EMOTIONAL IMPACT OF WEATHER

Course	English	Grade	6th Grade	Duration	3 lesson hours (3x40')

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

This learning scenario is designed to improve the students' language skills in the context of discussing weather and emotions. The activities focus on weather-related vocabulary, expressing emotions, and making simple enquiries, encouraging the students to apply language in real-life situations. The students engage in tasks such as describing the weather, discussing how weather conditions make them feel, and expressing emotions using target phrases. Through interactive exercises such as matching weather conditions to images, creating digital stories, and taking gamified quizzes, the students practise both their language and critical thinking skills. The lessons also include cooperative learning opportunities, with the students collaborating in pairs or small groups to complete various tasks. Additionally, the scenario incorporates various digital tools and interactive methods such as gamification, digital storytelling, and web tools for matching activities and multiple-choice questions. The teacher's role is to guide and support students through these activities, encouraging communication and collaboration, and using technology to enhance the learning experience. This scenario helps the students to achieve the curriculum's goals of describing weather conditions, expressing emotions and making simple inquiries.

Key Concepts: Weather conditions, Emotions, Simple inquiries, Temperature, Station rotation technique

Learning Goals

Students

- Recognise and describe different weather conditions using appropriate vocabulary.
- Identify specific information from short oral texts about weather and emotions.
- Ask and respond to simple questions about the weather.
- Express personal emotions related to different weather conditions.
- Interpret short and simple texts about weather and emotions.
- Use technological tools to develop listening, speaking, reading, and writing skills about weather and emotions.

Course Objectives

- E6.4.L1. Students will be able to pick up specific information from short oral texts about weather conditions and emotions.
- E6.4.SI1. Students will be able to ask people about the weather.
- E6.4.SP1. Students will be able to talk about the weather and their emotions in a simple way.
- E6.4.R1. Students will be able to understand short and simple texts about the weather, weather conditions and emotions.

Related Skills

- Communication
- Collaboration
- Critical thinking
- Active listening
- Digital skills
- Creativity
- Cultural awareness

PREPARATION

Learning Approaches, Methods, Strategies

- Cooperative learning
- Gamification
- Storytelling
- Station rotation technique

Tasks

Teacher

- Utilises technological tools to support the development of the students' listening, speaking, and reading skills.
- Creates educational content in digital formats, such as digital stories, animations, and online games, related to weather conditions and emotions.
- Guides the students in using technology tools effectively.
- Fosters an interactive and cooperative learning environment to enhance the students' ability to discuss weather and emotions.

Student

- Participates in online activities to improve skills related to weather conditions and emotions.
- Engages with digital content provided by the teacher, such as games, videos, and short oral texts, in order to gather information.
- Actively participates in discussions and shares ideas about weather and emotions.
- Maintains focus and completes listening, speaking, and reading tasks responsibly.

Instructional Tools / Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive whiteboard

Online Tools

- eba.gov.tr
- Web tools for matching activities
- Gamification web tools
- Digital story creation tools
- Poster and flyer creation tools
- Gamified measurement and evaluation web tools
- Web tools for multiple-choice questions

APPLICATION

Activities

Before the Lesson

The students are required to complete Vocabulary Exercise 1: Weather and Emotions on EBA. This activity focuses on identifying and using appropriate vocabulary to describe different weather conditions. The teacher designs a memory card game named Find the Pairs using a gamification web tool to reinforce vocabulary through an engaging and interactive learning experience. The teacher also creates a digital story titled Weather Around the World using one of the digital story creation tools (Annex-1). Additionally, the teacher designs an Interactive Weather Match exercise using one of the web tools for matching activities.

Lesson 1 (Class)

Pre-Activity

The teacher implements the Find the Pairs memory card game as a warm-up activity to activate the students' prior knowledge and engage them in the lesson. In this interactive task, the students are required to memorise the position of all the cards and match each pair correctly. They are encouraged to complete the task as quickly as possible and try to beat their best score. This activity enhances vocabulary retention and improves short-term memory and fosters digital literacy skills by incorporating game-based learning elements.

While Activity

Following the memory card game, the teacher proceeds to the Weather Around the World story, in which the students learn about the weather in the capitals of different countries (Annex-1). The teacher then asks the students to remember the weather conditions discussed in the story. For example, they might be asked, "What is the weather like in Ankara?" to encourage reflection on the information heard. Next, the teacher divides the class into pairs or small groups and invites each group to choose a city. Working together, the students then create a weather card depicting the weather conditions in their chosen city, illustrating it in a similar way to the story. Once their drawings are complete, each group presents their weather card to the class and explains the weather in their selected city. This activity reinforces listening comprehension, fosters creative expression and encourages teamwork.

Post-Activity

For the assessment, the teacher incorporates the Interactive Weather Match exercise, in which the students click on a circle to listen to an audio clip and select the correct weather condition from the options provided. This activity strengthens listening comprehension skills, helping the students to accurately associate auditory input with visual representations of weather vocabulary. It also encourages active engagement by providing an interactive digital learning experience.

Related Skills: Active listening, Digital skills, Creativity, Collaboration, Cultural awareness

Before the Lesson

The teacher designs an activity titled Guess the Weather through a gamification web tool to enhance student engagement and reinforce weather-related vocabulary. Additionally, the teacher designs a digital story titled Exploring Weather in VR using one of the digital story creation tools (Annex-2). Finally, the teacher designs an exercise titled Emotions using one of the gamified measurement and evaluation web tools.

Lesson 2 (Class)

Pre-Activity

The teacher implements the Guess the Weather activity as a warm-up task to help the students review and internalise weather-related vocabulary. In this interactive activity, the students first listen to a weather-related word or phrase and then drag the letters into the correct positions to unscramble it. This task supports the development of listening comprehension, spelling and vocabulary recognition, and enhances digital literacy and engagement through a multisensory learning approach.

While Activity

After the activity, the teacher moves on to the Exploring Weather in VR digital story (Annex-2). In this story, the students enter a virtual reality classroom and take turns to experience different weather conditions such as sunny, rainy, snowy, or windy. As they explore the scenes, they describe what they see and express how the weather makes them feel using simple target sentences (e.g. 'It's sunny; I feel happy on sunny days.').

Following the story, the teacher organises a Weather & Emotion Station Activity. The classroom is divided into four stations, each represented by an emoji and labelled with a different emotion: happy (😊), sad (☹️), sleepy (😴) and angry (😡). The students then move to the station that best represents how they felt during their VR weather experience. At each station, they complete a short, guided task.

Station 1 – Happy 😊 : Draw or describe a type of weather that makes you happy.
Station 2 – Sad ☹️ : Match weather icons with emotion words.
Station 3 – Sleepy 😴 : Complete the sentence: 'I feel sleepy when it is...'
Station 4 – Angry 😡 : Role-play a short dialogue expressing emotions caused by extreme weather.

Each group shares their answers at their station, which encourages collaboration and the meaningful use of language. After the rotation, volunteers from each station present a sentence or idea to the whole class. This movement-based learning strategy enables students to internalise vocabulary and express their personal responses, thereby enhancing their language and emotional awareness.

Post-Activity

The teacher then moves on to the Emotions exercise for the assessment. In this interactive task, the students listen to a sentence and tap the correct answer when they see it as the answers move across the screen. Using this gamified activity for assessment increases student engagement, encourages active participation and aids the retention of emotional vocabulary. It also provides teachers with a dynamic way to assess students' understanding in an enjoyable, low-pressure environment, fostering a positive atmosphere for learning and development.

Related Skills: Collaboration, Communication, Digital Literacy, Critical Thinking, Creativity

Before the Lesson

The teacher designs an exercise named Weather Bowling Challenge using a gamified measurement and evaluation web tool to make learning more engaging (Annex-3). Additionally, the teacher prepares an activity titled Weather/Seasons/Emotions using one of the web tools for matching exercises. The teacher also develops a Weather and Emotion Quiz with the help of a web tool for multiple-choice questions (Annex-4).

Lesson 3 (IT Class)

Pre-Activity

The teacher uses the Weather Bowling Challenge exercise as a warm-up activity, in which the students roll a ball towards a set of pins, each labelled with different weather conditions such as sunny, rainy, or cloudy (Annex-3). If a student answers correctly, the corresponding pin falls, and they earn a point. If the student is unsure of the answer, the ball rolls past the pin without knocking it down, and the next student takes the turn. This activity promotes visual recognition and reinforces vocabulary retention in an interactive and fun way.

While Activity

Following the warm-up activity, the students move on to the Weather/Seasons/Emotions categorisation task. In this interactive drag-and-drop exercise, the students are asked to drag the words and drop them into the correct categories. They categorise vocabulary related to weather conditions (e.g. sunny, rainy), seasons (e.g. winter, summer), and emotions (e.g. happy, sad). This activity supports vocabulary recall and helps the students to organise concepts visually while practising word recognition and spelling. The teacher divides the class into groups of four and asks each group to design a digital poster about the weather, the seasons and emotions. The teams use one of the poster and flyer creation tools to design their posters. Each team must choose at least three weather conditions, three seasons and three emotions and write simple sentences in English using these, such as 'It is hot in summer' or 'I feel sleepy on rainy days'. They must also add drawings or images to visually represent each word or sentence. Once completed, each team leader presents their team's work to the class, explaining the weather types, seasons and emotions included, and reading the sentences aloud to practise pronunciation and speaking.

Post-Activity

To assess the students, the teacher uses the Weather and Emotion Quiz, a multiple-choice activity in which the students are expected to look at the visuals, read the sentence or short text carefully, and mark the correct option that matches the weather condition or emotion described (Annex-4). This activity improves the students' reading comprehension and vocabulary recognition and encourages them to make connections between visuals and written language.

Homework/Assignment

The students create an interactive digital story about imaginary visits to three cities around the world, such as London, Tokyo and Paris. In their stories, the students will 'travel' to these cities, observe the weather and describe how it makes them feel. They are encouraged to enhance their stories by adding images, icons or animations to visually represent the weather and their emotions in each city. Once finished, the students submit their work to the teacher via a designated classroom management tool.

Related Skills: Collaboration, Communication, Digital Literacy, Creativity, Visual literacy, Critical thinking

Evaluation/Assessment Methods/Tools

- EBA + vocabulary exercise
- Web tools for matching activities
- Gamified measurement and evaluation web tools
- Web tools for multiple-choice questions

The Transcript of 'Weather Around the World' Digital Story

Description: The teacher creates a digital story using one of the digital story creation tools, including the following context:

Page 1
This is Mary Blue, your global weather reporter. Let's check today's weather in different world capitals.

Page 2
It is partly cloudy in Ankara, and the temperature is 18 degrees Celsius.

Page 3
It is sunny in Washington, and the temperature is 22 degrees Celsius.

Page 4
It is windy in Tokyo, and the temperature is 14 degrees Celsius.

Page 5
It is rainy in Canberra, and the temperature is 12 degrees Celsius.

Page 6
It is snowy in Helsinki, and the temperature is -5 degrees Celsius.

Page 7
It is foggy in Paris, and the temperature is 18 degrees Celsius.

Page 8
It is stormy in Buenos Aires, and the temperature is 6 degrees Celsius.

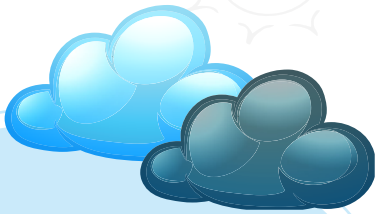

Page 9
That's the weather around the world. See you next time!

The Transcript of 'Exploring Weather in VR' Digital Story

Description: The teacher creates a digital story using one of the digital story creation tools, including the following context:

Page 1
Good morning, everyone! Welcome to our VR classroom. Today, we will look at the weather from different windows. Who wants to open the first window?

Page 2
It's sunny.
I feel happy on sunny days.

Page 3
It's windy.
I feel excited on windy days.

Page 4
It's cloudy.
I feel a little sad on cloudy days.

Page 5
It's snowy.
I feel joyful on snowy days.

Page 6
It's rainy.
I feel calm on rainy days.

Page 7
It's foggy.
I feel curious on foggy days.

Page 8
Well done, everyone! Now, let's draw a picture of today's weather in your notebooks.

Weather Bowling Challenge

Choose the correct option.

1 **What is the weather like?**

A) Cloudy
B) Rainy
C) Sunny
D) Windy

2 **What is the weather like?**

A) Cloudy
B) Foggy
C) Rainy
D)Snowy

3 **It is _____ in Ankara.**

A) rainy
B) snowy
C) sunny
D) windy

4 **It is _____ in Rize.**

A) cold
B) foggy
C) rainy
D) sunny

5 **It is _____in Gaziantep.**

A) cold
B) cloudy
C) sunny
D) windy

Weather and Emotions Quiz

Choose the correct answer.

1. **What season is it?**

A) It is autumn.
B) It is spring.
C) It is summer.
D) It is winter.

2. **What is the weather like today?**

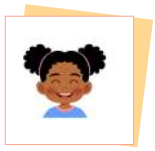

A) It is cold.
B) It is cloudy.
C) It is rainy.
D) It is sunny.

3. Who is happy?

A) 

B) 

C) 

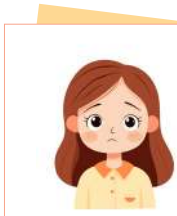

D) 

4. I'm .....

A) angry.
B) energetic.
C) sad.
D) sleepy.

5. She is .....

A) happy.
B) sad.
C)scared.
D)sleepy.

6. Ankara is cold and snowy in winter. People wear thick coats, boots and gloves. Children sometimes make snowmen. The weather is usually cloudy.

According to the text, which one is NOT correct?

A) Ankara is hot and sunny in winter.
B) People wear thick clothes like coats and gloves.
C) Children make snowmen.
D) It is usually cloudy.

7.

Madrid	Helsinki
Sunny	Snowy
18°C	2°C

According to the visuals above, which one is correct?

A) It is snowy and cold in Madrid.
B) It is sunny and warm in Helsinki.
C)It is snowy and cold in Helsinki.
D) It is raining and warm in Madrid.

8. I feel happy on (☀) days.

A) cloudy

B) rainy

C) sunny

D) windy

9. Jack: .....?

Jane: It is rainy and cold.

A) What is the weather like today?

B) How do you feel?

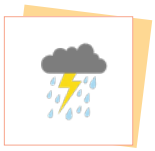

C) Is it hot and sunny?

D) Is it snowy?

10. Which of the following matching is NOT correct?

A) 
Snowy

B) 
Sunny

C) 
Stormy

D) 
Windy

11. He is .....

A) angry.

B) energetic.

C) happy.

D) sad.

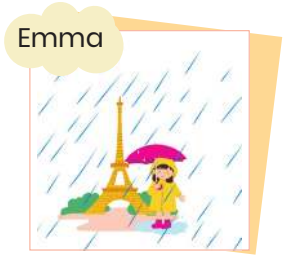

12. What is the weather like in Paris?

A) It is rainy.

B) It is snowy.

C) It is sunny.

D) It is windy.

13. What is the weather like in Helsinki?

A) It is cloudy.

B) It is snowy.

C) It is sunny.

D) It is windy.

14. Which one is FALSE according to the visual?

A) It is rainy in Paris.

B) It is sunny in Helsinki.

C) Emma is in Paris.

D) Tom is in Helsinki.
