

RHYTHM OF MY FAMILY

ENGLISH | 5th GRADE | 3 LESSON HOURS (3×40') | FAMILY LIFE

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

This learning scenario aims to support the students in understanding and expressing daily routines and hobbies within familiar, family-related contexts. Throughout the lessons, the students focus on distinguishing between habitual actions and actions happening at the moment by using simple English structures. By presenting language within meaningful, real-life contexts, the students are able to connect new knowledge with their own daily experiences and actively construct meaning through observation, comparison, and reflection.

The learning process follows a technology-enhanced and student-centred approach. The matching activities help the students classify routines and actions happening at the moment, and support observation, vocabulary, and grammaring skills. The listening-based fill-in-the-blank task supports listening/watching-comprehension and vocabulary recognition. Reading-comprehension is supported through tasks in which the students relate people to short texts about routines and actions. The interactive wheel activity supports speaking-expression and vocabulary use by encouraging the students to ask and answer short questions about routines and hobbies. The video and visual presentation tasks support observation-based prediction and visual literacy. The digital sharing platform supports writing-expression, speaking-expression, communication, and digital literacy, as the students upload their work, present it, and comment on their friends' products.

In this process, the teacher acts as a facilitator by planning the lessons, guiding the students through activities, modelling target language, and providing regular formative feedback. The students take an active role by working collaboratively, sharing ideas with their peers, and producing short spoken and written responses.

Assessment is carried out throughout the lessons using formative and performance-based methods such as interactive tasks, group work, presentations, and digital sharing. The students' performance is monitored through teacher observation, focusing on criteria such as participation, use of target vocabulary and structures, and clarity of expression. Peer feedback is also encouraged to support reflection and improvement. These methods allow the teacher to monitor the student progress continuously and support learning in a structured and supportive classroom environment.

- ENG.5.4.G1. Students can select and use the target grammatical elements of the current content about "family life with family members' routines; family members' hobbies and activities" accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others. (g, i, j)
- ENG.5.4.W3. Students can organise a content for the assigned writing task on the current content "family life with family members' routines; family members' hobbies and activities" based on the model/example provided. (a, b, c)
- ENG.5.4.W4. Students can individually construct/form content for the assigned writing task on the current content "family life with family members' routines; family members' hobbies and activities". (a, b, c, d)
- ENG.5.4.S3. Students can organise a new verbal content on "family life with family members' routines; family members' hobbies and activities" by speaking accurately, efficiently, and authentically. (a, b, c, d, e)
- ENG.5.4.S4. Students can construct a new verbal content on "family life with family members' routines; family members' hobbies and activities" by speaking accurately, efficiently, and authentically. (a, b, c, d)
- ENG.5.4.S5. Students can reorganise (reconstruct) and use information about the "family life with family members' routines; family members' hobbies and activities" to communicate with other people. (a, b)

- V2. Family integrity
- V4. Friendship
- V13. Healthy living
- V16. Responsibility

Learning Approaches, Methods, Strategies

- Technology-based learning
- Collaborative learning
- Project-based learning

Tasks

Teacher

- Prepares simple digital materials such as interactive activities, visuals, and short videos related to routines and hobbies.
- Guides the students in exploring the daily routines and hobbies.
- Helps the students notice the difference between routines and actions happening now.
- Organises pair and group activities to support collaboration and active participation.
- Supports the students during activities and provides clear feedback.
- Creates an engaging learning environment that sustains the students' curiosity and motivation.

Student

- Takes an active role in digital learning activities by completing tasks and responding to questions.
- Works cooperatively with peers during pair and group activities.
- Uses simple spoken and written English to talk about routines and hobbies.
- Completes assigned tasks responsibly and on time.
- Shows interest in learning by asking simple questions and sharing ideas during the lessons.

Instructional Tools/ Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive whiteboard
- Computer

Online Tools

- eba.gov.tr
- Video editing tools
- Artificial intelligence powered tools
- Visual creation and editing tools
- Gamification web tools
- Interactive presentation tools
- Web tools for fill-in-the-blank questions
- Web tools for matching activities
- Web page editing tools

Learning Activities

Before the Lesson

The teacher designs a game titled Routine or Today? using one of the web tools for matching activities (Annex-1). Next, the teacher prepares an activity titled Who Is Doing What? using one of the web tools for fill-in-the-blank questions (Annex-2). After that, the teacher creates a video titled A Day of My Family using one of the video editing tools (Annex-3). For the assessment part, the teacher designs a website titled Let's Share Our Routines and Hobbies using one of the web page editing tools (Annex-4).

Lesson 1 (IT Class)

Pre-Activity

The teacher initiates the lesson with a warm-up activity to engage all students and create a positive classroom atmosphere for well-being. The teacher says some short sentences using gestures and facial expressions, such as "I eat breakfast." and "I am eating breakfast." The students decide whether they are

Before the Lesson

The teacher creates an activity titled Routines and Hobbies Wheel using one of the gamification web tools. Then, the teacher designs an activity titled Find the Right Person task using one of the web tools for matching activities.

Lesson 2 (Class)

Pre-Activity

The lesson starts with a warm-up game designed to engage all students and boost their motivation. The teacher says short and simple sentences related to routines and actions happening at the moment. The students stand up for routine sentences and sit down for actions happening now. The students who make a mistake are eliminated from the game. On the other hand, the last student who can perform all the actions correctly wins the game. After the game, the teacher asks simple guiding questions like “What do you do with your family?” and “What are you doing now at school?”. After this warm-up, the teacher displays the Routines and Hobbies Wheel on the interactive board and writes the question patterns “What is he/she doing?” and “What are they doing?” on the board to guide the students. The students come to the board in pairs. One student spins the wheel and asks the appropriate question and the other student answers. The teacher models correct expressions when necessary and provides immediate oral feedback.

While Activity

Following the activity, the teacher initiates the Find the Right Person i 61 i 61es and Hy00.5 he Right Personaerson 6 h

Before the Lesson

The teacher designs an activity titled Mysterious Routines and Hobbies using one of the interactive presentation tools (Annex-5). Following that, the teacher prepares an activity titled Global Routines and Hobbies Explorers using one of the visual creation and editing tools (Annex-6). For the assessment, the teacher uses the Let's Share Our Routines and Hobbies site again (Annex-4).

Lesson 3 (IT Class)

Pre-Activity

The teacher displays the Mysterious Routines and Hobbies activity and asks the students to guess what James is doing (Annex-5). After collecting the students' responses, the teacher asks follow-up questions, such as "Do families in Türkiye do this?", "Is it important for families?", "How do you feel?", and "Does your family do this activity?". The students are encouraged to answer these questions with short responses, or even single words.

While Activity

After guessing the activities and answering the questions, the teacher divides the students into groups and asks them to conduct some short research into the daily routines and hobbies of people in different countries. The teacher states that the students can use artificial intelligence powered tools to support their research

Homework/Assignment

The students are assigned to create a short video about the routines and hobbies of their family members. In the video, the students briefly describe what their family members usually do, what they are doing today or now, and what their hobbies are, using clear and simple sentences. They do not need to show anyone's face; instead, they may record related objects, places, or items that represent the routines or hobbies. After recording and editing their videos, the students upload their work to EBA to share it with their classmates. This enables them to watch each other's videos, leave comments and respond to each other's work in a supportive way.

Related Skills Framework	Information gathering, Observation-based prediction, Comparison, Reflective thinking, Listening/Watching-comprehension, Speaking-expression, Writing-expression, Grammaring: Selection and use, Vocabulary: Selection and use, Digital literacy, Cultural literacy, Communication
