INNOVATION AND EDUCATIONAL TECHNOLOGIES
GENERAL DIRECTORATE

WINDOW TO THE WORLD

Course	English	Grade	7th Grade	Duration	4 lesson hours (4x40')

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

This learning scenario has been designed to enhance students' ability to express their preferences and daily routines in a creative manner by utilising web-based tools. These tools serve to transform technology into a platform for innovation and self-discovery. A range of digital tools is utilised to create diverse learning materials, foster active student engagement, and accommodate varied learning styles. The integration of a technology-based learning approach within this educational scenario is expected to facilitate vocabulary acquisition, as evidenced by the incorporation of a presentation on the types of TV programmes. The employment of the Six Thinking Hats technique, an active learning approach, is expected to encourage the students to engage in collaborative work and to enhance their communication skills when creating a digital board. In addition, the use of the Six Thinking Hats technique will foster the students' critical thinking, creativity and productivity in a manner that is both engaging and conducive to learning. The teacher's role is to provide guidance and to observe the process.

In the evaluation phase, a variety of methods will be employed to assess student progress, including a reflective journal and the utilisation of chat cards. The principal aim of these strategies is to enhance the assessment process for the students, rendering it more engaging and enjoyable. To this end, the teacher will provide immediate feedback on all activities throughout the lesson, thus facilitating learning.

Key Concepts: Preferences, Six Thinking Hats technique, Reflective journal, Daily routines

Learning Goals

Students

- Recognise the sentences and expressions about the preferences and daily routines.
- Discuss the relationship between the TV viewing habits and behaviour patterns.
- Enhance communication skills.
- Leverage technology to enrich the learning experience.
- Collaborate effectively to design and produce a digital product.
- Apply information technology tools in the creation of a digital board.

Course Objectives

- E7.5.SI1. Students will be able to ask questions about the preferences of other people.
- E7.5.SP1. Students will be able to state their preferences.
- E7.5.R1. Students will be able to understand simple texts about daily routines and preferences.
- E7.5.W1. Students will be able to write pieces about daily routines and preferences.

Related Skills

- Collaboration
- Communication
- Digital literacy
- Active listening
- Critical thinking
- Creativity
- Productivity
- Cultural awareness

PREPARATION

Learning Approaches, Methods, Strategies

- Technology-based learning
- Cooperative learning
- Inquiry-based learning
- Six Thinking Hats technique

Tasks

Teacher

- Creates presentations and a digital board about the TV programmes and preferences.
- Prepares visuals and various activities.
- Designs a reflective journal.
- Guides the students to work in collaboration for creating a digital board.
- Encourages the students to take an active role in the lesson.
- Utilises interactive whiteboards and other digital tools effectively.
- Forms student groups tailored to the activity and aligned with the selected learning method.

Student

- Identifies the vocabulary related to the types of TV programmes.
- Creates a presentation to describe TV habits of their family members.
- Explores how television viewing habits influence behavioural patterns.
- Engages actively with the lesson, following the teacher instructions.
- Contributes meaningfully to digital collaboration.
- Participates in tasks to enhance digital skills.
- Accepts responsibility in group tasks and assignments.

Instructional Tools / Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive whiteboard
- Tablet
- Computer

Online Tools

- eba.gov.tr
- Word cloud creation tools
- Visual creation and editing tools
- Interactive presentation tools
- Poster and flyer creation tool
- Artificial intelligence powered tools
- Tools for creating digital boards or post-its
- Gamified measurement and evaluation web tools
- Online discussion tools
- Video editing tools

Instructional Materials/ Tools

- Six corners of watching TV visual

APPLICATION

Activities

Before the Lesson

First, the teacher designs a word cloud named TV Programmes using one of the word cloud creation tools. The teacher then creates a presentation titled Types of TV Programmes using one of the interactive presentation tools. Finally, for the assessment, the teacher prepares a Reflective Journal using one of the visual creation and editing tools and prints it out (Annex-1).

Lesson 1 (Class)

Pre-Activity

The teacher commences the lesson by posing the questions, 'Do you like watching TV?', and 'What kind of Tv programmes do you watch, and why?' and subsequently invites the students to contemplate the significance of watching appropriate programmes for their age. After the discussion, the teacher displays the TV Programmes word cloud on the interactive whiteboard to illustrate the concept, encouraging the students to select their favourite programme and construct a sentence around it. Finally, the class collectively creates an additional word cloud incorporating television-related vocabulary using one of the word cloud creation tools.

While Activity

Following the word cloud activity, the teacher proceeds to the presentation titled Types of TV Programmes, in which the students identify different types of TV programmes and TV signs. The teacher uses the presentation to introduce the topic and stimulate the students' curiosity ahead of the main activity. The teacher initiates group work by inviting the students to team up and explore the following questions together: 'What kind of programmes do you prefer?', 'Why is it important to watch programmes that are appropriate for our age?', 'Does watching too much TV affect our creativity?', 'What effect do TV programmes have on our emotions?', 'Why do people from different countries or cultures prefer different types of TV programmes?', and 'If you could create your own TV channel for young people, what programmes would you include?' This activity aims to cultivate critical thinking, active listening and structured speaking, and the teacher provides ongoing feedback to facilitate student engagement and progress.

Post-Activity

After the discussing TV viewing habits, the teacher moves on to the assessment part and hands out copies of the Reflective Journal, in which the students are required to answer the questions reflecting on their TV viewing habits. (Annex-1).

Related Skills: Communication, Collaboration, Active listening, Critical thinking, Cultural awareness

Before the Lesson

The teacher prepares a visual titled Six Corners of Watching TV using one of the visual creation and editing tools and prints it out. Then the teacher creates a digital board titled Share Your Insights using one of the tools for creating digital boards or post-its.

Lesson 2 (IT Class)

Pre-Activity

The teacher displays the Six Corners of Watching TV visual which includes categories such as documentaries, cartoons and sitcoms, on the interactive whiteboard. The teacher then divides the printed version of the visual into six sections, which are affixed to the six corners of the classroom. Subsequently, the teacher invites the students to examine the visual on the board and asks, "What kind of programmes do you watch the most?" The students are then encouraged to move to the corresponding corner where they watch TV the most, write their names on the visual, and discuss with the other students why they watch these programmes.

While Activity

The teacher then divides the class into six groups, using the names written on the six corners of watching TV visuals. The teacher shares the link of the Share Your Insights digital board with the groups. The students who watch similar programmes on TV convene to create sticky notes to paste on the digital board. Using the Six Thinking Hats technique of the active learning approach, the teacher distributes the topics that the students need to research. The White Hat group uses chatbots or search engines to find facts about the effects of TV programmes on audiences and writes the key points on the digital board 'Documentaries increase our knowledge'. The Red Hat group uses one of the visual creation and editing tools to create short emoji or mood boards representing their feelings about different types of TV programmes, to which they add simple sentences: 'I feel excited while watching quiz shows' and then share the visuals on the digital board. The Black Hat group uses one of the visual creation and editing tools to create a cause-and-effect visual showing the negative effects of negative examples on TV: 'Horror and war films ⟶ Violence increases ⟶ Empathy decreases'. The Yellow Hat group designs a digital poster using a poster and flyer creation tool to show the benefits of watching educational programmes. They use slogans such as 'Learning Right from Your Living Room!'. The Green Hat group prepares a cartoon video using one of the video editing tools, adding creative solutions such as 'Teaching Numbers with Animals'. The Blue Hat group collects all the group's work on the digital board and presents a summary of ideas about the positive and negative effects of TV programmes on the interactive board. 'Pay attention to what you watch, because you turn into what you see on TV.' As the lesson draws to a close, the class will have created a collective product through their collaborative efforts. The students contribute to this collective endeavour within the larger group while also working in smaller groups. It is emphasised that the results of the research will be presented to the class, with the teacher offering guidance as required.

Post-Activity

After conducting their research, the groups present their products and findings to their classmates, who then provide feedback on their work.

Related Skills: Communication, Collaboration, Active listening, Critical thinking, Creativity, Productivity, Digital literacy

Before the Lesson

First the teacher prepares What Do You Prefer? visuals using one of the visual creation and editing tools and prints them out. The teacher then creates a presentation titled TV Viewing Habits using one of the interactive presentation tools (Annex-2). Finally, for the assessment, the teacher designs Chat Cards using one of the gamified measurement and evaluation web tools (Annex-3).

Lesson 3 (Class)

Pre-Activity

The teacher displays the What Do You Prefer? visuals, which include talk shows, news programmes and documentaries, on the interactive whiteboard. In this exercise, students work in pairs to identify their partners' favourite TV programmes. They are also required to describe their TV viewing habits, using frequency adverbs. For example, 'I always watch quiz shows on Friday nights, but I never watch soap operas'.

While Activity

Following the discussion activity, the teacher proceeds to the presentation titled TV Viewing Habits, in which the students identify the expressions and phrases related to daily routines and preferences (Annex-2). The teacher periodically pauses the presentation and poses questions such as “What kind of programmes does your father watch?”, “Do you like watching the news?”, “How often does your mother watch sports programmes?” and “What did you learn about your classmates' TV viewing habits?”, with the aim of creating an interactive learning environment and encouraging the students to express themselves.

Post-Activity

Following the preceding presentation, to assess the comprehension, the teacher initiates the Chat Cards where the students are requested to answer the questions, with guidance offered by the teacher as required (Annex-3).

Related Skills: Communication, Collaboration, Active listening, Digital literacy, Cultural awareness

Lesson 4 (IT Class)

Pre-Activity

Using one of the online discussion tools the teacher initiates the lesson with a discussion. The students are required to provide swift responses to the scenarios provided such as, "Your grandmother wants to watch an Indian soap opera, but you can't stand watching soap operas. What do you do?", "It is your turn to watch the TV, but your sister/brother insists on watching the same cartoon for several times. What do you do?". Once all the scenarios have been discussed, the teacher summarises the key points about the subject.

While Activity

Following the discussion, the students are assigned to collaborate in groups of four in order to prepare a presentation using one of the interactive presentation tools to describe the TV habits of their family members. The students are required to use the frequency adverbs when describing the routines and phrases to state preferences. The objective of this activity is to cultivate creativity and productivity in a captivating manner while using daily routines and preferences. The teacher provides ongoing feedback to support the students' engagement and progress throughout the activity.

Post-Activity

Once all groups have finished designing their presentations, they share their work on EBA. The teacher and the students then analyse the presentations in detail and provide feedback.

Homework/Assignment

The students are assigned the task of completing the Reading Exercise: The Good and Bad Sides of TV on EBA. The students are required to read the passage and answer the questions.

Related Skills: Communication, Collaboration, Digital literacy, Creativity, Productivity

Evaluation/Assessment Methods/Tools

- EBA + reading exercise
- Gamified measurement and evaluation web tools
- Reflective journal

Annex-1: Reflective Journal
Annex-2: The Transcript of 'TV Viewing Habits' Presentation
Annex-3: Chat Cards

Reflective Journal

Dear students, take a moment to share your thoughts on your TV viewing habits by answering the questions.

Name: **Surname :**

Complete the sencentes.

The programmes I like <u>the most...</u>

I prefer ..... to .....

I feel <u>very excited</u> when I watch.....

I feel <u>very bored</u> when I watch.....

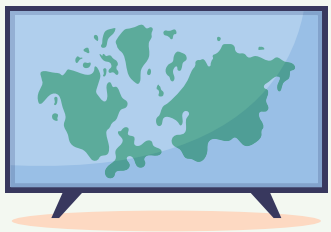

I feel <u>very good</u> when I watch.....

I feel <u>horrified</u> when I watch.....

The Transcript of 'TV Viewing Habits' Presentation

Description: The teacher creates a presentation using one of the interactive presentation tools, where the students identify the phrases related to preferences and daily routines.

First Page: Write, "What do my family members watch? Let's take a closer look at the television viewing habits of my family members." and attach some visuals of television.

Second Page: Write, "Hello, my name is David. I am a bookworm; I like reading science fiction books, and I hate watching TV. But all my family members enjoy watching different kinds of TV programmes. Let's see what they like watching." and attach a visual of a boy.

Third Page: Write, "This is my father, Tommy. He always watches sports programmes, and he never watches talk shows. He prefers watching football matches." and attach a visual of a man.

Fourth Page: Write, "He plays football with his friends at the weekend." and attach some visuals of him playing football.

Fifth Page: Write, "This is my mother, Angela. She usually watches cookery programmes. She never watches sitcoms. She sometimes prefers watching talk shows." and attach a visual of a woman.

Sixth Page: Write, "My mum cooks delicious meals. We are lucky." and attach some visuals of meals.

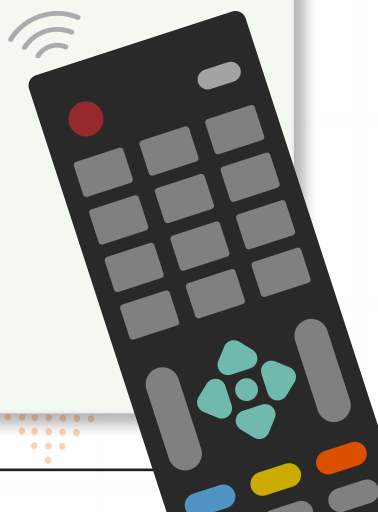

Seventh Page: Write, "This is my sister, Sophia. She generally watches cartoons, and she never watches news. She prefers watching funny things." and attach some visuals of siblings.

Eighth Page: Write, "This is my grandfather, Sam. He often watches horror films, and I am worried because he is too old to watch horror films. He should watch suitable things for his age." and attach a visual of an old man.

Ninth Page: Write, "Isn't he too old to watch scary things?"

Tenth Page: Write, "This is my grandmother, Lindy. She always watches Indian soap operas. I think she is very patient. She doesn't prefer watching sports programmes." and attach a visual of an old woman.

Eleventh Page: Write, "What are your family members' TV viewing habits?"

Chat Cards

Dear students, answer the questions related to the TV viewing habits presentation.

1. What kind of books does David read?

2. What kind of programmes does David's father watch?

3. What kind of programmes does David's mother usually watch?

4. What kind of programmes does David's sister generally watch?

5. What kind of programmes does David's grandfather watch?

6. What kind of programmes does David's grandmother watch?

7. When does David's father play football with his friends?

8. What does David's sister <u>never</u> watch?

Answer Key

Annex-3

1. David reads science fiction books.

2. He watches sports programmes.

3. She usually watches cookery programmes.

4. She generally watches cartoons.

5. He watches horror films.

6. She watches soap operas.

7. He plays football at the weekend.

8. She never watches the news.
