GENERAL DIRECTORATE

INTERACTIVE PET SHELTER

Course	English	Grade	5th Grade	Duration	3 lesson hours (3x40')

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

This learning scenario aims to help the students describe ongoing actions, ask for permission, and apply language in real-world contexts. Through gamification, storytelling, and cooperative learning, the students will expand their vocabulary, improve speaking and listening skills, and enhance their digital literacy. The learning scenario also fosters critical thinking, creativity, and collaboration. The students will understand and describe what people and animals are doing at the moment through interactive and digital activities. Key activities include matching exercises, digital stories, and interactive assessments, all designed to improve the students' language and digital skills.

The teacher acts as a facilitator, guiding the students through structured activities, providing clear instructions, and offering feedback. Interactive elements such as digital stories, quizzes, and matching activities engage the students while reinforcing language structures. The students actively participate by collaborating in group tasks, using digital tools, and creating their own digital posters. Assessment is conducted through interactive exercises and presentations, ensuring meaningful learning and progress evaluation.

Key Concepts: Animals, Asking for permission, Describing actions

Learning Goals

Students

- Identify and comprehend descriptions of what people and animals are doing at the moment.
- Read and interpret short and simple texts about ongoing actions.
- Participate in dialogues to describe real-time activities.
- Use target vocabulary and phrases to talk about what is happening at the moment.
- Make simple inquiries related to animals and their care.
- Recognise and use key vocabulary related to animals and their actions.
- Use time expressions (now, right now, at the moment) to describe ongoing actions.
- Engage in dynamic, interactive activities crafted with innovative digital tools.

Course Objectives

- E5.9.L1. Students will be able to understand descriptions of what people/animals are doing at the moment.
- E5.9.S1. Students will be able to talk about what people/animals are doing at the moment.
- E5.9.S2. Students will be able to ask for permission.
- E5.9.S3. Students will be able to use simple utterances to describe what other people are doing at the moment.
- E5.9.R1. Students will be able to understand short and simple texts about what people/animals are doing at the moment.

Related Skills

- Collaboration
- Critical thinking
- Creativity
- Communication
- Digital skills

PREPARATION

Learning Approaches, Methods, Strategies

- Active learning
- Cooperative learning
- Gamification
- Storytelling
- Technology-based learning
- Fishbowl technique

Tasks

Teacher

- Prepares all necessary materials and digital tools prior to the lesson.
- Integrates interactive elements such as digital stories, quizzes, and games to enhance student engagement.
- Provides clear instructions and guidance throughout the activities.
- Supports the students in developing vocabulary and practicing language structures related to asking for permission and describing actions.
- Encourages active participation and real-world language application.
- Assesses student progress and provides constructive feedback.

Student

- Participates in group activities, actively collaborating and sharing ideas.
- Engages with digital tools for quizzes, storytelling, and interactive exercises.
- Practices asking for permission (e.g. Can I feed the birds?).
- Describes ongoing actions (e.g. The vet is examining the rabbit.).
- Communicates effectively with peers and the teacher.

Instructional Tools/ Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive whiteboard

Online Tools

- eba.gov.tr
- Web tools for matching activities
- Web tools for true-false questions
- Web tools for multiple-choice questions
- Gamification web tools
- Digital story creation tools
- Gamified measurement and evaluation web tools

APPLICATION

Activities

Before the Lesson

The students are required to complete Vocabulary Exercise 1: The Animal Shelter on EBA. This exercise involves matching various animal-related vocabulary items with their corresponding visual representations, allowing the students to enhance their lexical knowledge and strengthen word-image associations. The teacher prepares a Double Animals exercise using one of the gamification web tools. The teacher designs an Animals activity using web tools for matching exercises, as well as a Zoo Snapshots digital story using one of the digital story creation tools (Annex-1). The teacher creates a True or False Challenge exercise for the digital story using one of the web tools for true-false questions.

Lesson 1 (Class)

Pre-Activity

The teacher integrates the Double Animals exercise as a warm-up exercise, requiring the students to promptly identify the repeated animal. After the exercise, the teacher asks the students: "What is your favourite animal?" to encourage engagement and spoken interaction.

While Activity

Following the gamification activity, the teacher introduces the Animals activity. In this task, the students listen to audio clips and match each spoken word (e.g. cat, fox,) with the corresponding image. After the matching activity, the teacher proceeds with the digital story Zoo Snapshots, which narrates the observations captured by a wildlife photographer's camera (Annex-1). Through the story, the students listen to the names of animals, their offspring, and the actions in which they are engaged. To enhance speaking skills, the teacher pauses the video at key moments to ask the students questions about previous scenes, encouraging them to recall and describe what they have seen. At the end of the story, the students engage in a pair-work activity where they take turns asking and answering questions about the events and characters in the video, reinforcing their comprehension and speaking practice.

Post-Activity

For the assessment, the teacher transitions to the True or False Challenge exercise. The teacher informs the students with the following instructions: "Items will fly by at a fast speed. See how many you can get right before time runs out." When the students identify a statement as false, the teacher challenges the students to correct it by asking follow-up questions such as, "If the duck is not jumping, what is it doing?", fostering deeper thinking and speaking practice.

Related Skills: Critical Thinking, Digital Skills, Communication, Collaboration

Before the Lesson

The teacher designs a game titled What's Behind? and a Listen and Match activity using one of the gamified measurement and evaluation web tools. The teacher prepares a Mother and Baby Animals activity using web tools for matching exercises. Additionally, the teacher creates an Animals and Their Babies digital story using one of the digital story creation tools (Annex-2).

Lesson 2 (Class)

Pre-Activity

As a warm-up activity, the teacher informs the students that they will play the game titled What's Behind?. The students drag the cursor over the screen to reveal the hidden image. This activity helps engage the students and activates prior knowledge.

While Activity

After the gamification activity, the teacher proceeds with the Mother and Baby Animals activity. In this activity, the students match mother animals with their corresponding baby animals. For example, cat–kitten, dog-puppy, etc. After completing the matching activity, the teacher continues with the story Animals and Their Babies, in which the students introduce the offspring of various animals (Annex-2). To foster collaboration, communication, and interaction amongst the students while emphasising speaking skills, the teacher organises a group activity after watching the video. The students discuss and exchange ideas about the offspring of other animals in small groups. To enhance engagement, the teacher can integrate the Fishbowl technique, where a central chair is placed in a circle, and the students take turns stepping in to share their thoughts before rejoining the circle.

Post-Activity

For the assessment, the teacher continues with the Listen and Match exercise. The students are required to listen to the sentences and match them with the corresponding images. The activity continues until all answers are matched.

Related Skills: Critical Thinking, Digital Skills, Communication, Collaboration

Before the Lesson

The teacher designs a Guess the Animal game using one of the gamification web tools. The teacher prepares a People at the Moment exercise using one of the web tools for matching activities. The teacher creates an Animals Quiz using one of the web tools for multiple-choice questions (Annex-3).

Lesson 3 (IT Class)

Pre-Activity

The teacher informs the students that they will engage in the Guess the Animal game as a warm-up activity. The students are tasked with dragging and placing letters into the correct positions to unscramble the word or phrase.

While Activity

The teacher transitions to the People at the Moment exercise, where the students are required to drag each description under the correct picture and click on them to zoom in. After completing the exercise, the teacher asks the students to work in pairs to create a poster about a fictional character and describe the work they are doing at that moment, similar to the activity. Each poster should include at least three sentences. Once the groups have finished, they present their posters, and their classmates provide feedback.

Post-Activity

As part of the assessment, the teacher conducts the Animals Quiz where the students have to choose the correct answer (Annex-3).

Homework/Assignment

The teacher assigns the students to prepare posters about animals. Each student will introduce at least two animals on their poster, including information about their names, what they eat, and any interesting facts. The students can use digital tools or create their posters by hand with drawings and colours. This assignment encourages creativity and personal expression while helping the students develop their research and writing skills. It also reinforces vocabulary and knowledge about animals in an engaging way.

Related Skills: Creativity, Collaboration, Digital skills, Communication, Critical thinking

Evaluation/Assessment Methods/Tools

- EBA + vocabulary exercise
- Web tools for multiple-choice questions
- Web tools for matching activities
- Web tools for true-false questions
- Gamified measurement and evaluation web tools

Animals and Their Babies

Description: The teacher designs a digital story using one of the digital story creation tools.

Page 1

Teacher's Introduction

Good morning, everybody! Today, we learn about farm animals and their babies. Each student presents one animal using digital pictures.

Page 2

Student's presentation (Displays a picture of a cat and a kitten.)

This is a cat. This is a kitten. The kitten is small and cute. It is playing with its mother.

Page 3

Student's Presentation (Displays a picture of a dog and a puppy.)

This is a dog. This is a puppy. The puppy is sleeping.

Page 4

Student's Presentation (Displays a picture of a duck and a duckling.)

This is a duck. These are ducklings. The ducklings are swimming in the pond.

Page 5

Student's Presentation (Displays a picture of a sheep and a lamb.)

This is a sheep. This is a lamb. The lamb is jumping in the field.

Page 6

Student's Presentation (Presents a picture of a hen and a chick.)

This is a hen. This is a chick. The chick is small and yellow.

Page 7

Teacher's Conclusion

Well-done, everyone! Your presentations are perfect! Thank you for your great work.

Animals Quiz

Read the following questions and choose the correct answer.

1. Oh, look at this lovely kitten.

A) It is eating.
B) It is drinking.
C) It is running.
D) It is sleeping.

2. Which one is a kitten?

A) 
B) 
C) 
D) 

3. Which one is a puppy?

A) 
B) 
C) 
D) 

4. Dad: _____.
Son: Of course, we can.

A) Where are they?
B) I have got a cat.
C) Can we adopt this cat?
D) What is the cat doing?

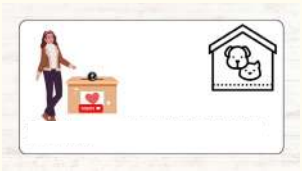

5. Look at that cat! It is _____.
It's very cute.

A) climbing
B) drinking
C) eating
D) sleeping

6. My mother _____ some money for the animal shelter at the moment.

A) is eating
B) is donating
C) is running
D) is swimming

7. Alex is in the chicken house now.
He _____ the eggs.

A) is climbing
B) is collecting
C) is drinking
D) is running

8. The ducks are in the lake.
They _____now.

A) are eating
B) are drinking
C) are swimming
D) are walking

9. Lily is in the garden.
She _____ flowers now.

A) is drinking
B) is eating
C) is sleeping
D) is watering

10. How many puppies are there?

A) five
B) seven
C) six
D) ten

Answer Key

Annex-3

1. D

2. D

3. C

4. C

5. A

6. B

7. B

8. C

9. D

10. A
