

NEXT STOP: THE FUTURE

ENGLISH | 5th GRADE | 3 LESSON HOURS (3×40') | LIFE IN THE UNIVERSE & FUTURE

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

This learning scenario focuses on responsible travel, eco-friendly behaviour, and future planning, through technology-supported activities. Using an online map, the teacher guides the students to explore different destinations. The students then reinforce vocabulary through digital flashcards and gamified quizzes and create visual products like digital posters and mini presentations. One of the lessons employs the station rotation technique with four stations (Future Plans, Matching Activities, Values Reflection, and Quick Quiz Stations), where the students rotate in small cooperative groups to complete various interactive tasks. This structure promotes engagement and collaboration. Throughout the process, the students develop communication, critical thinking, creativity, digital literacy, and problem-solving skills. The teacher prepares materials, monitors group work, and provides formative feedback, while the students actively participate in the activities. Activities help the students connect lesson content to real-life applications and strengthen positive attitudes towards responsible and sustainable behaviour. In this scenario, assessment is carried out through technology-supported tools such as web-based fill-in-the-blank questions and matching activities, gamified online assessment tools, and reflective journals, enabling the teacher to monitor students' learning progress.

Learning Outcomes and Process Components

ENG.5.8.V1. Students can select and use the target vocabulary of the current content about "life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays" accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others. (c, e, f, g)

ENG.5.8.G1. Students can select and use the target grammatical elements of the current content about "life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays" accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others. (f, g, h, i, j)

ENG.5.8.S3. Students can organise a new verbal content on "life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays" by speaking accurately, efficiently, and authentically. (c, d, e)

ENG.5.8.S4. Students can construct a new verbal content on "life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays" by speaking accurately, efficiently, and authentically. (a, b, c, d)

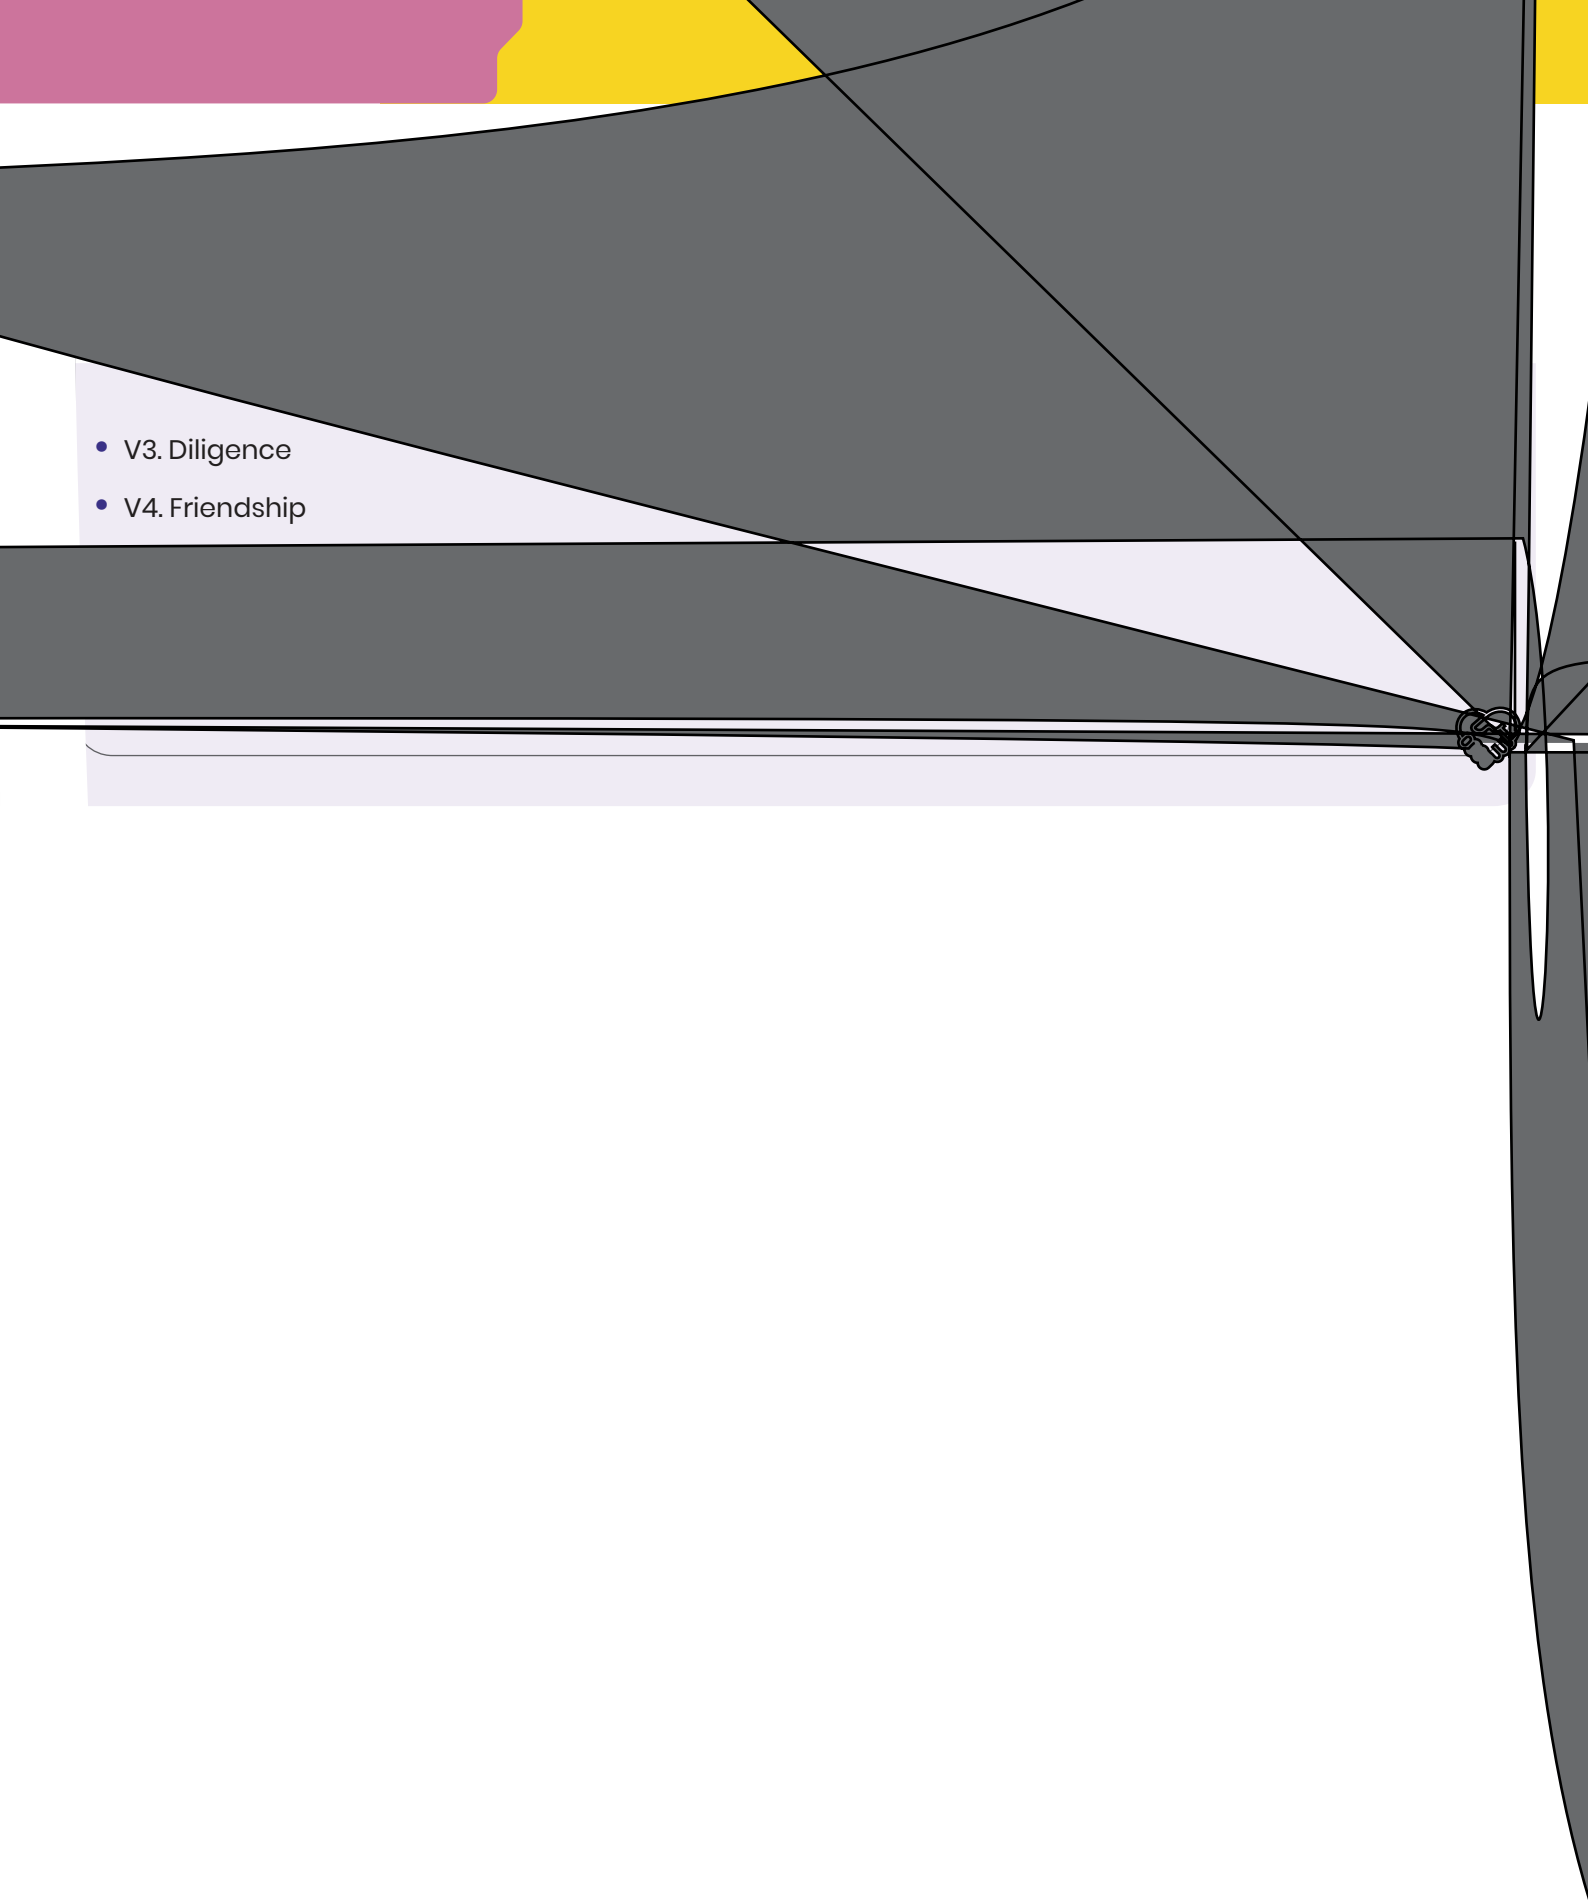

ENG.5.8.S6. Students can convey their knowledge, experiences, thoughts, and feelings related to the speaking-expression process about the current content, “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” to communicate with other people in relation to themselves or others, both individually and/or with others. (a, b)

ENG.5.8.W3. Students can organise a content for the assigned writing task on the current content “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” based on the model/example provided. (a, b, c)

ENG.5.8.W4. Students can individually construct/form content for the assigned writing task on the current content “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays”. (a, b, c, d)

ENG.5.8.W6. Students can reflect on their knowledge, experiences, thoughts, and feelings related to the writing-expression process about the current content, “life in the universe and future with planet Earth; holidays; school holidays, places, activities, and plans for holidays” in relation to themselves or others, both individually and/or with others. (a, b, c)

- V3. Diligence
- V4. Friendship

Learning Approaches, Methods, Strategies

- Technology-enhanced learning
- Project-based learning
- Station rotation technique

Tasks

Teacher

- Designs and creates all digital materials and resources needed for each lesson, including games, flashcards, interactive maps, and visual presentation tools.
- Monitors student engagement during activities, provides guidance, feedback, and support for collaboration, language use and creativity.
- Encourages sharing of ideas and promotes positive values such as responsibility and respect for nature.
- Ensures smooth execution of digital stations (for station rotation activities), including timing, instructions, and technical readiness.

Student

- Works collaboratively in small groups to complete activities such as, presentations, or matching tasks.
- Shares responsibilities within groups.

Instructional Tools/ Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive white board
- Computers

Online Tools

- eba.gov.tr
- Online map application
- Interactive presentation tool
- Visual creation and editing tools
- Web tools for fill-in-the-blank questions
- Web tools for matching activities
- Gamified measurement and evaluation web tools
- Gamification web tools
- Tools for creating digital boards or sticky notes

Learning Activities

Before the Lesson

The teacher prepares several digital resources to increase student motivation and support active participation. First, the teacher initiates the lesson by launching an online map application on the interactive board and selects fascinating locations, such as the Grand Canyon, Cappadocia, and the Alps Mountains, to explore during the lesson. The teacher also prepares a presentation titled Where to Go Next? using an interactive presentation tool with visuals related to the vocabulary of the lesson.

Lesson 1 (Class)

Pre-Activity

At the beginning of the lesson, the teacher displays the online map application on the interactive board. Together, the class explores our planet by zooming into fascinating places such as the Grand Canyon, Cappadocia, and the Alps Mountains. The teacher asks guiding questions: “What can you see here?”, “Which place would you like to visit?”, and “Why do you think this place is important to protect?”.

While Activity

Before the Lesson

The teacher designs several digital flashcards titled Word Voyage, using a visual creation and editing tool, with key vocabulary items such as island, desert, coral reef, beach, national park, and holiday. In the next step, the teacher prepares four stations using the station rotation technique, ensuring each station has a specific activity. Future Plans Station is created using one of the web tools for fill-in-the-blank questions (Annex-1). Matching Activities Station and Values Reflection Station are created using web tools for matching activities (Annex-2). Quick Quiz Station is created using one of the gamified measurement and evaluation web tools (Annex-3). The teacher also plans timing for each station (5 minutes) and prepares instructions for smooth rotation.

Lesson 2 (IT Class)

Pre-Activity

The teacher displays the Word Voyage

Post-Activity

After completing all stations, each group briefly shares what they did and learnt, while the teacher asks short questions to reinforce learning, such as: "Which activity did you enjoy the most?", "Which new word will you remember and use next?", or "Can you explain one task your group found interesting?". This encourages reflection on station activities and allows the students to verbalise their learning.

Related Skills Framework	Grammaring: Selection and use, Digital literacy, Cooperation, Adaptability, Analysis, Critical thinking, Speaking-expression

Before the Lesson

The teacher designs a gamified, puzzle-like vocabulary game, Destination Decoder, using one of the gamification web tools. The teacher creates a Reflective Journal Guideline for writing reflective journals,

Post-Activity

Each group presents their digital brochure or mini presentation to the class using the interactive board, briefly highlighting their future plans and promises as a responsible traveller. After all presentations, the teacher leads a class reflection by asking questions such as "What did you enjoy most while creating your brochure?", "How can we be responsible travellers in real life?", and "Which value did you practice the most today?". The students upload their digital brochures or presentations to the shared digital board, Future Travel Projects. The teacher explains the homework and shares the Reflective Journal Guideline on EBA, as the students are assigned to write a reflective journal (Annex-4).

Homework/Assignment

The students write a short, reflective paragraph consisting of five to six sentences. In their writing, the students are expected to express what they have learnt about being responsible travellers, protecting the environment, and showing positive values such as respect, kindness, and responsibility. They should also

Dear students, please read each sentence carefully and place its letter under the value it represents.

a) Waiting in line for a ride at the amusement park.

b) Washing hands before eating at a picnic area.

c) Recycling bottles and cans during holiday.

d) Waiting for your friend when he or she walks slowly during a tour.

e) Picking up trash on the beach to keep it clean.

f) Sharing travel snacks with friends.

g) Turning off the lights and air conditioning when leaving the hotel room.

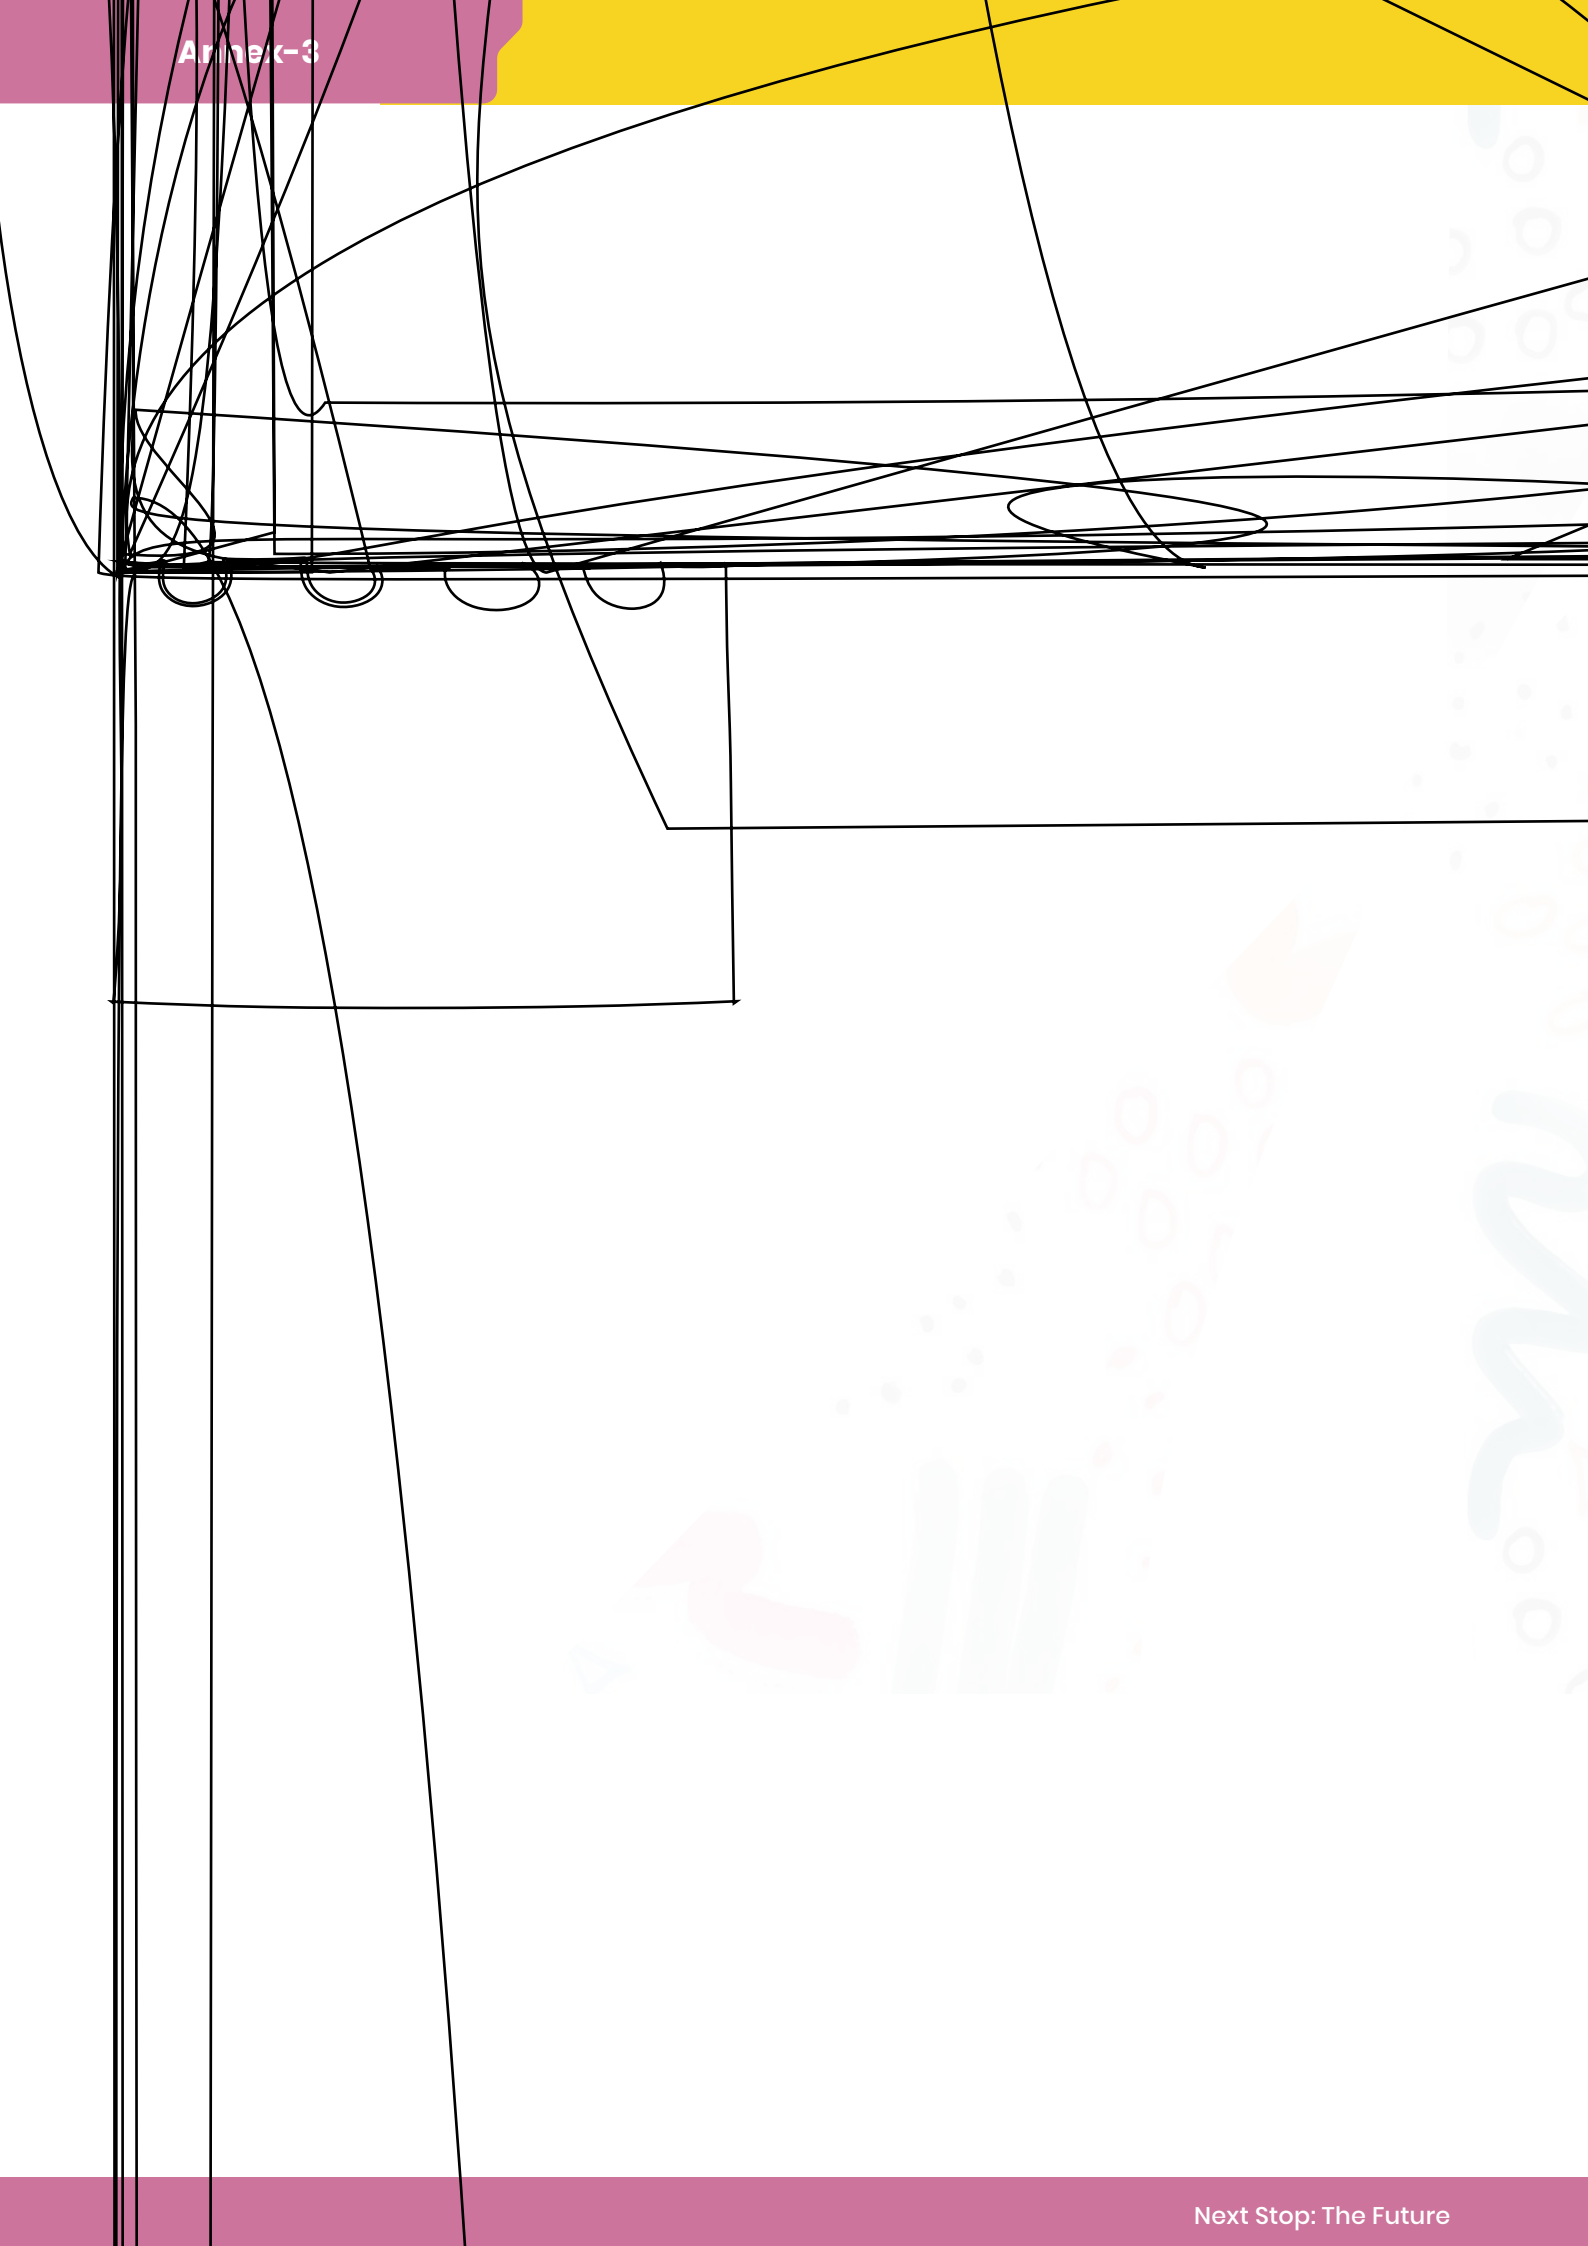

h) Waiting your turn to take photos at a popular sightseeing spot.
