

INNOVATION AND EDUCATIONAL TECHNOLOGIES
GENERAL DIRECTORATE

A DAY IN MY LIFE

Course	English	Grade	5th Grade	Duration	3 lesson hours (3x40')

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

This learning scenario uses digital tools to enhance the students' creativity and productivity when designing new products on the web. A variety of digital tools are utilised to develop diverse learning materials, to actively engage the students in the learning process and to accommodate different learning styles. The integration of a technology-based learning approach within this educational scenario is expected to facilitate vocabulary acquisition, as evidenced by the incorporation of a video depicting a boy's daily routine. The implementation of the Jigsaw technique, a cooperative learning approach, is expected to encourage the students to engage in collaborative work and to enhance their communication skills when searching for the relationship between the basic routines and success. Furthermore, the utilisation of the jigsaw technique and game-based approach in creating an animation will foster the students' critical thinking, active listening, and structured speaking skills in an engaging way. The teacher's role is to provide guidance and observe the process.

A variety of methods will be employed to assess the student progress, including EBA exercises, games and the KWL chart. The overarching objective of these strategies is to enhance the assessment process for the students, rendering it more engaging and enjoyable. To this end, the teacher will provide immediate feedback on all activities throughout the lesson to facilitate learning.

Key Concepts: Daily routines, Game-based approach, Jigsaw technique

Learning Goals

Students

- Recognise the sentences and expressions about the daily routines.
- Discuss the relationship between the routines and success.
- Enhance their communication skills.
- Employ technology to enhance learning.
- Work in collaboration for creating a digital product.
- Use information technology in the creation of an animation.

Course Objectives

- E5.4.L1. Students will be able to understand specific information in short, oral texts about daily routines.
- E5.4.S1. Students will be able to talk about daily routines.
- E5.4.S2. Students will be able to use simple utterances to talk about the daily routines of friends and family members.
- E5.4.S3. Students will be able to tell the time and numbers from 1 to 100.
- E5.4.R1. Students will be able to understand short and simple written texts about daily routines.
- E5.3.R1. Students will be able to follow a simple story with visual aids.

Related Skills

- Collaboration
- Communication
- Digital skills
- Active listening
- Critical thinking
- Creativity
- Productivity
- Cultural awareness
- Digital literacy

PREPARATION

Learning Approaches, Methods, Strategies

- Technology-based learning
- Cooperative learning
- Game-based learning
- Jigsaw technique

Tasks

Teacher

- Produces a video illustrating daily routines.
- Prepares visuals and engaging learning materials.
- Designs a digital board.
- Develops a matching game.
- Guides the students to work in collaboration for creating an animation.
- Encourages the students to take an active role in the lesson.
- Utilises interactive whiteboards and other digital tools effectively.

Student

- Identifies the vocabulary related to daily routines.
- Creates an animation and acts it out.
- Engages actively with the lesson, following the teacher instructions.
- Collaborates effectively with classmates in digital projects.
- Joins in the activities to gain digital competence.
- Takes responsibility in activities and assignments.

Instructional Tools / Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive whiteboard
- Tablet
- Printer

Online Tools

- eba.gov.tr
- Visual creation and editing tools
- Video editing tools
- Game-based measurement and evaluation web tools
- Online discussion tools
- Artificial intelligence powered tools
- Tools for creating digital boards or post-its

APPLICATION

Activities

Before the Lesson

The teacher asks the students to complete the Vocabulary Exercise 1: My Daily Routine on EBA. In this activity, the students match words related to routines with the images representing those routines. The teacher then designs a KWL Chart using one of the visual creation and editing tools and prints it out. Next, the teacher creates a video titled Tom's Routines using one of the video editing tools (Annex-1). Finally, for the assessment, the teacher prepares a game named Catch the Routine using one of the game-based measurement and evaluation web tools.

Lesson 1 (Class)

Pre-Activity

The teacher begins the lesson by asking the students what their favourite routine is and then invites them to consider the importance of routines in their lives. They ask the students to pay close attention to the relationship between routines and success. After this discussion, the teacher displays the KWL Chart on the interactive whiteboard. They then distribute copies of the chart and ask the students to pair up with a nearby classmate, focusing exclusively on the 'K' and 'W' sections and completing these parts of the chart.

While Activity

Following the sequence outlined in the chart, the teacher proceeds to the video titled Tom's Routines, in which the students identify simple written texts about daily routines (Annex-1). The teacher uses the video as an introductory resource to prepare the students for the subsequent discussion and capture their attention. The students are then invited to work in pairs and discuss the following questions: 'What time do you get up?', 'What do you do after school?', and 'What are your evening routines?'. They then compare Tom's routines with their own to identify similarities and differences. This activity aims to cultivate critical thinking, active listening and structured speaking in a captivating manner. The teacher provides ongoing feedback to support the students' engagement and progress throughout the activity.

Post-Activity

Following the activity, to assess vocabulary acquisition, the teacher implements the Catch the Routine game, wherein the students match the visuals with the corresponding daily routines. Finally, the students are asked to work in pairs, focusing on the 'L' segment of the chart. They are then required to complete and evaluate the chart, reflecting on what they have learnt.

Related Skills: Communication, Collaboration, Active listening, Critical thinking, Cultural awareness

Before the Lesson

The teacher asks the students to complete the Reading Exercise: A Friend from Turkey on EBA. For this activity, the students read the text and answer the multiple-choice questions. Meanwhile, the teacher searches for videos depicting the daily routines of successful individuals in science or sports. Then the teacher creates a visual titled Tips for Success using one of the visual creation and editing tools before printing it out.

Lesson 2 (IT Class)

Pre-Activity

The teacher uses a short video presentation to illustrate the daily routine of a well-known scientist or a successful athlete to the students. The students are then tasked with identifying the common elements in the routines of successful individuals.

While Activity

The teacher presents the visual aid titled Tips for Success, which will be used in the jigsaw technique of the cooperative learning approach. The students are then assigned numbers from 1 to 5, which are used to form groups. The students then convene in groups, discuss the relationship between the routines and success and focus on the titles such as sleeping time, eating habits, and free time activities for a short time. Subsequently, the students with identical numbers are grouped into an 'expert group', tasked with investigating and deliberating the significance of the assigned titles in the context of success. The teacher informs the students that the research findings would be utilised in the creation of an animation during the subsequent lesson. The expert groups may utilise artificial intelligence-powered tools or chatbots to conduct more in-depth searches, and they are also expected to take notes. The teacher provides ongoing feedback to facilitate the students' engagement and progress throughout the activity.

Post-Activity

Once they have completed their assigned task, the expert groups will return to their home groups. Each student is expected to share their findings, ensuring that all group members are exposed to every topic and developing their critical thinking skills. Afterwards, there will be a discussion about the important role that these skills and routines play in the personal development of successful individuals.

Related Skills: Communication, Collaboration, Critical thinking, Digital skills, Digital literacy, Cultural awareness

Before the Lesson

The teacher creates a digital board titled Use Your Imagination, using one of the tools for creating digital boards or post-its.

Lesson 3 (IT Class)

Pre-Activity

The students continue to work in the same groups as in the previous lesson. The teacher uses an online discussion tool and starts the lesson by posing the following questions: 'If you have a chance, who do you want to be for one day?' and 'Why?'. After collecting the students' responses, the teacher tells them that they will play a game titled Mimicry Play Scenario: 'A Day in Another's Shoes'. The teacher applies the game-based learning approach, in which the students create the animation of a daily routine and act it out. This strategy is designed to enhance the students' imagination, collaboration, communication and creativity.

While Activity

The teacher shares the Use Your Imagination digital board link and invites the students to select a character, either real or imaginary. Working together, the students are tasked with creating an avatar to represent their chosen character, as well as an animation to illustrate a typical day in the life of that character, using one of the animation creation tools. They can also voice their animations by narrating or performing dialogue for their characters. Each group member must take responsibility for a specific aspect of the animation, as they will be tasked with enacting it. For example, one student could be assigned the role of the teacher or the character's mother. The animation could depict a typical day at school, work or home. The students share the animation links on the digital board. The teacher provides ongoing feedback to engage and support the students throughout the activity.

Post-Activity

The students watch animations and comment on their friends' work, sharing their opinions. Once all the animations have been discussed, the teacher summarises the key points about the relationship between routines and success, raising the students' awareness in the process.

Homework/Assignment

The students are tasked with performing their animation script, recording it, and sharing the recording on the digital board. Each student is expected either to provide a positive comment on their peers' work, or to offer suggestions.

Related Skills: Communication, Collaboration, Active listening, Creativity, Productivity, Digital skills, Critical thinking

Evaluation/Assessment Methods/Tools

- EBA + vocabulary exercise
- EBA + reading exercise
- Game-based measurement and evaluation web tools
- KWL chart

Annex-1: The Transcript of 'Tom's Routines' Video

The Transcript of 'Tom's Routines' Video

Description: The teacher creates a video using one of the video editing tools, where the students identify phrases related to daily routines.

First Page: Write, "A Day in Tom's Life".

Second Page: Write, "Tom gets up at seven o'clock." and attach videos of him getting up.

Third Page: Write, "Tom washes his hands and face." and attach videos of him washing hands and face.

Fourth Page: Write, "Tom brushes his teeth.", and attach videos of him brushing teeth.

Fifth Page: Write, "Tom has breakfast at half past seven." and attach the videos of him having breakfast.

Sixth Page: Write, "Tom gets ready for school at eight o'clock." and attach the videos of him getting ready.

Seventh Page: Write, "Tom gets on the school bus.", and attach videos of a school bus.

Eighth Page: Write, "Tom arrives at school at half past eight." and attach videos of a classroom.

Ninth Page: Write, "Tom has classes from half past eight to half past twelve." and attach videos of a classroom and students.

Tenth Page: Write, "Tom has lunch at half past twelve." and attach the videos of him having lunch.

Eleventh Page: Write, "Tom leaves school at half past three." and attach the videos of students leaving the school.

Twelfth Page: Write, "Tom plays football with his friends after school." and attach videos of them playing football.

Thirteenth Page: Write, "Tom rides his bike after school.", and attach videos of him riding bike.

Fourteenth Page: Write, "Tom does his homework before dinner." and attach videos of him doing homework.

Fifteenth Page: Write, "Tom has dinner with his family at seven o'clock." and attach videos of a family having dinner.

Sixteenth Page: Write, "Tom reads a book after dinner." and attach videos of him reading a book.

Seventeenth Page: Write, "Tom goes to bed at half past nine." and attach videos of a sleeping boy.
