
D) send

10. Jack: I just got a _____ from Mike. He said he'll call me later.

A) diary
B) message
C) postcard
D) ticket
