

ANIMALS AND NATURE

ENGLISH | 5th GRADE | 3 LESSON HOURS (3×40') | LIFE IN NATURE

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

This technology-enhanced learning scenario is grounded in the theme of "Life in Nature" and integrates the subthemes of animals, their habitats, natural resources, and protecting nature. These components are embedded throughout the learning process through the contextualised use of target vocabulary, descriptive and comparative grammatical structures, and age-appropriate social language expressions. Gamified warm-up tasks, digital stories, and animations offer meaningful, communicative, and collaborative learning experiences that align with learners' developmental levels, interests, and needs. Through these context-rich activities, the students recognise and use language related to animals, habitats, body parts, and physical characteristics in authentic and visually supported environments.

During the lessons, the students listen to stories, explore animations, classify information, make comparisons, and express ideas using English in purposeful ways. Interactive digital tasks support listening comprehension, vocabulary development, analytical thinking, and problem-solving skills, while the teacher guides the process through the selection of digital resources, facilitation of group and individual work, and ongoing feedback. Through matching, sorting, and comparison tasks, the students develop their classification, analysis, and critical-thinking skills while making meaningful connections between animals, their physical characteristics, and their habitats. By creating digital posters and videos, sharing their ideas, and giving feedback on their classmates' work, they also strengthen their communication, cooperation, digital literacy, and visual literacy skills.

- ENG5.7. L1. Students can get ready for the listening/watching-comprehension process for the current content on “life in nature with types of animals in nature; wild animals in nature; their habitats” carefully. (a, b, c, d)
- ENG5.7. L2. Students can bring information about the current content on “life in nature with types of animals in nature; wild animals in nature; their habitats” together through significant details and main components while listening/watching it. (a, b)
- ENG5.7. L3. Students can make meaning of/derive meaning from the current content on “life in nature with types of animals in nature; wild animals in nature; their habitats” through significant details by listening/watching it carefully. (a, b, c, d, e, f, g)
- ENG5.7. P1. Students can select and use the target phonological elements of the current content about “life in nature with types of animals in nature; wild animals in nature; their habitats” accurately, authentically, and naturally through spontaneous decision-making processes and use it in an appropriate and effective way when communicating with others. (a, b, c, d, e)
- ENG5.7. R1. Students can get ready for the reading-comprehension process about the current content on “life in nature with types of animals in nature; wild animals in nature; their habitats”. (a, b, c, d)
- ENG5.7. V1. Students can select and use the target vocabulary of the current content about “life in nature with types of animals in nature; wild animals in nature; their habitats” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others. (a, b, c, d, e, f, g)
- ENG5.7. W1. Students can get ready for the writing-expression process about the current content on “life in nature with types of animals in nature; wild animals in nature; their habitats”. (a, b)

Learning Goals

Students

- Use vocabulary related to animals, habitats, and body parts to describe animals in meaningful sentences.
- Compare animals using comparative and superlative forms, and express simple opinions about animals and their habitats.
- Engage with digital tools responsibly to listen to short descriptions or digital stories and match the information with the correct images.

- V5. Sensitivity
- V9. Compassion
-

Framework for Skills

- CS3.2. Problem solving skill
- CS2.4. Analysis skill
- CS2.5. Classification skill
- FLFS1. Listening/Watching-comprehension
- FLFS2. Reading-comprehension
- FLFS3. Speaking-expression
- FLFS4. Writing-expression
- FLSS2. Vocabulary: Selection and use
- D2.5. Playfulness
- D3.10. Critical perspective
- SELS2.1. Communication skill
- SELS2.2. Cooperation skill
- LS2. Digital literacy
- LS4. Visual literacy
- LS8. Sustainability literacy

Learning Approaches, Methods, Strategies

- Inquiry-based learning
- Context-based learning
- Collaborative learning

Tasks

Teacher

- Selects appropriate digital tools.
- Gives clear instructions and models the target language.
- Guides the students during the activities.
- Organises individual and group work.
- Monitors participation and provides feedback.
- Promotes safe and responsible use of digital platforms.

Student

- Participates actively in digital activities.
- Follows instructions and completes the tasks.
- Works individually and collaboratively.
- Uses simple English to express ideas and comparisons.
- Responds to comprehension questions.
- Uses digital tools responsibly.
- Submits answers through digital platforms.

Instructional Tools/ Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive whiteboard
- Tablet
- Computer

Online Tools

- Animation creation tools
- Video editing tools
- Digital story creation tools
- Gamification web tools
- Web tools for matching activities
- Web tools for short answer questions
- Gamified measurement and evaluation web tools
- Poster and flyer creation tools

Learning Activities

Before the Lesson

The teacher designs an activity titled Guess Game using one of the gamification web tools. The teacher creates another activity titled Animals using one of the web tools for matching activities. Then, the teacher designs a video titled Wildlife Safari using one of the digital story creation tools (Annex-1). Lastly, the teacher creates an activity titled Find the Animal using one of the gamified measurement and evaluation web tools.

Lesson 1(Class)

Pre- Activity

The teacher explains the rules of the Guess Game. The students look at the picture and guess the word by taking turns saying one letter at a time. Each incorrect letter causes one petal to disappear. The activity focuses on animal vocabulary (e.g. cheetah, bird). After the activity, the teacher asks the students, "Which animal do you like the most?", etc. This warm-up task activates prior knowledge, encourages participation, and helps the students engage with the target vocabulary through a fun and motivating challenge.

While Activity

After the warm-up activity, the teacher moves on to the _____

Post-Activity

For assessment, the teacher continues with the Find the Animal game. In this game, the students listen to a short description such as "I have a big mane. I can run fast." and match it with the correct animal picture. This task assesses the students' ability to understand and identify animals based on their physical features and abilities using can and can't. The activity reinforces listening comprehension, vocabulary recall, and sentence-meaning association through an engaging and visual learning process that supports multiple learning styles.

Related Skills Framework	Analysis, Classification, Communication, Responsibility, Digital literacy, Visual literacy, Listening /Watching-comprehension, Speaking-expression

Before the Lesson

The teacher designs a word search activity titled Habitats Game using one of the gamification web tools. The teacher designs an interactive video titled Habitats, including questions, using one of the video editing tools (Annex-2). The teacher designs an activity titled Wildlife Explorer using one of the web tools for matching activities.

Lesson 2 (IT Class)

Pre-Activity

The teacher introduces the Habitats Game, an interactive word search activity. The students examine

Post- Activity

The teacher moves on to the Wildlife Explorer activity, which is a group sort task used for assessment. The teacher asks the students to drag and drop each item into its correct group. In this activity, the students are expected to place the pictures related to habitats, wild animals, and types of animals into the appropriate categories. This task helps the students reinforce their understanding through visual classification and promotes critical thinking skills by encouraging them to make meaningful connections between concepts.

Related Skills Framework	Communication, Cooperation, Analysis, Problem solving, Digital literacy, Visual literacy, Listening/Watching-comprehension, Speaking-expression, Playfulness, Classification

Before the Lesson

The teacher creates a game titled Secret Animal using one of the gamification web tools. The teacher also develops an activity titled The Jungle Olympics using one of the animation creation tools (Annex-3). The teacher designs an activity titled

Post- Activity

For assessment, the teacher continues with the Body Parts of Animals activity, where the students listen to short sentences and drag the recorder icon to the correct body parts on a labelled diagram (e.g. “This is the feather of a parrot,” “This is the fin of a dolphin”).Through this task, the students match spoken descriptions with visual body-part images, reinforcing both listening skills and vocabulary knowledge in an interactive way.

Following this activity, the teacher moves on to the Animal Name task. In this activity, the students look at two animal pictures, read short descriptive sentences, and write the correct animal’s name in the blank. This task helps the students connect written descriptions with visual clues and reinforces animal vocabulary through reading and writing practice.

Homework/Assignment

The teacher asks the students to complete an assignment called “Wild Animal Video Project”. In this task, the students prepare a short video recording about a wild animal of their choice. They describe the animal’s habitat, colour, body parts, and what it can or can’t do. For example, they can say: “This is a lion. It lives in the savannah. It has a long tail and sharp teeth. It can run fast, but it can’t climb trees.” The students should also show a picture or drawing of the animal while speaking. The video should be about 30–45 seconds long, and
