WRITE AND DRAW!

Course	English	Grade	6th Grade	Duration	3 lesson hours (3x40')

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

This technology-enhanced learning scenario incorporates a multi-sensory approach to teaching prepositions, combining kinaesthetic, auditory and visual learning strategies to increase student engagement and comprehension. The scenario begins with interactive activities where the students physically represent prepositions through group-based kinaesthetic exercises, helping them to internalise spatial relationships in a tangible way. This is followed by collaborative writing and drawing tasks where the students use digital tools to create descriptive paragraphs and corresponding visual illustrations. These activities promote teamwork, communication and creativity, while reinforcing the correct use of prepositions in both written and visual contexts.

In addition, the scenario integrates auditory learning through the use of music and active listening exercises. By clapping or stomping to the rhythm of prepositions in a song, the students strengthen their auditory discrimination and understanding of grammatical structures. The scenario also includes AI-generated images and games that challenge the students to describe objects using prepositions, thereby improving their speaking and listening skills. The sequence of activities throughout the lesson ensures a comprehensive and engaging learning experience, with a balance of individual practice, group collaboration and technology integration, ultimately helping the students to develop a deeper understanding of prepositions and their use in different contexts.

Learning Goals

Students

- Identify how prepositions related to different types of words such as nouns, adjectives and adverbs.
- Construct sentences using prepositions correctly.
- Recognise and use prepositional expressions.

Course Objectives

- E6.8.L1. Students will be able to listen to the instructions and locate things.
- E6.8.SI1. Students will be able to talk about the locations of people and things.
- E6.8.SP1. Students will be able to describe the locations of people and things.
- E6.8.W2. Students will be able to write about the locations of people and things.

Related Skills

- Communication
- Creativity
- Digital skills
- Active listening

PREPARATION

Learning Approaches, Methods, Strategies

- Gamification
- Cooperative learning
- Active learning

Tasks

Teacher

- Explains the meanings and uses of prepositions clearly and concisely.
- Emphasises the differences between different prepositions.
- Demonstrates examples of correct preposition usage.
- Shows the students how to use prepositions in daily life.
- Prepares various audio-visual materials to teach prepositions.
- Develops various activities and games.
- Designs the learning environment to use technological tools.

Student

- Takes part in the lesson and follows the teacher's instructions.
- Participates in different activities and games.
- Practices and repeats the prepositions regularly.
- Carries out exercises and tests with care.
- Joins in the activities to gain digital competence.

Instructional Tools/Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive whiteboard

Online Tools

- eba.gov.tr
- Visual creation and editing tools
- Artificial intelligence powered tools

Instructional Materials

- Preposition card

APPLICATION

Activities

Before the Lesson

Prior to the lesson, the teacher prepares preposition cards, each labelled with a specific preposition for the warm-up activity. The teacher creates a story containing multiple prepositions via an artificial intelligence powered tool.

Lesson 1 (Class)

Pre-Activity

The teacher brings cards with prepositions and tells the students they will use their bodies to show different prepositions. The teacher divides the class into small groups and gives each group a preposition card. A group assigned “between” might have one student stand between two others, linking arms.

For “under”, a student could crawl under a table, while the other stands nearby. Each group presents their formation to the class without speaking. The teacher then leads a brief discussion, asking the students to reflect on how the activity helped them understand the prepositions.

While Activity

The teacher writes a list of prepositions on the board. The teacher provides sample sentences to help the students: “The book is on the teacher’s desk.”, “The pencil is in the pencil case.”, and “The bag is under the chair.”

The students make up two or three sentences using the classroom as inspiration. They think for a few minutes, then share their sentences with the class. The teacher helps the students use prepositions correctly and meaningfully. The teacher reads the text with prepositions and asks the students to clap each time they hear a preposition. This activity fosters effective listening skills and expands the students' vocabulary.

Post-Activity

The teacher presents the text to the students on the interactive whiteboard, enabling them to view the written form of all prepositions.

Related Skills: Collaboration, Communication, Active listening, Creativity

Before the Lesson

Prior to the lesson, the teacher selects a song that features prepositions for the warm-up activity. The teacher informs the students that they will be evaluated at the end of the activity and explains the criteria for the evaluation. The teacher organises an evaluation form to assess group performance at the end of the lesson (Annex-2).

Lesson 2 (IT Class)

Pre-Activity

The students identify prepositions in a song by clapping or stomping. By actively participating in the clapping or stomping, the students enhance their auditory discrimination and reinforce their grasp of prepositional usage, integrating both kinaesthetic and auditory learning modalities.

While Activity

To integrate descriptive writing and visual interpretation, the class participates in an activity that uses prepositions as they work in groups. The class is split into two groups: writing and drawing. The writing group has to write a description of an imaginary room using prepositions. They might say, "The bookcase is next to the bed" or "The wardrobe is between the table and the coffee table."

The drawing group uses one of the visual creation and editing tools to turn the descriptions into pictures. The drawing group reads the descriptions and draws a picture of the room based on them. The drawing group must pay attention while listening for comprehension. Then the groups switch roles. The drawing group writes a new paragraph while the writing group draws the room. This rotation ensures that all the students practise both writing and drawing, which helps them to understand prepositions.

Post-Activity

Following the completion of the writing and drawing tasks, the students share their final work on EBA wall. The teacher and the students then review the work to correct any errors. The teacher subsequently completes the evaluation form to assess the group's performance (Annex-1).

Related Skills: Creativity, Collaboration, Communication, Digital skills, Active listening

Before the Lesson

Before the class, the teacher prepares two images that are almost the same, apart from a few key details. These images can be used for a warm-up activity focused on prepositional phrases. The teacher creates an AI-made image of a room containing a range of items suitable for detailed description.

Lesson 3 (Class)

Pre-Activity

The teacher presents two similar images and highlights the differences between them. Some objects in the first image are absent in the second. The students are asked to identify the missing objects and their original locations.

While Activity

To improve speaking skills, the students are split into groups and shown an AI-generated image of a room. Each group member describes one item from the image to the next student. The first student says, "The lamp is on the bedside table," and the second student says, "There is a plant next to the lamp." Each student describes one item at a time until the last student gives the full description. After sharing the final descriptions, groups compare their original descriptions with the final verbal output. This exercise helps the students understand what they hear and speak accurately.

Post-Activity

The students complete Grammar Exercise 2 from EBA for evaluation.

Related Skills: Communication, Collaboration

Evaluation/Assessment Methods/Tools

- EBA + grammar exercise
- Writing & drawing activity evaluation form
