Course	English	Grade	6th Grade	Duration	3 lesson hours (3x40')

This scenario is designed to assist teachers in providing an effective learning experience utilising technology. The teacher may utilise this scenario, which is presented as an exemplar, or adapt it to align with the specific requirements of the students and the physical conditions of the educational institution.

Overview

This learning scenario leverages digital tools to cultivate the students' abilities in expressing likes, dislikes, and preferences related to food, interpreting information presented on food labels, and engaging in discussions about the nutritional value of various food items. The strategic integration of diverse web tools serves multiple pedagogical purposes: creating varied and engaging learning materials, actively involving the students in the learning process, and accommodating diverse learning styles within the classroom. To this end, the scenario incorporates several key digital components. Initially, an animation introduces key concepts and provides context. Subsequently, interactive presentations of food labels, allow for detailed examination and analysis of label information, such as nutritional content, ingredients, and serving sizes. Furthermore, warm-up activities, designed by the teacher using gamification web tools, aim to engage the students and dynamically activate prior knowledge. Consequently, these digital components are anticipated to foster cooperative learning experiences, encouraging teamwork and peer interaction, while task-based learning approach simultaneously provides opportunities for the students to demonstrate creativity and productivity in their learning outcomes. Within this digitally enhanced learning environment, the teacher acts as a facilitator and guide, providing support, monitoring student progress, and offering constructive feedback.

In addition to these learning activities, the assessment within this learning scenario is multifaceted, employing a range of methods to provide a holistic view of student progress. Specifically, self-assessment forms empower the students to reflect on their own learning, identify areas of strength and weakness, and develop metacognitive awareness. Additionally, matching activities offer a concise and engaging way to assess comprehension of key concepts and vocabulary.

Furthermore, the use of gamified measurement and evaluation web tools not only makes the assessment process more interactive and enjoyable but also allows for immediate data collection and analysis, providing valuable insights into student learning. This varied assessment strategy seeks to improve the learning process by shifting assessment from being merely a final evaluation to becoming a continuous and formative part of learning.

Key Concepts: Healthy/Unhealthy, Interview on habits, Like/Dislike

Learning Goals

Students

- Talk about healthy/unhealthy food.
- Express what they like/dislike/prefer.
- Enhance their communication skills.
- Use creative thinking skills in adapting technologies in ways that align with the learning outcomes.
- Work in collaboration for a project.
- Actively use target language and information technology.

Course Objectives

- E6.2.L1. Students will be able to identify the names of different foods in an oral text.
- E6.2.SI1. Students will be able to ask people about their food preferences.
- E6.2.SP1. Students will be able to express their opinions about the food they like and don't like.
- E6.2.R1. Students will be able to understand short and simple texts about food and preferences.
- E6.2.R2. Students will be able to understand the label of food products.

Related Skills

- Communication
- Active listening
- Collaboration
- Critical thinking
- Productivity
- Creativity
- Digital skills
- Problem solving

PREPARATION

Learning Approaches, Methods, Strategies

- Technology-based learning
- Cooperative learning
- Task-based learning

Tasks

Teacher

- Creates activities using various web tools to enhance student interaction.
- Designs a self-assessment form.
- Exemplifies to express likes/dislikes/preferences.
- Guides the students to work in collaboration.
- Encourages the students to take active role in learning.
- Motivates the students to use digital tools.
- Provides the students with a flexible and motivating atmosphere for an active learning process.

Student

- Talks about healthy/unhealthy foods.
- Conducts an interview about eating habits and records it.
- Identifies the food labels.
- Participates in the learning process actively.
- Works in collaboration with the group members.
- Joins in the activities to gain digital competence.
- Tries to be creative in producing new ideas and tries to fulfil responsibilities.

Instructional Tools/ Technologies

The web tools provided in this scenario are offered as examples. Teachers are free to select and apply any tool they see fit, according to the web tools category. It is recommended that teachers review the web tool in question before use and have a good understanding of the tool's interface.

Hardware

- Interactive whiteboard
- Tablets
- Computer

Online Tools

- eba.gov.tr
- Gamification web tools
- Animation creation tools
- Video editing tools
- Interactive presentation tools
- Web tools for matching activities
- Web tools for self-assessment
- Gamified measurement and evaluation web tools

APPLICATION

Activities

Before the Lesson

The teacher designs an activity named Spin and Name the Food using one of the gamification web tools. Then the teacher prepares an animation titled Interview about Eating Habits using one of the animation creation tools (Annex-1). Lastly, for the assessment, the teacher creates an activity titled Healthy or Unhealthy using one of the web tools for matching activities (Annex-2).

Lesson 1 (Class)

Pre-Activity

The teacher introduces the Spin and Name the Food activity, where the students spin the wheel, look at the visual and name the foods, such as egg, milk, tomato, etc. The students who give the correct answer can say whether they like the given food or not.

While Activity

Subsequent to the activity, the teacher introduces the Interview about Eating Habits animation, during which the students are required to identify appropriate phrases about food preferences, express opinions regarding liked and disliked foods, and categorise foods as healthy or unhealthy (Annex-1). Upon completion of the animation, the teacher poses the question, "What kinds of foods do you prefer for breakfast?" prompting the students to construct sentences expressing their food preferences and aversions. Additionally, the students are tasked with formulating sentences that provide examples of healthy and unhealthy foods. The students are expected to utilise structures such as "I prefer," "I like/dislike," or "I enjoy/hate" when discussing food, and the teacher provides immediate feedback throughout the activity.

Post-Activity

After the animation, to assess the comprehension, the teacher implements the Healthy or Unhealthy matching activity, where the students are asked to classify the given foods under the topics of healthy or unhealthy (Annex-2).

Related Skills: Communication, Active listening, Critical thinking

Before the Lesson

TThe teacher selects an age-appropriate song such as "Yummy Breakfast" to energise the students. Additionally, for the assessment, the teacher is required to prepare a Self-Assessment Form using one of the web tools for self-assessment (Annex-3).

Lesson 2 (IT Class)

Pre-Activity

The teacher initiates the "Yummy Breakfast" song, where the students are required to listen to the song, dance and clap their hands when they hear the name of food.

While Activity

Following the song, the teacher asks the students to work in groups of three to create an interview video using one of the video editing tools, where the students are required to write an interview about their eating habits and record their interview. Additionally, the students are encouraged to mention the foods they like or dislike, as well as identify healthy and unhealthy options while creating their interview video. The teacher informs the students that they will evaluate their own performance at the end of the lesson. While the students are conducting their interviews, the teacher circulates around the classroom to monitor their progress. If the students require assistance, the teacher offers guidance and encourages them to approach the task with creativity and productivity. When the students complete recording the video, the teacher asks the students to share their videos on EBA and as an assignment, the students are required to comment on the videos of their classmates.

Post-Activity

When the students finish creating the interview video, the teacher shares the Self-Assessment Form and wants the students to evaluate their own performances (Annex-3). The teacher discusses the results of the assessment with the students and provides the necessary feedback.

Related Skills: Communication, Collaboration, Digital skills, Productivity, Creativity

Before the Lesson

The teacher asks the students to complete Vocabulary Exercise 3: Yummy Breakfast activity on EBA and designs various digital materials to enhance student engagement and learning. First, the teacher develops an activity named Find the Foods using one of the gamification web tools (Annex-4). Then the teacher designs a presentation titled Food Labels using one of the interactive presentation tools (Annex-5). Lastly, for the assessment, the teacher creates an escape game titled Nutritious Kitchen using one of the gamified measurement and evaluation web tools (Annex-6).

Lesson 3 (Class)

Pre-Activity

The teacher introduces the Find the Foods activity, where the students look at the given words and find them in the word grid (Annex-4). A student who identifies a given word is required to construct a sentence containing it.

While Activity

Following the activity, the teacher initiates the Food Labels presentation, where the students are presented with the phrases to label the foods (Annex-5). During the presentation, the teacher poses questions such as "Do you pay attention to product labels?" and "What is the expiry date? Is it important, and why?" to maintain student engagement and provides immediate feedback throughout the activity.

Post-Activity

Following the presentation, the students work in pairs to assess their comprehension. The teacher then implements the Nutritious Kitchen escape game, in which the students follow the provided steps and answer the interactive questions to complete the task and reach the exit (Annex-7).

Related Skills: Communication, Collaboration, Active listening, Digital skills, Problem solving

Evaluation/Assessment Methods/Tools

- EBA + vocabulary exercises
- Web tools for matching activities
- Web tools for self-assessment
- Gamified measurement and evaluation web tools

The Transcript of 'Interview about Eating Habits' Animation

Description: The teacher creates an animation using one of the animation creation tools, where the students listen to the dialogues to identify the phrases for expressing preferences. A student conducts an interview with two other students in the school corridor.

First Interview

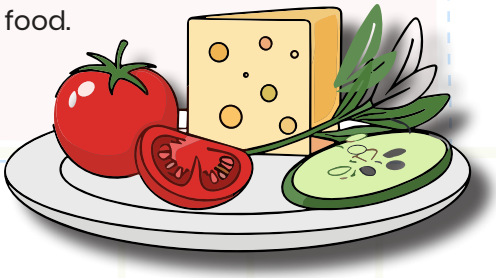

Interviewer: Hi, I would like to do an interview with you about your eating habits. Would you like to join my interview?
Student 1: Sure, I would love to.
Interviewer: Let me ask you a few questions. What do you eat for breakfast?
Student 1: I eat pancakes and honey.
Interviewer: Are they healthy or unhealthy?
Student 1: Honey is healthy, but pancakes are not that healthy.
Interviewer: Can you give me some examples of healthy and unhealthy foods?
Student 1: Of course. Eggs, olives, butter, honey and vegetables are healthy. Jam, sausages, croissants and coffee are unhealthy.
Interviewer: Thank you very much, you are great.

Second Interview

Interviewer: Hi, I would like to do an interview with you about your eating habits. Would you like to join my interview?
Student 2: Of course, I would be happy.
Interviewer: What do you eat for breakfast?
Student 2: Omelette. I like omelette very much.
Interviewer: Is omelette healthy or unhealthy?
Student 2: Of course, it is very healthy and nutritious.
Interviewer: Can you give me some examples of healthy and unhealthy foods?
Student 2: Milk, tomato, apple, lettuce are the examples of healthy food. Hamburger, chips, chocolate and cereal are the examples of unhealthy food.
Interviewer: Thank you very much for your kind attitude.

Healthy or Unhealthy Matching Activity

Categorise the foods into healthy and un healthy groups based on their nutritional value.

honey | egg | sausages | salami

butter | cereal | croissant | coffee

cucumber | tomato | pancake | olives

muffin | chips | orange juice | milk

The Transcript of 'Food Labels' Presentation

Description: The teacher creates a presentation, using one of the interactive presentation tools, where the students are required to recognise the phrases on the food labels.

First page: Write, "Food labels for our health. It is important to read the labels of the food." and attach an image of a salad.

Second page: Write, "Labels of milk/Nutrition facts/Amount of Calcium-Protein-Potassium." and attach images of milk and healthy lifestyle.

Third page: Write "Milk is healthy." and add an interactive question: True or False?

Fourth page: Write, "Labels of tuna fish/Nutrition facts/Amount of Protein-Omega-Sodium-Energy." and attach images of tuna fish and healthy lifestyle.

Fifth page: Write "Tuna fish is unhealthy." and add an interactive question: True or False?

Sixth page: Summarise the food labels and give examples. Write "Name of the food (Lula Yoghurt)/ Date Marking (Best before 10.2024) / Ingredients (Yoghurt, Strawberry) / Country of origin (Türkiye)".

Seventh page: Attach images of different exercises and healthy foods, and write slogans under each picture, such as: "Our food preferences are important for our health," "Doing exercise is also important for our health," and "Don't forget, eat healthy, stay healthy."

Eighth page: Thank the audience.

Nutritious Kitchen Game

Description: The teacher creates an escape game, using one of the gamified measurement and evaluation web tools, where the students are required to follow the steps in the game to reach the exit.

PAGES and QUESTIONS

First page: Write "Nutritious Kitchen, Find something healthy" as a title. Use the image of kitchen as background page.

Second page: As an instruction, write: "After a tiring day, you come home, you are very hungry, and your mother is at work. When you go to the kitchen, you see a note from your mother and decide to read it.

Third page: Write, "Find the note in the kitchen". When the students click on the note, the note says: Darling, there are various things to eat/drink in the fridge. Please check the labels before eating. Love you! You can eat/drink: Milk with banana, green salad with chicken, rice pudding, hamburger."

Fourth page: Add an interactive question. "Which of the food in the list is unhealthy?" Choices: "Hamburger /Milk with banana /Green salad with chicken". Attach images of hamburger and green salad.

Fifth page: Add an interactive question. "Which one is a drink?" Choices: "Milk with banana / Hamburger /Rice pudding". Attach images of rice pudding, a hamburger and milk.

Sixth page: Add an interactive question. "Which is not the label on the milk carton?" Choices: "Colour of the food / Date marking / Name of the food(milk). Attach the images of milk carton.

Seventh page: Write a note to remind the food labels: Name of the food, Date marking, Ingredients, Directions for use/Storage

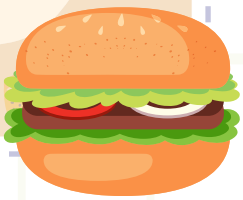

Eighth page: Add an interactive question. "Which one is date marking?" Choices: Best before 11.2024 / Organic strawberry, sugar, milk / Milky Milky. Add images of strawberry.

Ninth page: Add an interactive question. "Green salad with chicken is very healthy. Find the healthy food." Attach the images of green salad and pizza.

Tenth page: Add an interactive question. "Fast food is very unhealthy. Find the unhealthy food." Attach the images of fast food and fruit salad.

Eleventh page: Completed! You have completed all the tasks, well done :)

Answer Keys
