# EXPLORING FUTURE OCCUPATIONS

| Course | English | Grade | 6th Grade | Duration | 3 lesson hours (3x40') |
|---|---|---|---|---|---|

*This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.*

## Overview

For many students, deciding on their future profession can be quite a complicated process. While this decision-making process requires young people to understand their own personalities, they are also likely to have incomplete or inaccurate information about occupations. In addition, the fact that they are not yet experienced or that their specific abilities are not developed can also make this process difficult. Moreover, their social environment and the opinions of the people they are influenced from can also affect their decision-making process (Gati, Osipow, Krausz & Saka, 2000).

In this learning scenario, the teacher assumes the role of a facilitator, guiding the students through a series of activities designed to foster active engagement, collaborative learning, and critical thinking. This entails initiating discussions, offering guidance, and establishing a supportive learning environment. Concurrently, the students engage in a multitude of tasks, including animation creation, role-playing, and assignment completion, which foster the development of essential skills such as effective communication, creativity, problem-solving abilities, and technological literacy. Through collaboration and active participation in these activities, the students cultivate the skills necessary to effectively explore various professions and historical periods. The teacher, meanwhile, ensures that these activities align with established learning objectives and cultivates a positive and inclusive learning environment.

## Learning Goals

**Students**

- Identify hours, days, and dates.
- Ask personal questions.
- Express dates clearly.
- Acquire and master vocabulary related to dates and professions.
- Compose written works that effectively utilise dates and professions.

## Course Objectives

- E6.6.L2. Students will be able to understand the time, days and dates.
- E6.6.SP1. Students will be able to ask personal questions.
- E6.6.SP2. Students will be able to state the dates.
- E6.6.R1. Students will be able to understand familiar words and simple sentences about occupations and the dates.
- E6.6.W1. Students will be able to produce a piece of writing about occupations and the dates.

## Related Skills

- Creative thinking
- Collaboration
- Productivity and responsibility
- Communication
- Digital skills

# PREPARATION

## Learning Approaches, Methods, Strategies

- Collaborative learning
- Active learning
- Gamification

## Tasks

**Teacher**

- Creates a collaborative learning environment for the students.
- Designs engaging activities to keep the students motivated.
- Provides a flexible learning experience.
- Guides the students in developing critical thinking, higher order thinking and real life skills.
- Uses technology effectively with innovative pedagogy.
- Ensures that the students are responsible for their own and their friends' learning in the learning process.
- Acts as a guide that the students can consult when they have difficulties in the classroom.

**Student**

- Participates actively in the learning process.
- Takes responsibility for learning, thinks independently and critically.
- Asks questions, investigates and explores.
- Works collaboratively.
- Completes the tasks assigned by the teacher before, during and after the lesson.
- Makes efforts and participates in activities in order to acquire the necessary course objectives.
- Utilises digital tools effectively.

## Instructional Tools/Technologies

*The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.*

**Hardware**

- Interactive whiteboard

**Online tools**

- eba.gov.tr
- Collaboration tools
- Tools for creating digital boards or post-its
- Animation creation tools
- Time management tools
- Gamified measurement and evaluation tools
- Web tools for multiple-choice questions

# APPLICATION

## Activities

**Before the Lesson**

The teacher identifies and utilises appropriate animation creation tools to facilitate the student learning. The teacher informs the students of the criteria and process for evaluating homework and prepares a student assessment form (Annex-1).

### Lesson 1 (Class)

**Pre-Activity**

The teacher begins the lesson by reminding the students about professions, job descriptions, and dates. “She is a teacher, she can teach English, but she can’t repair houses”, “She works on weekdays”, “She was born on 12th June 1980”, “She was a student in 2004”, etc. The teacher wants the students to discuss in pairs or small groups to list as many different job roles as they can within a set of time, such as two minutes. Afterward, each group shares their lists with the class, and the teacher facilitates a discussion on the variety of professions.

**While Activity**

The teacher facilitates a listening activity Listening Exercise: Occupations on EBA to enrich the students' vocabulary.

The teacher introduces an animation maker tool to demonstrate how to design characters, scenes, and dialogues about professions to the students. Animation creation starts with choosing the character and scene via the tool. After selecting the characters, the students select the scene, and they vocalise dialogues by using the recording start button. The teacher initiates the tool on the interactive whiteboard, which they decide on together with the students. The teacher divides the students into groups of three or four. First, the students decide on the professions they want to introduce, then they write the dialogues in their notebooks. The teacher checks and provide feedback to the students throughout the process. The groups that are ready, start to create their content on the interactive whiteboard. Each group saves its content after they create it.

**Post-Activity**

After all groups finish the activity, they watch animation videos together.

**Homework/Assignment**

The teacher asks the students to prepare the same activity individually as homework, with the same rules. The teacher requests the students to upload the assignments to one of the collaboration tools. Through the use of this tool, all the students and the teacher can see animation videos.

The teacher informs the students about the evaluation process and the criteria. The teacher evaluates the student videos using the student assessment form, which includes 5 criteria: "Originality", "accuracy", "use of information technologies", "relevance to the subject" and "clarity"(Annex-1).

**Related Skills:** Creative thinking, Communication, Productivity and responsibility, Digital skills, Collaboration

**Before the Lesson**

The teacher asks the students to bring costumes, materials, tools and equipment related to the professions.

## Lesson 2 (Class)

**Pre-Activity**

The teacher elucidates to the students that they will be engaging in a recreational dress-up relay game to ascertain the correct designation of various professions. The teacher exemplifies the activity by wearing one of the costumes and enacting a concise scenario pertinent to the profession in question. For instance, the teacher can wear a lab coat and use a stethoscope to examine a patient. After the activity, the teacher leads a discussion about the different professions represented and their roles in the society. The students can share their observations and discuss the skills and responsibilities associated with each profession.

**While Activity**

The teacher initiates the previous lesson task on the interactive whiteboard and assigns a number to each video prepared by the students. The teacher uses a random selection method, such as drawing numbers from a hat or using a random number generator, to choose which videos to watch. This will ensure fairness and impartiality in the selection process. They watch the animation videos together. After watching the animation videos, the students are divided into pairs or small groups. The teacher asks the students to create short role-play skits where they act out scenarios related to different professions introduced in the videos. For example, one group might portray a doctor-patient interaction, while another group acts out a teacher-student dialogue. The students can use props and costumes to make their skits more engaging.

The teacher leads the students to Grammar Exercise 5: Occupations and Grammar Exercise 6: Occupations activities on EBA. The teacher along with the students completes the activity to reinforce the course objectives.

**Post-Activity**

The teacher initiates a digital tool that displays the date on the interactive whiteboard. The dates come randomly, the students say the dates and write the spelling in their notebooks.

The teacher initiates a reading activity Reading Exercise: Occupations on EBA and reads the text. Then, the teacher chooses a few students and requests them to read the text aloud. The teacher selects the students by calling out random numbers from the attendance list, ensuring a fair and engaging process. The students are allowed time to look up unfamiliar words and answer questions about the text. They then give their collective responses.

**Homework/Assignment**

As an assignment, the teacher shares Occupations 1 video on EBA with the students. The teacher informs the students that they will evaluate the video with a web tool for multiple-choice questions next lesson.

**Related Skills:** Communication, Digital skills

**Before the Lesson**

The teacher creates a Exploring Future Occupations Quiz using one of the web tools for multiple-choice questions (Annex-2). The teacher prepares a puzzle for Time Explorer Game by using one of the gamified measurement and evaluation web tools (Annex-3).

## Lesson 3 (Class)

**Pre-Activity**

The teacher launches a web tool for multiple-choice questions on the interactive whiteboard to create Exploring Future Occupations Quiz based on the previous lesson's homework video (Annex-2). The students take turns and answer the questions.

**While Activity**

The teacher initiates Writing Exercise: My Dream Job on EBA. The teacher reads the sample writing activity and answers the students' questions about the text. The teacher encourages the students to write a similar text, skims the texts by walking between the desks, guides the students who need it, and asks the students to help each other. At the end of the activity, the teacher allows all the students to read their texts, starting with the voluntary students. In writing activities, the students may be reluctant to read their texts. In this process, the teacher identifies the students' areas of underperformance and provides them with constructive feedback.

**Post-Activity**

The teacher initiates the Time Explorer Game including the unit outcomes; expressing dates, asking personal questions and getting to know professions on the interactive whiteboard (Annex-3). During the game, the students solve interactive puzzles related to unit outcomes, and the teacher monitors the progress of the students and provides guidance when needed.

**Related Skills:** Creative thinking, Communication, Productivity and responsibility, Digital skills, Collaboration

## Evaluation/Assessment Methods/Tools

- EBA + listening exercise
- EBA + grammar exercises
- EBA + reading exercise
- EBA + writing exercise
- Gamified measurement and evaluation tool
- Web tools for multiple-choice questions
- Student assessment form

# Student Assessment Form

**This form has been designed for you to evaluate the work of your students on animation videos they have created. For each criterion, select the grade that best reflects your assessment on a scale of 1 to 5, and indicate your choice by placing a tick in the relevant box.**

| **Student's Name/Surname:** | | | | | |
|---|---|---|---|---|---|
| **CRITERIA** | **RATINGS** | | | | |
| | Inadequate (1) | Needs improvement (2) | Meets expectations (3) | Exceeds expectations (4) | Truly outstanding (5) |
| **Originality:** The content of the animation video is original. | | | | | |
| **Accuracy:** The sentences are correct. | | | | | |
| **Use of information technologies:** The animation video is designed with a digital tool suitable for the subject. | | | | | |
| **Relevance to the topic:** The animation video is relevant to the course content and the desired outcomes. | | | | | |
| **Clarity:** The animation video is understandable. | | | | | |

# Exploring Future Occupations Quiz

**Description:** The teacher can create a quiz using these questions or add new questions using one of the multiple-choice web tools.

**1. What does Cristina do?**

A) She is a doctor.
B) She is a vet.
C) She is a nurse.
D) She is a lawyer.

**Correct Answer: A**

**2. What can Cristina do?**

A) She can build houses.
B) She can cure illnesses.
C) She can sew fabrics.
D) She can cook meal.

**Correct Answer: B**

**3. What does Jennifer do?**

A) She is a doctor.
B) She is a teacher.
C) She is a lawyer.
D) She is a waitress.

**Correct Answer: D**

**4. What can Jennifer do?**

A) She can teach students.
B) She can catch thieves.
C) She can carry plates.
D) She can help patients.

**Correct Answer: C**

# Time Explorer Game

**Description:** The teacher prepares a puzzle game by using one of the gamified measurement and evaluation web tools including the words and sentences below.

**Dates:**

Today's date is June 8th.
Today is June 8th, 2024.
It's June 8th today.

**Occupations:**

I am a teacher.
I work as a doctor.
I work at a hospital.

**Asking Personal Questions:**

When were you born?
Where were you born?
Was she at home yesterday?
