

EAT HEALTHY, STAY HEALTHY

ENGLISH | 5th GRADE | 3 LESSON HOURS (3×40') | LIFE IN THE WORLD

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

This learning scenario fosters an effective learning environment by supporting students in identifying food-related events, ordering in a restaurant, and giving recipes using basic target-language structures. Through interactive, gamified, and digital activities, the scenario strives to improve the students' vocabulary, listening skills, and oral communication confidence. Integrating digital tools, technology-enhanced learning, and gamification strategies fosters active student engagement, motivating them to create a video in a restaurant on the roles of waiter, waitress and customer. Applying cooperative learning and gamification strategies results in an energetic, enjoyable, and motivating learning setting that aligns well with the needs of teenage students. Within this framework, the teacher assumes the role of a facilitator by offering structured guidance, explicit instructions, and timely feedback. The students actively engage in their learning process by collaborating with peers and using key language functions related to food events and ordering in a restaurant.

The learning process incorporates assessment through interactive features, including educational games, matching exercises, and creative tools like reflective journals. These formative methods support learner independence by motivating students to own their learning. These assessment methods aim to transform evaluation into a more engaging and student-centred experience. To this end, the teacher supplies continuous, immediate feedback to reinforce students' progress and deepen their grasp of the material.

- ENG.5.6.L3. Students can make meaning of/derive meaning from the current content on “life in the world with basic food types; ordering in a restaurant; food events in the city” through significant details by listening/watching it carefully. (a, b, c, d, e, f, g)
- ENG.5.6.P1. Students can select and use the target phonological elements of the current content about “life in the world with basic food types; ordering in a restaurant; food events in the city” accurately, authentically, and naturally through spontaneous decision-making processes and use it in an appropriate and effective way when communicating with others. (a, b, c, d)
- ENG.5.6.R2. Students can bring information about the current content on “life in the world with basic food types; ordering in a restaurant; food events in the city” through skimming (looking quickly at) the audio-visual elements and reading the content very quickly. (a, b)
- ENG.5.6.R3. Students can make meaning of / derive meaning from the current content about “life in the world with basic food types; ordering in a restaurant; food events in the city” by reading it carefully. (a, b, c, d, e, f)
- ENG.5.6.V1. Students can select and use the target vocabulary of the current content about “life in the world with basic food types; ordering in a restaurant; food events in the city” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communicating with others. (b, c, e, f)
- ENG.5.6.G1. Students can select and use the target grammatical elements of the current content about “life in the world with basic food types; ordering in a restaurant; food events in the city” accurately, authentically, spontaneously, and naturally and use it appropriately and effectively when communica-

Learning Goals

Students

- Identify language structures related to food events and ordering in a restaurant.
- Develop and improve their ability to communicate effectively.
- Acquire the skills needed to maintain a healthy lifestyle.
- Make use of digital resources to create a video in a restaurant that will strengthen and enrich the teaching and learning process.
- Collaborate effectively to develop a healthy recipe on a digital platform.

Learning Approaches, Methods, Strategies

- Technology-based learning
- Cooperative learning
- Gamification

Tasks

Teacher

- Creates and designs digital materials such as presentations, visuals and videos.
- Encourages the students to collaborate in the creation of a video in a restaurant, on the roles of waiter/waitress and customer.
- Fosters active student participation by means of collaborative group learning activities.
- Provides ongoing support and constructive feedback to promote student growth.
- Maintains the students' sense of curiosity and eag to exp nd learn.

Student

- Engages proactively in digital learning tasks and gr
- Displays effective cooperation abilities in digita sed group wo
- Displays a sense of responsibility in doing assig work and joining ing tasks, including actin out the dialogues.
- Demonstrates enthusiasm during reation o o about waitress c stomer n a restaurant.

Eat Healthy, Stay Healthy

Instructional Tools/ Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive whiteboard
- Tablet
- Computer

Online Tools

- eba.gov.tr
- Visual creation and editing tools
- Tools for creating digital boards or sticky notes
- Video editing tools
- Interactive presentation tools
- Web tools for matching activities
- Gamified measurement and evaluation web tools.
- Web tools for instant feedback
- Artificial intelligence powered tools

Learning Activities

Before the Lesson

The teacher creates a game named Tap and Say using one of the gamified measurement and evaluation web tools. Then the teacher prepares a video titled Healthy Eating Day using one of the video editing tools (Annex-1). Lastly, for the assessment, the teacher designs an activity named Question Set using one of the web tools for instant feedback (Annex-2).

Lesson 1(Class)

Pre- Activity

The teacher initiates the Tap and Say activity on the interactive whiteboard, where the students come to the board in pairs, tap each box to open, and say the corresponding name for the visuals, such as beef, beans, and soup. As a consequence of this activity, the students recognise the target words related to the main components of the current content with the help of the visual and written elements.

While Activity

Following the vocabulary activation stage, the teacher transitions to the Healthy Eating Day video, wherein the students recognise the clauses/sentences containing the target grammatical chunks in different contexts (Annex-1). The teacher asks questions about the eating habits of the students and the relationship between the eating habits and health. Then, the teacher requires the students to watch and listen to the video content by paying attention to the target phonological aspects, including pronunciation and intonation of

Before the Lesson

The teacher creates a game named Spin and Ask using one of the gamified measurement and evaluation web tools.

Lesson 2 (IT Class)

Pre- Activity

The teacher shares the Spin and Ask activity with the students. In this task, the students work in pairs. One student spins the wheel and orders the food shown in the visual, while the other student responds appropriately as a waiter/waitress. The teacher writes an example dialogue on the board for the activity and encourages the students to use the target vocabulary spontaneously and apply the target grammatical chunks, such as “Can I have...?”, “Would you like...?” and “Here you are.”

While Activity

Following the vocabulary and grammatical chunks activation stage, the students are invited to work in groups of four to create a video in a restaurant, using one of the video editing tools. In this task, the students take on the roles of waiter/waitress and customer and collaboratively design a restaurant menu including both traditional Turkish meals and various meals from various cuisines. The customers are required to order food using the target grammatical chunks, such as “Can I have some soup?” or “I’d like some salad, please.” The waiters/waitresses are expected to describe the ingredients of the dishes and give brief information

Before the Lesson

The teacher creates an activity named Match the Pairs using one of the web tools for matching activities. Then, the teacher crafts a presentation titled Healthy Recipes for Children using one of the interactive presentation tools (Annex-3). The teacher designs a digital board named Share Your Recipes using one of the tools for creating digital boards or sticky notes. Lastly, for assessment, the teacher prepares an activity named Exit Card using one of the visual creation and editing tools (Annex-4).

Lesson 3 (IT Class)

Pre- Activity

The teacher initiates the lesson asking questions such as, “Do you help your parents in the kitchen?”, “Can you cook?”, “Can you tell the steps of a recipe?” and “Do you enjoy trying different kinds of food?” to engage the students’ attention. Then, the teacher says, “Let’s revise some phrases we use to tell the steps of a recipe.” and shares the Match the Pairs activity with the students. In this task, the students work in pairs to match the audios with the corresponding visuals, such as mixing the ingredients and cutting the onion. This task aims to help the students recognise significant horizontal/vertical/spiral relationships within the generally

Homework/Assignment

The teacher shares the Exit Card as an assignment and requests the students to fill in the exit card and post it on the Share Your Recipes digital board (Annex-4).

Related Skills Framework	Data-based prediction, Reflective thinking, Critical thinking, Listening/ Watching-comprehension, Reading-comprehension Speaking-expression, Writing-expression, Grammaring: Selection and use, Vocabulary: Selection and use, Reasoning, Creativity, Communication, Cooperation, Digital literacy

Measurement and Assessment Methods/Tools

- Web tools for matching activities
- Gamified measurement and evaluation web tools
- Web tools for instant feedback
- Exit card
