

NEIGHBOURHOOD AT A GLANCE

ENGLISH | 5th GRADE | 3 LESSON HOURS (3×40') | LIFE IN THE NEIGHBOURHOOD & CITY

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

This scenario aims to support the students' language development and 21st-century skills through interactive and technology-supported and project-based learning experiences. Throughout the scenario, the students improve their listening comprehension and vocabulary skills by engaging with digital stories supported by visuals and text. They also develop comparison and critical thinking skills by connecting what they learn to their own experiences. The students also participate in collaborative learning processes such as Think–Pair–Share activities, where they express their opinions, negotiate meaning with peers, and present shared ideas to the class, thereby strengthening their communication and social interaction skills. The teacher guides the learning process by preparing interactive materials and encouraging participation, collaboration, and reflection, while the students take an active role in the learning process. Digital and visual tools are integrated into all stages of the learning process to enhance the students' information literacy, digital literacy, and visual interpretation skills as they interact with multimedia content, complete interactive tasks, and create their own digital products such as My Dream House–Architecture Activity and Your Digital Welcome Kit. Throughout the scenario, digital and visual tools are used to enhance engagement, support understanding, and provide opportunities for practice and self-assessment which are supported through simple multiple-choice and matching activities to check the students' understanding. Feedback is given through reflection and self-evaluation, to help the students monitor their own progress. Overall, the scenario promotes communication, critical thinking, social awareness, and self-reflection through creative and student-centred learning experiences connected to real life situations.

- ENG.5.5.L2. Students can bring information about the current content on “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city; different types of houses” together through significant details and main components while listening/ watching it. (a, b)
- ENG.5.5.L3. Students can make meaning of/derive meaning from the current content on “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city; different types of houses” through significant details by listening/watching it carefully. (c, d, e, f)
- ENG.5.5.P1. Students can select and use the target phonological elements of the current content about “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city ; different types of houses” accurately, authentically, and naturally through spontaneous decision-making processes and use it in an appropriate and effective way when communicating with others . (a, c)
- ENG.5.5.V1. Students can select and use the target vocabulary of the current content about “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city; different types of houses” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others. (a, c, d, f)
- ENG.5.5.G1. Students can select and use the target grammatical elements of the current content about “life in the neighbourhood and city with places for recreation and attractions in the neighbourhood and city; different types of houses” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others. (a, b, e, f, g, h, i)
-

Learning Goals

Students

- Recognise key vocabulary and expressions related to places in a town and neighbourhood.
- Identify familiar words, visuals, and short phrases presented through songs, stories, and digital activities.
- Participate in interactive tasks that connect vocabulary to real-life situations in the city or neighbourhood.

Learning Approaches, Methods, Strategies

- Technology-enhanced learning
- Project-based learning
- Collaborative learning

- Creates and designs digital materials, such as digital stories, online quizzes, drag-and-drop vocabulary tasks, and guideline documents for homework.
- Engages the students by selecting theme-related songs, preparing guiding questions, and designing prediction, reflection, and critical thinking prompts.
- Supports vocabulary development and contextual understanding through visuals, audio, and gamified activities.
- Encourages student participation by implementing collaborative group tasks.
- Facilitates comprehension checks through web-based quizzes and self-assessment/reflection forms.
- Creates real-life connections by integrating the students' personal experiences into pre-activity discussions and lesson reflections.

Instructional Tools/ Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive whiteboard
- Tablet
- Computer

Online Tools

- Interactive presentation tools
- Web tools for matching activities
- Web tools for multiple-choice questions
- Visual creation and editing tools
- Interactive whiteboard tools
- Poster and flyer creation tools

Learning Activities

Before the Lesson

The teacher chooses a song, “Welcome to My Town”, related to the theme and the sub-theme of the unit. Then, the teacher prepares a digital story titled Exploring the City by using an interactive presentation tool (Annex-1). Also, the teacher prepares a drag and drop matching activity titled Places Vocabulary Matching by using web tools for matching activities (Annex-2).

Lesson 1 (Class)

Pre-Activity

To engage the students and activate their listening and visual memory skills related to the unit vocabulary, the teacher plays the song “Welcome to My Town” on the interactive whiteboard, so that the students can both see and hear the visuals and lyrics of the song. The teacher asks the students to identify and write down any words from the unit they hear in the song (e.g. places in the town, buildings, or landmarks). After listening, the students sing the song together with the teacher to improve their pronunciation in an enjoyable way. Then, the teacher asks the students guiding questions like, “Which place in the song would you like to

Before the Lesson

The teacher prepares guiding questions, so the students connect the lesson theme to their own experiences through these questions. Then, the teacher prepares a digital story titled My New Neighbourhood using an interactive presentation tool to present the topic (Annex-3). Afterwards, the teacher designs a follow-up activity named Discover Lisa's Place about the story, using web tools for multiple-choice questions to check the students' comprehension (Annex -4).

Lesson 2 (Class)

Pre-Activity

The teacher gives a short introduction to the students about comparatives. After the introduction, the teacher organises a short and fun warm-up activity called "Yes or No Jump". The teacher reads simple comparative sentences related to neighbourhood places. If the sentence is correct, the students jump and say "Yes". If the sentence is incorrect, they stay still and say "No". Then, the teacher says the correct sentence and the students repeat it together. This active activity helps the students revise comparative structures in an enjoyable way and supports their well-being by encouraging movement and participation.

While Activity

Before the Lesson

The teacher first prepares an activity named Rooms & Furniture Flashcards with vocabulary about rooms and furniture by using visual creation and editing tools. Then, the teacher creates a house sketch on the interactive whiteboard tools titled My Dream House-Architecture Activity for the students to use during the activity. The teacher prepares a Self-Assessment Stop and Check form using the visual creation and editing tool to help the students evaluate what they have learnt at the end of the lesson (Annex-5). For the homework the teacher also prepares a guideline named Your Digital Welcome Kit by using one of the poster and flyer creation tools to show the students what to do and what to include in their Digital Welcome Kit (Annex-6).

Lesson 3 (IT Class)

Pre-Activity

The teacher displays Rooms & Furniture Flashcards with vocabulary about rooms and furniture, such as kitchen, bedroom, sofa, bed, and fridge. The students make simple sentences using each word. This helps

Measurement and Assessment Methods/Tools

- Web tools for multiple-choice questions
- Web tools for matching activities
- Self-assessment stop and check form
