GENERAL DIRECTORATE

REAL OR DREAM?

Course	English	Grade	7th Grade	Duration	4 lesson hours (4x40')

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Learning Goals

Students

- Share their aspirations.
- Discuss and write their expectations and predictions for the future.
- Speculate about future possibilities.
- Ask questions about future events.
- Exchange their ideas on the future of the world.

Course Objectives

- E7.7.L1. Students will be able to understand utterances about predictions and future events in simple oral texts.
- E7.7.SI1.Students will be able to talk about simple predictions.
- E7.7.SP1.Students will be able to report on simple predictions.
- E7.7.R1. Students will be able to understand short and simple texts about predictions.
- E7.7.W1. Students will be able to write pieces about predictions and future events.

- Communication
- Creativity
- Critical thinking
- Digital skills
- Productivity

PREPARATION

- Active learning
- Blended learning
- Storytelling
- Cooperative learning

Tasks

Teacher

- Adapts the learning and teaching materials when it is necessary.
- Boosts motivation and self-confidence of the students.
- Guides the students in individual studies, pair work and group work.
- Involves different types of digital or physical tools into classroom.
- Encourages the students to actively use a variety of web tools and EBA.
- Motivates the students to engage in peer learning.
- Plans and organises the learning environment for the students.
- Provides oral or written feedback on the students' work.

Instructional Tools/Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive whiteboard

Online Tools

- eba.gov.tr
- Animation creation tools
- Artificial intelligence powered tools
- Digital publishing tools
- Interactive presentation tools

Instructional Materials

- Future prediction cards
- Future related visuals
- Student assessment form

APPLICATION

Activities

Before the Lesson

Lesson 1 (IT Class)

Following the demonstration, the students are divided into pairs or small groups. Before asking questions, the teacher instructs them to introduce themselves to the virtual assistant. Each group should then ask their own questions about various future scenarios. For instance, they might ask, "Will I be successful in my career?" and "Will I make good friends?" The virtual assistant's responses are designed to encourage self-actualisation and the cultivation of positive relationships and may include predictions such as "You will be successful in your career. Definitely! Also, you will be very happy in the future. You will make good friends." The students are encouraged to take note of any new vocabulary related to predictions as they listen to the responses.

Post-Activity

To conclude the lesson, the teacher reviews the key vocabulary and concepts with the students. The

Homework/Assignment

The teacher assigns Grammar Exercise 2: Dreams and Vocabulary Exercise 2: Dreams on EBA. The students are asked to complete these exercises.

Related Skills: Collaboration, Communication, Digital skills

Before the Lesson

The guideline for the warm-up exercise is prepared by the teacher (Annex-1). The teacher chooses one of the interactive presentation web tools and introduces the tool to the students. The students are informed that their performance will be evaluated by the teacher at the end of the lesson using an assessment form (Annex-2).

Pre-Activity

The teacher asks the students to draw their left or right hand on a piece of white cardboard. The teacher

Before the Lesson

The teacher selects a digital publishing tool to create a digital magazine and introduces the tool to the students.

Pre-Activity

In order to evaluate the students' comprehension of the future tense and to encourage their ability to make predictions in a visual format, the teacher creates a timeline on the board or distributes a sheet of paper to each student. The timeline is then labelled with time periods, such as "1 year from now", "5 years from now" and "10 years from now". The students are then instructed to write their predictions for the future on the timeline, employing future tense verbs. The students then share their predictions with the class, facilitating a discussion about the varied predictions and the future tense employed in each. This activity has been designed to assist the students in developing a visual understanding of future time and to encourage the creative application of future tense.

While Activity

The teacher introduces a digital publishing tool to create a digital magazine and demonstrates its
