

INNOVATION AND EDUCATIONAL TECHNOLOGIES
GENERAL DIRECTORATE

WORLDWIDE EXPLORERS

Course	English	Grade	8th Grade	Duration	4 lesson hours (4x40')

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

This learning scenario incorporates a variety of digital tools to enhance the students' creativity and productivity as they design new products online. These tools also support the creation of diverse learning materials that actively engage the students and accommodate different learning preferences. The implementation of a technology-based learning approach to the scenario will facilitate vocabulary acquisition, including a video about the pros and cons of the Internet, and a travel website of a blogger. It is anticipated that the implementation of a cooperative learning approach will encourage the students to engage in collaborative work and improve their communication skills when preparing a presentation and designing a website. Furthermore, the utilisation of Fishbowl and Round Robin techniques will foster the students' critical thinking, active listening, and structured speaking skills in an engaging way. The role of the teacher is to provide guidance and observation in this process.

The teacher employs a number of different methods to assess the student progress, including true-false questions, matching activities and self-assessment form. The overarching objective of these strategies is to optimise the assessment process for the students, rendering it more engaging and enjoyable. To this end, the teacher will provide immediate feedback on all activities throughout the lessons to facilitate learning.

Key Concepts: Internet habits, Fishbowl technique, Round Robin technique

Learning Goals

Students

- Recognise the sentences and expressions about the internet.
- Discuss the pros and cons of using the internet.
- Conduct research about the components of a website.
- Enhance their communication skills.
- Integrate technology to support learning.
- Work in collaboration for creating a digital product.
- Utilise information technology in website development.

Course Objectives

- E8.5.SI1. Students will be able to talk about their Internet habits.
- E8.5.SI2. Students will be able to exchange information about the Internet.
- E8.5.R1. Students will be able to identify main ideas in short and simple texts about Internet habits.
- E8.5.R2. Students will be able to find specific information about the Internet in various texts.
- E8.5.W1. Students will be able to write a basic paragraph to describe their Internet habits.

Related Skills

- Collaboration
- Communication
- Digital skills
- Active listening
- Critical thinking
- Creativity
- Productivity
- Digital literacy

PREPARATION

Learning Approaches, Methods, Strategies

- Technology-based learning
- Cooperative learning
- Active learning
- Fishbowl technique
- Round Robin technique

Tasks

Teacher

- Produces a video about the Internet.
- Designs visuals and various activities.
- Develops a website.
- Constructs true-false questions.
- Guides the students to collaboration on website design.
- Encourages the students to take an active role in lessons.
- Utilises interactive whiteboards and other digital tools effectively.

Student

- Identifies the vocabulary related to the internet.
- Designs the missing website components.
- Discusses the pros and cons of using the internet.
- Engages actively with the lesson, following the teacher's instructions.
- Collaborates effectively with classmates on digital projects.
- Joins in the activities to gain digital competence.
- Takes responsibility for activities and assignments.

Instructional Tools / Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive whiteboard
- Tablet
- Computer

Online Tools

- eba.gov.tr
- Visual creation and editing tools
- Video editing tools
- Interactive presentation tools
- Web page editing tools
- Mind mapping tools
- Online discussion tools
- Web tools for true-false questions
- Web tools for matching activities
- Web tools for self-assessment

Instructional Materials/ Tools

- Six corners of using the Internet visuals

APPLICATION

Activities

Before the Lesson

First, the teacher prepares a visual titled Six Corners of Using the Internet using one of the visual creation and editing tools and prints it out. Then the teacher creates a video titled Pros and Cons of the Internet using one of the video editing tools (Annex-1). Finally, for the assessment, the teacher prepares Safety Rules questions using one of the web tools for true-false questions (Annex-2).

Lesson 1 (Class)

Pre-Activity

The teacher commences the lesson posing the question, "How many hours do you use the internet per day?" and subsequently invites the students to respond using their fingers. In responses where the duration of internet usage exceeds two hours, the teacher issues a warning to the students regarding the potential risks of internet addiction. Following the question, the teacher displays the Six Corners of Using Internet visual, such as doing research, doing online shopping and reading e-book on the interactive whiteboard. The teacher then divides the printed version of the visual into six sections, which are affixed to the six corners of the classroom. Subsequently, the teacher invites the students to examine the visual on the board and poses the question, "For what purpose do you use the internet most?". The students are then invited to move to the corresponding corner for their internet usage, write their names on the visual and they discuss on the purposes of using internet.

While Activity

Following the discussion, the teacher initiates the Pros and Cons of the Internet video, in which the students identify the main ideas about the advantages and disadvantages of internet usage (Annex-1). The teacher uses the video to capture the students' attention and prepare them for the subsequent activity. The students are then invited to form two circles, one inside and one outside, in order to apply the active learning approach of the Fishbowl technique. The inner circle discusses the advantages of using the internet while the outer circle observes and takes notes. After a set time, the students switch roles, allowing everyone to participate. The inner circle then discusses the disadvantages of using the internet while the outer circle observes, fostering critical thinking, active listening and structured speaking in an engaging way. The teacher provides prompt feedback throughout the activity.

Post-Activity

Following the Fishbowl activity, to assess comprehension, the teacher implements the Safety Rules questions, wherein the students are invited to meticulously peruse the provided statement and ascertain its veracity as either true or false, increasing their awareness of safe Internet use (Annex-2). The teacher conducts a class discussion with the students to establish the reasons behind the veracity of each statement.

Related Skills: Communication, Collaboration, Active listening, Critical thinking, Digital skills, Digital literacy

Lesson 2 (IT Class)

Pre-Activity

Using one of the online discussion tools, the teacher begins the lesson by using the Round Robin technique, an active learning approach. The students are required to provide swift responses to scenarios such as: "You receive a friend request from someone you don't know. What would you do?" or "Someone asks you for some personal information. What would you do?" If they are unable to formulate a response, they can write 'Pass'. Once all the scenarios have been discussed, the teacher summarises the key points about internet usage and safety to raise awareness among the students.

While Activity

The teacher then divides the class into six groups, employing the names written on the six corners of using the Internet visuals. The students who utilise the Internet for the same purpose convene to prepare a presentation using an interactive presentation tool to explain their purposes and reasons for using the Internet. The students who use the internet for the same purpose convene to prepare a presentation using an interactive presentation tool to explain their reasons for using the internet. They are required to prepare a detailed presentation and attempt to persuade their classmates of the necessity of their usage. Furthermore, they are expected to list the pros and cons of their internet usage and, if applicable, create infographics to visualise the data. The teacher emphasises that these presentations will be delivered to classmates and will offer guidance as required.

Post-Activity

The students deliver their presentations to their classmates and try to persuade them for the necessity of their internet usage and share the presentation on EBA. The other students then have the opportunity to express their approval of the presentations in the form of either likes or comments. The presentation which has the most likes or comments will be declared as the winner.

Related Skills: Communication, Collaboration, Active listening, Critical thinking, Creativity, Productivity, Digital skills, Digital literacy

Before the Lesson

The teacher creates a Travel Blog using one of the web page editing tools. The teacher prepares an activity titled Match the Definitions using one of the web tools for matching activities (Annex-3).

Lesson 3 (Class)

Pre-Activity

At the start of the lesson, the teacher poses the following questions: 'Who uses the internet the most in your family?' and 'What is it used for?' After receiving these responses, the teacher asks the students to help create a mind map on the interactive whiteboard showing the family members' general daily internet usage, using one of the mind mapping tools. Once the mind map is complete, the teacher initiates a discussion about the various purposes of internet usage. The teacher emphasises that the internet is a valuable source of information and, when used correctly, can be an effective tool for personal development. However, they also note that it can be harmful to many individuals and, without proper regulation, can lead to dangerous addiction.

While Activity

The teacher then uses the mind map to show the students the Travel Blog on the interactive whiteboard. This helps the students to understand what parts a website has. The website has pages such as travel photos page, travel podcasts page and popular touristic destinations page. The teacher then proceeds to meticulously examine the pages, informing the students that they would subsequently undertake the task of constructing the absent components of the website in the following lesson. The teacher focuses on the differences between the terms “download” and “upload” and provides illustrative examples on the website.

Post-Activity

To assess comprehension, the teacher implements the activity titled Match the Definitions, in which the students work in pairs to match internet-related words with their definitions (Annex-3).

Related Skills: Communication, Collaboration, Active listening, Digital skills, Critical thinking

Before the Lesson

The teacher makes a Checklist using one of the visual creation and editing tools (Annex-4). The teacher then prepares a Self-Assessment Form using one of the web tools for self-assessment (Annex-5).

Lesson 4 (IT Class)

Pre-Activity

The teacher displays the Checklist, which lists the various points to consider when designing a website (Annex-4). The students work in pairs in order to discuss the points on the checklist and consider any additional points to include.

While Activity

The teacher then follows the checklist to divide the students into five groups. After that, the groups are asked to build the rest of the website. The teacher provides the students with a template link to the Travel Blog Template, which serves as a model for their own contributions to the existing content. The first group is responsible for uploading travel photos, the second group is responsible for "About Me" page introducing the blogger, the third group is responsible for uploading travel vlogs, the fourth group is responsible for uploading travel podcasts and the fifth group is responsible for designing the popular destinations page. The groups may search on the net to contribute to the website, or they may use their creativity to make alternative contents for the web page. For instance, they may record their own podcast and upload it to the website, or they may use the podcasts on the net. As the lesson draws to a close, a collective product will be realised through the collaborative efforts of the entire class. The students will contribute to the collective endeavour within the larger group while concurrently engaging in smaller groups.

Post-Activity

Each group presents its contributions on the website, where peers and the teacher provide constructive feedback.

Homework/Assignment

The teacher posts the Self-Assessment Form on EBA and invites the students to evaluate their own performance in designing the website (Annex-5).

Related Skills: Communication, Collaboration, Active listening, Creativity, Productivity, Digital skills

Evaluation/Assessment Methods/Tools

- Web tools for true-false questions
- Web tools for matching activities
- Web tools for self-assessment

The Transcript of 'Pros and Cons of the Internet' Video

Description: The teacher creates a video using one of the video editing tools, where the students identify the main ideas about the advantages and disadvantages of using the Internet.

First Page: Write, "Advantages and disadvantages of using the Internet", and attach videos related to the Internet.

Second Page: Write, "Advantages of using the Internet", and attach videos related to the advantages.

Third Page: Write, "Doing research easily/Getting information easily", and attach videos related to doing research

Fourth Page: Write, "Fast way of sharing information", and attach videos related to sharing information.

Fifth Page: Write, "Reading online books", and attach videos related to reading books.

Sixth Page: Write, "Online shopping", and attach videos related to online shopping.

Seventh Page: Write, "Listening to music/Watching films", and attach videos related to listening to music/ watching films.

Eighth Page: Write, "Disadvantages of using the Internet", and attach videos related to the disadvantages.

Ninth Page: Write, "Internet addiction", and attach videos related to addiction.

Tenth Page: Write, "Cyberbullying", and attach videos related to cyberbullying.

Eleventh Page: Write, "Safety problems/Meeting strangers", attach videos related to internet safety.

Twelfth Page: Write, "Radiation causes health problems", attach the videos related to radiation.

Thirteenth Page: Write, "Break relationships", and attach the videos related to broken relationships.

Fourteenth Page: Write, "Advantages: Fast and cheap, doing research, reading e-book, online shopping, watching films/listening to music. Disadvantages: Addiction, cyberbullying, health problems, safety problems, break relationships."

Safety Rules True-False Questions

Dear students, read the provided statement and decide either it is true or false.

INTERNET SAFETY RULES	TRUE / FALSE
1. Share your password with your friends.	
2. Create a strong password.	
3. Before downloading a file, don't ask your parents.	
4. Accept unknown people's friend request.	
5. Make sure your internet connection is secure.	
6. Agree to meet your online friends.	
7. Obey the safety rules.	
8. Don't share your personal information with strangers	
9. Don't agree to chat online with strangers.	
10. Use your birth date as your password.	

Match the Definitions

Dear students, work in pairs to match the words related to the Internet with their definitions.

1. Confirm
2. Password
3. Attachment
4. Safety
5. Search engine
6. Download
7. www
8. Upload
9. Log in
10. Website
11. Username
12. E-mail
13. Log off

a) A name you use instead of your real name

b) Transferring from the Internet

c) Sites you visit on the Internet

d) A secret word you use for your accounts

e) Short form of World Wide Web

f) An electronic letter

g) A computer file that is sent together

h) Typing the username and the password to access the account

i) A computer programme that helps users to find information on the Internet

j) To say that something is true

Checklist

Dear students, here's a handy checklist to help you design your website.

Website Designing

CHECKLIST

- Define website goals and objectives.
- Identify target audience.
- Decide on website structure.
- Have an engaging and clear content.
- Choose right domain name.
- Use high quality images.
- Use essential pages (Home, About, etc.).

Self-Assessment Form

Dear students, use this form to evaluate your own performance of designing the website in your group.
