GENERAL DIRECTORATE

WE ARE PLANET PROTECTORS!

Course	English	Grade	6th Grade	Duration	3 lesson hours (3x40')

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

The objective of this learning scenario is to enhance the students' understanding and engagement with environmental issues through interactive activities. Initially, the students discuss "Saving Our Planet" and complete exercises to build environmental vocabulary. They then create and share slogans, take a test on EBA, and design posters using web tools for poster and flyer creation. These posters are transformed into banners for a school garden event.

The students perform in the garden with their banners and participate in a scavenger hunt to deepen their engagement with environmental issues. This learning scenario promotes collaboration, creativity, and practical recycling skills, integrating project-based, active, and cooperative learning approaches.

Finally, the students complete a self-assessment form to evaluate their comprehension of the material and their level of participation in the activity.

Learning Goals

Students

- Make suggestions about the protection of the environment.
- Investigate ways to protect our planet and avoid causing harm.
- Raise environmental awareness.
- Build self-confidence.

Course Objectives

- E6.9.L1. Students will be able to recognize appropriate attitudes to save energy and to protect the environment.
- E6.9.SI1. Students will be able to give each other suggestions about the protection of the environment.
- E6.9.SP1. Students will be able to talk to people about the protection of the environment.
- E6.9.R2. Students will be able to follow short, simple written instructions.

Related Skills

- Digital skills
- Creativity
- Communication
- Collaboration
- Critical thinking

PREPARATION

Learning Approaches, Methods, Strategies

- Project based learning
- Active learning
- Cooperative learning

Tasks

Teacher

- Manages and oversees the web tools utilised in this course.
- Provides the necessary materials.
- Facilitates the students' poster design process.

Student

- Makes suggestions about environmental problems.
- Designs course materials.
- Raises awareness of environmental issues.
- Enhances digital skills.

Instructional Tools/Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive whiteboard

Online Tools

- eba.gov.tr
- Interactive presentation tools
- Poster and flyer creation tools

Instructional Materials

- Dictionary
- Glue
- Stick
- Rubbish bins

APPLICATION

Activities

Before the Lesson

The teacher prepares a Saving Our Planet presentation using one of the interactive presentation tools (Annex-1).

Lesson 1 (Class)

Pre-Activity

The teacher initiates the lesson by writing "Saving the Planet" on the board and inviting the students to contribute their ideas on the subject. As the students offer suggestions such as recycling, planting trees, using less water, and renewable energy, the teacher emphasises the significance of environmental issues and the necessity of collaborative solutions.

While Activity

The teacher shares the key vocabulary and terms related to environmental protection on the board. Then the students are asked to read these words aloud in English so that the teacher can assess their pronunciation and familiarity with the vocabulary. The teacher then gives a detailed explanation of the meaning and use of each term in the context of environmental protection, using English to reinforce language acquisition. At this stage, the teacher initiates the Saving Our Planet presentation on the interactive whiteboard and explains the importance of water conservation, environmental protection, and wildlife preservation (Annex-1). Then the teacher initiates Vocabulary Exercise 1, 2, 3: Saving the Planet on EBA and asks the students to complete them together.

Post-Activity

The teacher asks the students to complete the Saving the Planet test on EBA. At the end of the lesson, the teacher asks the students to bring a stick for the next class and explains that they will use it in an activity.

Related Skills: Communication, Collaboration, Critical thinking

Before the Lesson

The teacher prepares the four colour-coded bins, labels them appropriately. Additionally, the teacher creates a self-assessment form to be used at the end of the lesson (Annex-2).

Lesson 2 (IT Class)

Pre-Activity

The teacher engages the students in a brainstorming session on the topic of "Saving Our Planet". The teacher asks the students to think critically about the importance of environmental protection and sustainability. Following this discussion, the teacher guides the students in writing effective slogans that reflect their thoughts on these issues. The teacher encourages the students to think creatively and emphasises the need for their slogans to be both memorable and motivational. Once the students have developed their slogans, they share them with the class and receive feedback from their peers and the teacher.

While Activity

The teacher informs the students that they will create a poster based on the slogans they developed during the warm-up activity. The posters should raise awareness about environmental protection, focusing on the specific issues they have chosen. The teacher explains that the students will use one of the poster and flyer creation tools to design their posters. The students are encouraged to choose images that complement their slogans, ensuring that the overall design of the poster is in line with the environmental theme. When the posters are finished, the teacher helps the students to print them. The students then attach their posters to sticks to form banners. The teacher reminds the students that these banners will be used in the next lesson, possibly for a school event, thus reinforcing the importance of their message.

Post-Activity

The teacher introduces four colour-coded bins, each for a specific type of recyclable material: blue for paper, yellow for plastic, green for glass and grey for metal waste. The teacher labels each bin with the corresponding type of material by writing the words paper, plastic, glass and metal on the computer, then prints out the labels and sticks them on the bins. In the following lesson, the teacher informs the students that these bins will be placed in the school garden. The students are instructed to collect rubbish from the school garden, systematically sort the rubbish according to its material type and then dispose of it in the appropriately labelled bins. This activity reinforces the importance of proper waste management and recycling and promotes environmental awareness and responsibility among the students. At the conclusion of the lesson, the teacher distributes self-assessment forms to the students. They thoughtfully complete these forms, reflecting on their learning and participation, and then return them to the teacher for review (Annex-2).

Related Skills: Communication, Collaboration, Digital skills, Creativity

Before the Lesson

As the students will perform in the school garden with banners about saving the planet, the teacher informs the students in advance. So, the teacher should make sure the posters are ready and there are four colour-coded bins (blue for paper, yellow for plastic, green for glass, grey for metal). Before the lesson, the teacher hides key vocabulary around the garden.

Lesson 3 (School Garden)

Pre-Activity

The students take part in a scavenger hunt in the school garden, where the teacher hides words related to sustainability, recycling, and nature. Working in teams, the students race against the clock to find as many words as possible. The team that finds the most words wins. This activity promotes engagement with environmental issues and encourages teamwork and rapid decision-making.

While Activity

The students place their banners in the school garden as guided by the teacher and put on gloves in accordance with the safety protocol for the activity. The teacher places the rubbish bins, labelled for paper, plastic, glass and metal, in the garden. The teacher and the students then work together to collect the rubbish from the garden. The teacher divides the class into four groups, each representing a specific colour: blue for paper, yellow for plastic, green for glass and grey for metal. Each group is responsible for sorting and collecting the rubbish in the appropriate bins. The teacher monitors the time and the group that has correctly sorted and collected the most rubbish in the allotted time is announced the winner. Once the horticultural maintenance was done, the rest of the students and teaching staff gathered in the garden. The students present banners and slogans about environmental protection. They also explain how to use the colour-coded bins correctly.

Post-Activity

The teacher records the students' poster-making process and the garbage collection competition, then uploads the videos to the school website with the slogan, "We are the planet protectors!"

Homework/Assignment

The students must create a fact sheet about climate change. It should cover causes, effects and solutions. The students can present their fact sheet as a booklet, poster, or digital presentation. It should have a clear title, well-organised sections, and relevant visuals. The completed fact sheet is due by the next lesson. The students must post their assignments on EBA. The teacher will assess the homework on EBA for accuracy, clarity, and creativity. The students can ask questions on EBA.

Related Skills: Collaboration, Communication, Creativity, Digital skills

Evaluation/Assessment Methods/Tools

- EBA + vocabulary exercises
- EBA + test
- EBA + assignment assessment
- Self-assessment form

Annex-2: Self-Assessment Form

The Transcript for 'Saving Our Planet' Presentation

Description: The teacher creates a presentation using one of the interactive presentation tools based on following content.

Slide 1 Cover Page	**SAVING OUR PLANET**
Slide 2	**ENVIRONMENTAL PROTECTION** Environmental protection ensures the health of our planet's ecosystems, which provide us with clean air, water, food, and resources.
Slide 3	**THREATS TO OUR PLANET** Pollution, deforestation, climate change, and habitat destruction are among the greatest threats facing our planet.
Slide 4	**REDUCE** Minimise waste by using fewer resources and consuming mindfully. **REUSE** Give items a second life by repurposing them or donating to others. **RECYCLE** Properly dispose of recyclable materials to reduce landfill waste and conserve resources.
Slide 5	**SAVING THE WATER** Water is a precious resource essential for life, and saving it is crucial for sustainability
Slide 6	**PROTECTING WILDLIFE** Wildlife protection is vital for preserving biodiversity and ecosystems
Slide 7	**SUSTAINABLE LIVING** Choose eco-friendly products, support local and organic agriculture, and reduce energy consumption.
Slide 8	**FUN FACTS** Recycling one aluminium can saves enough energy to power a TV for three hours!
Slide 9	**CONCLUSION** By working together and taking small actions, we can make a big difference in protecting our planet.
Slide 10	**THANK YOU FOR YOUR ATTENTION**

Self-Assessment Form

This form had been designed to help you assess your work on environment. Read each statement carefully. Choose the option that best describes your level of agreement:

Always: This statement is completely true for me.
Sometimes: This statement is partially true for me.
Never: This statement is not true for me at all.

Student's Name:

CRITERIA	SCALE		
	Always	Sometimes	Never
I know what we need to do to save our planet.			
I can effectively collaborate with others to protect our environment.			
I can categorise rubbish.			
Learning through experience is enjoyable.			
Working on poster projects on the computer helps me develop my digital skills.
