MYSTERIOUS FUTURE!

Course	English	Grade	7th Grade	Duration	4 lesson hours (4x40')

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

This learning scenario cultivates both linguistic proficiency and a capacity for prospective reasoning. The students interact with a range of media formats, investigating potential career trajectories and participating in collaborative creative endeavors. Employing a combination of EBA exercises, mind mapping techniques, gamified learning activities, and both peer and self-assessment strategies, learners cultivate crucial competencies, including critical analysis and effective communication skills. The teacher's role is paramount in facilitating this process, offering constructive feedback, and establishing a nurturing and conducive learning atmosphere. This scenario is ultimately designed to empower the students to formulate a vision of their future, establish realistic objectives, and implement proactive measures to realise those ambitions.

Learning Goals

Students

- Make sentences with future tense.
- Utilise technology efficiently.
- Act out their dreams.
- Identify the basic vocabulary related to future plans.

Course Objectives

- E7.7.L1. Students will be able to understand utterances about in simple oral texts.
- E7.7.SI1. Students will be able to talk about simple predictions.
- E7.7.SP1. Students will be able to report on simple predictions.
- E7.7.R1. Students will be able to understand short and simple texts about predictions.
- E7.7.W1. Students will be able to write pieces about predictions and future events.

Related Skills

- Communication
- Creativity
- Collaboration
- Digital skills

PREPARATION

Learning Approaches, Methods, Strategies

- Active learning
- Cooperative learning

Tasks

Teacher

- Creates an active learning environment.
- Guides the students during activities.
- Utilises technology effectively with innovative pedagogy.
- Encourages the students to take responsibility.

Student

- Takes an active role in group work.
- Acquires the target outcomes determined in the individual and peer learning process.
- Engages in learning activities such as reading, writing, and discussing.
- Utilises technology effectively in innovative ways.

Instructional Tools/ Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive whiteboard

Online Tools

- eba.gov.tr
- Digital story creation tools
- Mind mapping tools
- Web tools for instant feedback
- Tools for creating digital boards or post-its
- Interactive presentation tools

Instructional Materials

- A crystal ball

APPLICATION

Activities

Before the Lesson

The teacher prepares a Me in the Future presentation using one of the interactive presentation tools (Annex-1).

Lesson 1 (IT Class)

Pre-Activity

The teacher initiates a collaborative mind mapping activity by sharing a mind mapping tool with the class. Centred around the theme of "DREAMS," the students are invited to contribute their future aspirations to a shared digital canvas. This interactive exercise fosters collective visioning and creates a dynamic visual representation of the class's hopes and ambitions.

While Activity

The activity commences with a collective reflection on the shared dream mind map, stimulating discussion and goal-oriented thinking. The teacher introduces the core topic, future plans, through targeted questioning. A comprehensive Me in the Future presentation follows, illuminating diverse career paths and life options with illustrative dialogues. To solidify understanding and encourage active participation, the students engage in pair or small group discussions, responding to teacher prepared questions related to the presented content (Annex-1).

Post-Activity

The students collaborate in pairs to construct imaginative dialogues set in the future. They will work together to create characters, settings, and plausible future scenarios. The dialogues should incorporate a variety of future tense structures and vocabulary. Once completed, pairs can practice their dialogues and get ready to present them to the class in the next lesson.

Related Skills: Communication, Creativity, Collaboration, Digital skills

Before the Lesson

The students are asked to complete Vocabulary Exercise 1: Dreams and Vocabulary Exercise 2: Dreams to enhance learning before the lesson. The teacher prepares a peer assessment form and informs the students that they will evaluate each other's presentations (Annex-2).

Lesson 2 (IT Class)

Pre-Activity

The students collaborate in pairs, imagining themselves as journalists in the future. The task involves creating captivating headlines that forecast potential developments or breakthroughs. Whether they focus on groundbreaking scientific discoveries, or astonishing technological advancements, the students are challenged to use vivid language and future tense verbs to create engaging and imaginative news headlines.

While Activity

The lesson commences with a review of a sample future predictions presentation, setting the stage for collaborative learning. The students are then paired to revisit their previously created dialogues, which serve as the foundation for their presentations. Utilising one of the interactive presentation tools, pairs construct visual and textual presentations. Following the presentations, the students engage in a peer evaluation process, providing constructive feedback on content, organization, and language use.

Post-Activity

Following the project presentations, the students undertake a self-devised quiz to assess their learning. Subsequently, the group engages in a discussion analysing the various concepts and linguistic choices employed in the presentations. Peer feedback on individual work is also provided (Annex-2).

Homework/Assignment

To enhance the students' reading and listening comprehension, the teacher assigns Reading Exercise: Dreams and Listening Exercise: Dreams on EBA.

Related Skills: Creativity, Collaboration, Communication, Digital skills

Before the Lesson

The teacher wants the students to view Dreams on EBA before the lesson. The teacher prepares questions using one of the web tools for instant feedback.

Lesson 3 (IT Class)

Pre-Activity

The teacher brings a crystal ball into the classroom and puts this crystal ball on the table. The teacher assumes the role of a fortune teller, gazing into a crystal ball to predict the future. To enhance student engagement, the teacher invites several students to participate, crafting imaginative predictions about their future based on the crystal ball's supposed insights. These sentences can be structured in this way: "You will run your own business.", "You will probably receive a scholarship to a good university.", "You will move abroad.", etc.

While Activity

The teacher wants the students to create a digital story by one of the digital story creation tools. The students will work in groups to complete this activity. The teacher introduces the digital story creation tool on the interactive whiteboard. The students are instructed to write down story scripts in order to express their predictions about the world in the year 2100. They should use their imaginations and think about possible advancements in technology, science, environment, and society.

Post-Activity

Once they have finished writing their predictions, the teacher initiates a class discussion on the students' future aspirations. To encourage dynamic interaction, the students are tasked with articulating their goals utilising web tools for instant feedback. This exercise promotes immediate feedback and peer engagement as the students share their visions. The teacher serves as a facilitator, fostering thoughtful dialogue and reflection on the students' plans and projections. They can collect all their stories about the future and put them in a time capsule then bury it in the school yard to uncover in 2050 altogether.

Related Skills: Communication, Creativity, Digital skills

Before the Lesson

The teacher tells the students that at the end of the lesson, they will be assessed on their participation (Annex-3).

Lesson 4 (IT Class)

Pre-Activity

The students are divided into teams and presented with a list of future-related terms. One student from each team then acts out a chosen term, while the rest of the team attempts to decipher the meaning. The first team to correctly guess the word or phrase earns a point. This dynamic game format not only reinforces future tense vocabulary but also enhances the students' listening and observation skills, creating a lively and interactive learning experience.

While Activity

The teacher begins with a class discussion about dreams and aspirations. The teacher poses questions as following: "What are your dreams for the future?", "Why are dreams important?", etc. Then the teacher writes the students' answers on the board. The teacher briefly reviews the future tense rules using "will" and provides examples on the board: "I will become a doctor.", "I will travel abroad.", "I will meet a famous person.", etc. The teacher shares a few sentences and a short paragraph about own dreams using the future tense: "In the future, I will write a book. I will travel to many countries and learn about different cultures. I will help people with my stories and inspire them to follow their dreams." Then the teacher wants the students to write a paragraph about their own dreams. The teacher gives writing prompts the students to start their paragraphs. For instance, "In the future, I will...", "I will achieve my dreams by...", etc. The students write their paragraphs individually, using the future tense.

Post-Activity

After writing their paragraphs about dreams, the teacher introduces one of the tools for creating digital boards or post-its to the class, explaining its functions. The teacher creates a link where the students can post their paragraphs. The students then type their paragraphs into the tool, allowing them to read each other's dreams.

Following this independent reading phase, a few students are selected to read their paragraphs aloud to the class. This sparks a discussion about shared dreams, with a focus on providing positive feedback. To further encourage interaction, the students are paired up to exchange their paragraphs and offer feedback to each other. The teacher emphasises the importance of checking for the correct use of the future tense during this peer review process.

At the end of the lesson, the teacher implements a student assessment form to evaluate the students (Annex-3). According to the students' answers, the teacher provides feedback.

Homework/Assignment

The teacher instructs the students to compose a letter addressed to their future selves, articulating their aspirations and outlining their plans for achieving them, employing future tense verb forms.

Related Skills: Creativity, Communication, Collaboration, Digital skills

Evaluation/Assessment Methods/Tools

- EBA + listening exercise
- EBA + reading exercise
- EBA + vocabulary exercises
- Gamified measurement and evaluation
- Web tools for instant feedback
- Peer assessment form
- Student assessment form

Presentation Script and Comprehension Questions and Answers

Description: The teacher can use the script below to prepare a presentation by one of the interactive presentation tools.

Presentation Script

Ali: Ayşe, where will you live in the future?

Ayşe: I will live in my hometown, Adana. What about you, Ali? Where will you live in the future?

Ali: I will live abroad. What do you expect from the future for yourself, Ayşe?

Ayşe: I will be a doctor. Because I like helping people. What about you?

Ali: I will be an engineer in Germany. What are your predictions about technology?

Ayşe: I think, AI will become highly personalised, understanding individual needs and preferences.

Comprehension Questions

1.Who will live abroad in the future?

Correct Answer: Ali will live abroad in the future.

2.What will Ayşe do in the future?

Correct Answer: She will be a doctor.

3.Will Ali be a dentist?

Correct Answer: No, he won't. He will be an engineer.

Peer Assessment Form

This form has been designed to assist you in evaluating your peer's performance throughout the course of your group work. For each criterion, you should select the degree that best reflects your peer's performance.

Peer's Name/Surname:

CRITERIA	DEGREES		
	Sufficient	**Good**	**Excellent**
Collaboration: Working together in a team setting.			
Responsibility: Completing assigned task on time.			
Time Management: Using the time effectively and efficiently to complete the presentation.			
Originality: Offering unique and innovative ideas.			
Relevance: Supporting the presentation's main points.			

Student Assessment Form

This form has been designed to evaluate the students during the lesson. For each criterion, the teacher selects the grade that best reflects your performance on a scale of 1 to 5.

Name/Surname: **Topic:**

CRITERIA	DEGREES				
	Improvable (1)	**Acceptable (2)**	**Sufficient (3)**	**Good (4)**	**Excellent (5)**
Grammar and Syntax: Has the student demonstrated consistent and accurate use of future tense verb forms throughout their written work?					
Fluency and Pronunciation: To what extent has the student articulated their ideas with clarity and					
Creativity and Expression: To what extent has the student demonstrated creativity in articulating their aspirations?					
Participation and Engagement: To what extent has the student actively engaged in class discussions and activities?					
Comprehension Questions: To what extent has the student effectively addressed follow-up questions?
