

INNOVATION AND EDUCATIONAL TECHNOLOGIES
GENERAL DIRECTORATE

LET'S GO: EXPLORE THE CITY

Course	English	Grade	5th Grade	Duration	3 lesson hours (3x40')

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

The following learning scenario has been designed with the intention of enhancing the students' comprehension of buildings and locations through the utilisation of interactive, technology-based activities. These activities capture the students' interest and facilitate their understanding of the subject matter, enabling them to conceptualise and contextualise spatial concepts in a tangible manner. To achieve this, the scenario strategically incorporates a selection of digital tools to promote immersive learning, critical thinking, and ongoing assessment. Poster and flyer creation tools and animation creation tools foster creative expression and engagement, while web tools for matching activities are employed to assess the students' learning and monitor their progress.Throughout the activities, the students will cultivate essential competencies such as communication, collaboration, and digital proficiency. The activities encourage critical thinking as the students analyse information about their surroundings. Additionally, the incorporation of games and interactive exercises aligns with a learner-centred approach, prompting the students to assume an active role in their learning. This scenario also incorporates cooperative learning, storytelling, and technology-based learning, enriching the overall educational experience.

Key Concepts: Buildings, Prepositions, Locations

Learning Goals

Students

- Talk about the locations of things and people in simple conversations.
- Analyse and match sounds with corresponding buildings.
- Take part in kinaesthetic activities that enhance understanding of prepositions through practical application.
- Utilise digital tools to interact with animated stories.
- Apply understanding of locations through interactive games.

Course Objectives

- E5.2.S1. Students will be able to talk about the locations of things and people in simple conversations.
- E5.2.S2. Students will be able to give directions in a simple way.
- E5.2.L1. Students will be able to understand simple directions to get from one place to another.
- E5.2.R1. Students will be able to understand information about important places.

Related Skills

- Collaboration
- Critical thinking
- Digital skills
- Communication
- Creativity

PREPARATION

Learning Approaches, Methods, Strategies

- Cooperative learning
- Storytelling
- Technology-based learning
- Gamification

Tasks

Teacher

- Guides the students through activities, providing support and encouragement.
- Engages the students by using animated stories and digital tools to enhance learning.
- Prepares lesson materials and activities that align with learning objectives.
- Evaluates student performance and provides constructive feedback on activities and assignment.
- Promotes collaboration amongst the students during group activities and discussions.
- Presents vocabulary and prepositional phrases, ensuring understanding through interactive methods.

Student

- Engages actively through discussions, games, digital tools, and technology.
- Works effectively with peers in group tasks.
- Asks questions to clarify understanding and participates in discussions about locations.
- Develops video assignments demonstrating the use of prepositions in real-life situations.
- Listens to instructions and audio clips to complete matching and comprehension tasks.
- Applies critical thinking skills to analyse and interprets information during interactive activities.

Instructional Tools/ Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive whiteboard
- Computer

Online Tools

- eba.gov.tr
- Poster and flyer creation tools
- Animation creation tools
- Gamification web tools
- Web tools for matching activities

Instructional Materials

- A small toy rabbit
- Slips of paper for the Chinese whisper game

APPLICATION

Activities

Before the Lesson

The teacher prepares a number of slips of paper, each bearing the name of a building, such as a post office, pharmacy, bakery, museum, shopping mall, library, and toy store, for use in the Chinese whisper game. The teacher also prepares an Exploring Italy with Anna activity using an animation creation tool (Annex 1). Following the animation, the teacher prepares a Building Match-Up using one of the web tools for matching activity (Annex-2). For the last activity, the teacher uses a gamification web tool to create a Guess the Place! activity (Annex-3).

Lesson 1 (Class)

Pre-Activity

To initiate the activity, the teacher organises the students into small, diverse groups of five to six to foster peer support and collaboration. The teacher then introduces the "Chinese Whispers", a game that lets the students practise vocabulary related to buildings. One student from each team is invited to the front to read a slip with a building name on it. The phrase is then passed along in a whisper from one group member to the next until the final participant reveals what they have heard. This game enhances listening skills, reinforces vocabulary, and fosters teamwork.

While Activity

Following the game, the students participate in the Exploring Italy with Anna activity, where they watch an engaging animation featuring buildings in the city (Annex-1). As they follow along, they identify prepositions (e.g. "The bank is next to the post office.") and name of the buildings. This interactive experience enhances their comprehension skills related to buildings and prepositions.

Following the animation, in the Building Match-Up activity, the students listen to the audio files and match them with the corresponding pictures of buildings, reinforcing their understanding of the sounds associated with various places (Annex-2).

Post-Activity

Following the previous activity, the students engage in the Guess the Place! activity where they look at a picture and guess the place depicted by stating letters (Annex-3). This prompts them to examine the image closely. Both activities integrate a visual matching component to enhance the learning process, ensuring an enjoyable and effective experience for the students as they expand their vocabulary and comprehension of buildings and locations.

Related Skills: Collaboration, Communication, Digital skills, Critical thinking, Creativity

Before the Lesson

The teacher designs The Ball of Max activity using an animation creation tool (Annex-4). Then the teacher prepares a Let's Match the Prepositions activity using a web tool for matching activities (Annex-5).

Lesson 2 (IT Class)

Pre-Activity

The teacher introduces the "Simon Says" game, the students engage in a fun and active way to learn prepositions. The teacher provides clear and encouraging instructions for the students to follow such as "Simon says put your pencil on your desk.", "Simon says place your notebook under your chair." or "Simon says hold your book next to your backpack." When the teacher doesn't say "Simon says..." the students must remain still. This interactive game encourages movement and helps students understand locations through simple actions, making the lesson both enjoyable and educational.

While Activity

After the game, the teacher introduces an animated story titled The Ball of Max (Annex-4). In this activity, the students are required to read and engage with the story, which revolves around Max and his ball. The animation visually introduces key prepositions such as "in", "on" ,"under", and "next to" through engaging scenes, helping the students grasp these concepts in a fun and interactive way.

Following the animated story, the students participate in the Let's Match the Prepositions activity (Annex-5). In this activity, the students are required to listen to audio clips that describe different prepositions and match them with the corresponding pictures. The interactive format reinforces their understanding of prepositions by connecting spoken language with visual cues. This activity promotes listening comprehension and awareness of locations, making it an engaging and effective way to practice prepositions.

Post-Activity

After completing the matching activity, the students transition to create a "Prepositions Poster" with a digital poster and flyer creation tool. Working in groups, they design posters featuring images and sentences (e.g. "The toy is under the chair.") based on a theme of their choice. This activity allows the students to creatively showcase their understanding of prepositions and practice using them in context. Then they present their posters to the class, reinforcing their understanding of prepositions while fostering creativity, teamwork, and digital skills.

Related Skills: Communication, Digital skills, Collaboration, Creativity

Before the Lesson

The teacher asks the students to complete Vocabulary Exercise 1: My Town from EBA prior to the lesson. The teacher prepares a Where Is Bunny? animation using an animation creation tool (Annex-6). Following this, the teacher creates a Where Is the Bird? interactive activity with a web tool for matching activities (Annex-7). The final activity, Place It Right! also created with a web tool for matching activities, involves additional matching exercises (Annex-8). Additionally, the teacher assigns a Daily Reflection Paper created using a poster and flyer creation tool, for the students to complete as homework (Annex-9).

Lesson 3 (Class)

Pre-Activity

The teacher brings a small toy rabbit to engage the students in an interactive learning activity focused on practicing prepositions through a hide-and-seek game. The teacher hides the rabbit in various locations around the classroom, such as under a chair or behind a desk, etc. The students take turns asking yes/no questions to determine the rabbit's location. The student who successfully finds the rabbit gets the chance to hide it in the next round. This activity not only reinforces prepositional vocabulary but also encourages collaboration and active participation amongst the students.

While Activity

After the game, the teacher presents the Where Is Bunny? animation, featuring the character Bunny, to engage the students in a storytelling activity (Annex-6). During the animation, the teacher encourages the students to read along, enhancing their comprehension and vocabulary. This activity smoothly transitions from the previous game, reinforcing the use of prepositions in a fun and interactive way. Together, these activities encourage active participation and critical thinking, while deepening the students' understanding of the story's themes. After reading the story, the teacher guides the students to the Where Is the Bird? interactive activity, where they examine pictures and click on circles to mark their answers (Annex-7). The students are required to choose the correct preposition that corresponds to the images. This interactive element creates a dynamic learning experience, enhancing comprehension and encouraging active participation.

Post-Activity

After completing the interactive activity, the teacher moves on to the final task. In the Place It Right! activity, the students are required to examine the image and drag the appropriate preposition into the correct position (Annex-8). This serves as a practical assessment of their understanding, reinforces the prepositions in an engaging and interactive way, and informs the teacher about their progress.

Homework/Assignment

The teacher assigns the Daily Reflection Paper, in which the students reflect on their feelings about the lesson, identify the activity they found most challenging and explain why, and share which activity they enjoyed the most and why (Annex-9). They are also encouraged to consider what they would like to do in the next lesson. The teacher then provides commentary and feedback. As a follow-up assignment, the students are expected to demonstrate their understanding of prepositions by creatively illustrating real-life situations using a toy, short film, or animation that includes at least five prepositions.

Related Skills: Critical thinking, Digital skills, Communication, Collaboration

Evaluation/Assessment Methods/Tools

- EBA + vocabulary exercise
- Web tools for matching activities
- Daily reflection paper

Where Is the Bird?

Description: The teacher creates a matching activity using one of the web tools for matching activities, where the students examine pictures and click on circles to mark their answers.

The image contains a grid of eight squares, each showing a blue bird in different positions around a yellow box or a table. Each square has a circle above it and a mark placed in it.

1. The bird is in the box.
2. The bird is next to the box.
3. The bird is behind the box.
4. The bird is in front of the box.
5. The bird is between the boxes.
6. The bird is on the box.
7. The bird is under the table.
8. The bird is near the box.

Place It Right!

Look at the pictures and match them with the correct prepositions.
