# DON'T STOP MOTION

| Course | English | Grade | 7th Grade | Duration | 4 lesson hours (4x40') |
|---|---|---|---|---|---|

*This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.*

## Overview

This technology-enhanced learning scenario engages the students in a series of interactive, sports-themed activities that integrate physical movement, creativity, and digital skills. The scenario begins with a preparation and warm-up phase, during which the students are encouraged to wear sports attire and bring toy or cardboard sports equipment. In the main phase, the students collaborate to create digital vocabulary cards, categorising sports by type (e.g. team vs. individual, indoor vs. outdoor). This task naturally promotes communication and critical thinking as the students contribute examples and take notes. To reinforce these concepts, the teacher facilitates an interactive matching game that helps consolidate the students' understanding of the categories explored.

As the students progress through the scenario, they undertake creative projects that bring their sports stories to life through stop-motion video. Using digital tools for editing and evaluation, they enhance both their digital literacy and creative expression. These projects culminate in peer presentations, self and group assessments, and the opportunity to share their work on a digital platform. This comprehensive approach reinforces sports-related vocabulary and storytelling skills while cultivating teamwork, public speaking confidence, and a strong sense of achievement. By engaging with their classmates' projects in a supportive environment, the students benefit from gamification and active learning techniques that make the experience more interactive, dynamic, and enjoyable.

**Key Concepts:** Sports, Routines/Daily activities, Frequency adverbs

## Learning Goals

**Students**

- Expand sports vocabulary through classification.
- Utilise digital tools for creative expression.
- Cultivate creativity, communication, and teamwork in group activities.
- Enhance communication and digital skills.
- Strengthen critical thinking through categorisation and projects.
- Build confidence in self-expression through presentations and feedback.

## Course Objectives

- E7.2.L1. Students will be able to recognize frequency adverbs in simple oral texts.
- E7.2.SI1. Students will be able to ask questions related to the frequency of events.
- E7.2.SP1. Students will be able to talk about routines/daily activities by using frequency adverbs and giving explanations and reasons.
- E7.2.R1. Students will be able to understand short and simple texts on sports.
- E7.2.W1. Students will be able to write pieces about routines/daily activities by using frequency adverbs.

## Related Skills

- Critical thinking
- Communication
- Collaboration
- Creativity
- Digital skills

# PREPARATION

## Learning Approaches, Methods, Strategies

- Gamification
- Cooperative learning

## Tasks

**Teacher**

- Prepares the necessary materials in advance.
- Introduces new web tools and allows the students to explore them.
- Provides assistance and guidance to the students experiencing difficulties.
- Assesses language proficiency and comprehension, offering tailored support.

**Student**

- Listens attentively in order to understand tasks.
- Completes assigned tasks.
- Takes responsibility for personal and peer learning.
- Experiments with and uses new web tools effectively.
- Engages in evaluation processes and considers feedback.
- Demonstrates responsibility in activities and tasks.

## Instructional Tools/ Technologies

*The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.*

**Hardware**

- Interactive whiteboard
- Tablets
- Computers

**Online Tools**

- eba.gov.tr
- Visual creation and editing tools
- Classroom management tools
- Artificial intelligence powered tools
- Video editing tools
- Gamified measurement and evaluation web tools
- Web tools for self-assessment

## Instructional Materials/ Tools

- Ball
- Sports equipment
- Coloured cardboard
- Small toys (Building blocks)
- Crayons

# APPLICATION

## Activities

**Before the Lesson**

The teacher invites the students to choose a sport, dress in suitable attire, and bring any relevant equipment. In the absence of real equipment, the students may use toy or cardboard versions. These materials and visual representations will be used in an upcoming class presentation. Prior to the lesson, the teacher obtains parental permission for the photography activity. The teacher prepares a student assessment form based on an analytical rubric (Annex-1).

### Lesson 1 (IT Class)

**Pre-Activity**

The teacher enters the classroom holding a ball and explains that the class is going to play a game. The students then pass the ball around each saying a word related to a chosen sport. Each student should repeat the words articulated in advance; otherwise, they must perform a sporting activity (e.g. a tennis stroke) that has not been mentioned before, after which the next student will guess the sport. The activity continues until a sufficient amount of time has passed, energising the students for the lesson.

**While Activity**

The teacher prompts the students to guess the sport based on the materials they have brought to class. Following this, the teacher asks the students to pose with their equipment to simulate the sport, and takes the students' photos in action. If sufficient tablets are available, the students may take their own photos and send them to the teacher. If the school provides access to various sports fields, groups can also visit these areas to take relevant photos. Time should be allocated for this, with clear instructions.

If the activity remains in the classroom, during the photo session, both the teacher and the students verbally identify the sport being demonstrated. For example, the teacher might ask, "What is the name of this sport?", to which the students would respond, "This sport is football." The teacher can then reinforce the vocabulary and context by adding, for example, "He is playing football and kicking the ball now."

**Post-Activity**

The teacher stores the photos on the computer and forms groups of three or four students using a classroom management tool. The teacher then guides the groups in creating online vocabulary cards or flashcards using a selected visual creation and editing tool. The teacher demonstrates how to use the tool and provides clear instructions. The students then gather at the computers and follow the teacher's guidance to complete the task.

For the cards, the students launch the visual creation and editing tool to upload the first photo, and label it with the corresponding sport, either beneath or on the back of the card. This enables them to create their own learning materials. After hearing the pronunciation of each word, the students are expected to find the correct spelling.

Once the cards are completed, the students present them by practising the pronunciation of the sports terms. While showing the cards, they articulate the words clearly, and they may also ask their peers to repeat the words, enhancing their understanding of pronunciation. These online flashcards serve as the basis for the presentation. The teacher assesses the students' task completion, grammatical accuracy, pronunciation, and effort using the student assessment form (Annex-1).

**Related Skills:** Communication, Creativity, Digital skills, Collaboration

**Before the Lesson**

The teacher creates a matching activity titled Group the Sports using one of the gamified measurement and evaluation web tools (Annex-2).

## Lesson 2 (Class)

**Pre-Activity**

The teacher informs the class that they are going to play a game and asks for a student volunteer. The volunteer leaves the room while the rest of the class selects a sport for them to act out. Once the volunteer returns, the other students act out the chosen sport, and the volunteer has to guess what it is. The game then continues with different students taking it in turns to be a volunteer. Once several rounds have been completed, the warm-up activity concludes.

**While Activity**

The teacher uses a classroom management tool to display the groups and allows the tool to randomly select one group. The vocabulary cards created by the chosen group are then printed and distributed to all the students. The teacher advises the students to cut out the cards and use them as study materials at home.

The teacher introduces the idea that sports can be categorised under specific headings and explains the concept. For example, some sports are team activities, while others are individual. The teacher also highlights that certain sports are played indoors, while others are better suited to outdoor environments, and provides relevant examples. The students are encouraged to contribute their own examples to foster engagement in the discussion. As the teacher explains, the students take notes to reinforce their understanding of the classifications.

**Post-Activity**

The teacher initiates the next part of the lesson by launching the Group the Sports matching activity (Annex-2). This activity contains a list of sports, categorised as team or individual, and indoor or outdoor. One by one, the students come to the board, select a sport from the list, and identify the correct category by matching it accordingly. Each student takes their turn completing the activity, reinforcing their understanding of how different sports are classified through shared whole class participation. As this is a drag-and-drop activity, it should be carried out in the classroom environment with the teacher , who can then check the answers and provide feedback to the students. In order to reinforce the topic, the class completes, Vocabulary Exercise 1: Sports on EBA.

**Related Skills:** Communication, Creativity, Digital skills, Collaboration

**Before the Lesson**

The teacher asks the students to bring any toys that they have. They also provide colourful paper and crayons as the students are going to design a scene. The teacher uploads the students' names to one of the classroom management tools. For each group in the lesson, the teacher is required to provide as many tablets as possible.

## Lesson 3 (IT Class)

**Pre-Activity**

An engaging activity titled "Tide's In/Tide's Out" is set to commence the session. In preparation for this game, the teacher draws a line, representing a beach, and asks the students to stand behind it. The rules are simple: When the teacher announces, "Tide's out!", the students are to jump forward, and when the teacher calls "Tide's in!", they must jump backwards. If "Tide's out!" is called twice consecutively and a student makes an incorrect move, that student is eliminated from the game. The aim of the activity is to encourage the students to be both quick and attentive to the instructions. Upon completion, the students are expected to be energised, focused, and ready to begin the lesson, having engaged in a brief but enjoyable physical exercise.

**While Activity**

The teacher launches the classroom management tool and organises the students into groups. The teacher introduces a project in which the students write a story about sports, sports equipment or a significant moment in a game. The students then transfer their story into a visual format by designing an outline on cardboard. A group writing about a football match might represent a scene with a green cardboard field and a goal. The students then act out the story using toys from home. They then upload the photographs to a video editing tool to create a video.

The teacher utilises a classroom management tool to organise the students into groups for collaborative work. Each group is given a short amount of time to choose a name for their group and a sport for their story. The teacher documents the selections before offering further guidance. The students are given structure guidelines, covering the number of sentences and the elements to include. The students then write their stories on tablets or computers, asking the teacher for help and using online dictionaries.

**Post-Activity**

Once they have finalised their stories, the students create visual and performative representations. Then, they design the stage. They create visual representations using provided materials and toys to act out their stories. The teacher circulates around the classroom, offering guidance and assistance as needed. For the students who are unable to complete their set designs within the current session, additional time will be provided during the next lesson. This ensures all groups can fully develop their creative scenes before presenting and acting out their stories.

**Related Skills:** Communication, Creativity, Critical thinking, Digital skills, Collaboration

**Before the Lesson**

The teacher prepares a group assessment form to evaluate the collaborative efforts of each group (Annex-3). Additionally, a Self-Assessment Rubric is created using a web tool for self-assessment (Annex-4). These forms assess various aspects of the project, such as task completion, grammatical accuracy, teamwork, and problem-solving skills, amongst others.

## Lesson 4 (Class)

**Pre-Activity**

The teacher introduces a sports-themed version of "Simon Says" to reinforce vocabulary. The rules are simple. The students only follow commands starting with "Simon says." If they follow a command that does not start with this phrase, they are eliminated.

The teacher begins with simple instructions such as "Simon says clap your hands" and gradually increases the pace. To tie it into the sports unit, the teacher uses prompts such as "Simon says play football" or "Simon says hit the ball with a racket." This fun and active game helps the students practise, consolidate sports-related vocabulary through repetition and movement.

**While Activity**

In this session, the students create stop-motion videos based on the stories, texts and scenes that they developed previously. The teacher introduces stop-motion as a video editing tool, explaining that it involves taking pictures of static 3D objects, such as toys, to make them appear to move. The teacher explains the process positioning the toys, taking a photo after each small movement, and then uploading the photos to a video editing tool to create the video. The students choose toys and objects to illustrate their stories, e.g. a football match or an athlete's routine. They then take photos of each toy as it moves. The teacher shows how to upload these photos to a video editing tool in order to create a smooth video. The teacher provides examples to spark creativity, such as a ball slowly moving towards a goal and scoring, with a narration describing the action. Another example is showing an athlete's daily routine, with each action represented by a toy or object. The students are then required to add subtitles to the video by writing out their stories. The students can read their texts aloud and record a voice-over for the video if time allows. This process combines writing, design, photography and digital skills, and enables the students to learn language related to sports and storytelling.

**Post-Activity**

Once the students have finished making their stop-motion videos, the teacher plays them on the interactive whiteboard for the whole class to watch. This viewing session allows the students to appreciate each other's creativity and recognise the different approaches taken in the project. Afterwards, the teacher encourages the students to complete the group assessment form and the Self-Assessment Rubric (Annex-3 and Annex-4). The teacher clarifies that the students will assess both their own performance and that of their group members. These evaluations will cover aspects such as participation, collaboration, and contribution to the final product. At the end of the session, the teacher encourages the students to upload their videos to EBA. By sharing their projects on this platform, the students have the opportunity to watch their videos again, review their peers' work, and showcase their efforts to a wider audience. This final step supports ongoing engagement and fosters pride in their completed projects beyond the classroom.

**Homework/Assignment**

The teacher uses an artificial intelligence powered tool to create quizzes based on student videos and stories focusing on the subject of sports and equipment. After reviewing the questions, the teacher uploads them to a gamified measurement and evaluation web tool, turning the quiz into an interactive experience. The students access the quiz via a shared link, which enables them to demonstrate their understanding of their own videos and those of their peers.

The teacher assigns Grammar Exercise 1: Sports and Grammar Exercise 4: Sports activities to the students through EBA and then assesses their performance.

**Related Skills:** Communication, Creativity, Critical thinking, Digital skills, Collaboration

## Evaluation/Assessment Methods/Tools

- EBA + grammar exercises
- EBA + vocabulary exercise
- Gamified measurement and evaluation web tools
- Web tools for self-assessment
- Student assessment form
- Group assessment form

# Student Assessment Form

**This analytical rubric is designed to assess the students' flashcards and their classroom presentations. For each criterion, assign the most appropriate point value based on each group's performance.**

**Student Name:**

| CRITERIA | RATINGS | | | | POINT |
|---|---|---|---|---|---|
| | 1 | 2 | 3 | 4 | |
| Completion of task | Information provided was inadequate | Information provided was limited | Adequate information provided | Extensive information provided | |
| Grammatical accuracy | Multiple mistakes that take away meaning | Frequent mistakes that make it somewhat difficult to understand | Some mistakes that do not interfere with meaning | Very accurate, few mistakes | |
| Pronunciation | Largely incomprehensible | Somewhat difficult to understand | Easy to understand | Sounds almost like a native speaker | |
| Effort | Minimal effort or attention to detail | Insufficient effort or attention to detail | Good effort and attention to detail | Outstanding effort and attention to detail | |

**GENERAL COMMENTS:**

# Group the Sports

**Choose the sports from the table and categorise them correctly by writing each name under the appropriate heading.**

## SPORTS

Handball, Working out, Cycling, Doing judo, Skating, Basketball, Archery

Ice skating, Camping, Swimming, Soccer, Surfing

## INDOOR SPORTS

## OUTDOOR SPORTS

## TEAM SPORTS

## INDIVIDUAL SPORTS

# Group Assessment Form

**Please take a moment to complete this brief survey and thoughtfully evaluate your peers' contributions to the group activity.**

**Name-Surname:** **Group Name:**
**Friend-1:**
**Friend-2:**
**Friend-3:**

**1. How would you rate your friend's COMPLETION OF THE TASK? (Rate all group members 1-5)**

- Friend-1:..... • Friend-2:..... • Friend-3:.....

**2. How would you rate your friend's PRODUCTIVITY? (Rate all group members 1-5)**

- Friend-1:..... • Friend-2:..... • Friend-3:.....

**3. How would you rate your friend's COMMUNICATION WITHIN THE GROUP? (Rate all group members 1-5)**

- Friend-1:..... • Friend-2:..... • Friend-3:.....

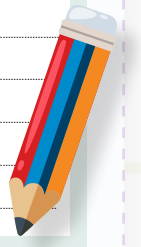

**4. How would you rate your friend's CONTRIBUTION THE TEAM'S EFFORTS? (Rate all group members 1-5)**

- Friend-1:..... • Friend-2:..... • Friend-3:.....

**5. How would you rate your friend's PROBLEM-SOLVING SKILLS? (Rate all group members 1-5)**

- Friend-1:..... • Friend-2:..... • Friend-3:.....

**General Comments:**.....

# Self-Assessment Rubric

**Dear students, please drag the star from the area to the stadium that corresponds with your knowledge.**

Task completion
1 2 3 4

Teamwork
1 2 3 4

Productivity
1 2 3 4

Communication
1 2 3 4

Problem-solving skills
1 2 3 4
